Sport is big business; international in nature and the focus of much media and cultural attention. In this Very Short Introduction, Mike Cronin charts the history of sport, from its traditional origins in folk football and cock fighting to its position as a global phenomenon today. Looking at a variety of sports from team games such as rugby, cricket, and football to games for individuals such as golf, tennis, and skiing, he considers how these first emerged and captivated the interest of ordinary people, and how sport has been transformed within our daily lives. Exploring the relationship between sport and class, gender, commerce, identity, and ethics, Cronin considers some of the central issues in sport today, including the high pay of professional footballers and the glamour of women in sports, as well as fair play standards. Charting sport through the ages and around the world, this is a short guide to the history, development, and place of sport in contemporary global society. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Bring the spark back into your bedroom and your marriage with gutsy and effective advice from bestselling author Michele Weiner-Davis. It is estimated that one of every three married couples struggles with problems associated with mismatched sexual desire. Do you? If you want to stop fighting about sex and revitalize your intimate connection with your spouse, then you need this book. In *The Sex-Starved Marriage*, bestselling author Michele Weiner Davis will help you understand why being complacent or bitter about ho-hum sex might cost you your relationship. Full of moving firsthand accounts from couples who have struggled with the erosion of sexual desire and rebuilt their passionate connection, *The Sex-Starved Marriage* addresses every aspect of the sexual libido problem: If you're the more highly sexed partner, you'll breathe a sigh of relief. At last someone understands your feelings about the void in your marriage. Discover why your pleas for touch have fallen upon deaf ears and why your approach to the lull in your sexual relationship could be a sexual turnoff. Most important, learn new ways to motivate your spouse to take your needs for more physical closeness to heart. If you're the spouse with a lagging libido, you're far from alone. You'll learn about the physiological and psychological factors, including unresolved relationship issues, that may contribute to the chill in your bedroom and what you can do to melt the ice. And if you're a man, you'll be surprised to learn that staggering numbers of men, even men whose sexual machinery works just fine, "get headaches" too! *The Sex-Starved Marriage* will give you and your spouse the inspiration, encouragement, and answers you need.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on

porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

This edition retains the three-part approach of the second edition. Part A is an introduction to the essential concepts necessary to procure a piling or retaining wall contract. Part B is the specification and is still the only part of this document intended for incorporation in contracts. Part C provides guidance for use of the specification and essential background information for specifiers and contractors alike. Unlike the second edition, Part 3 guidance notes immediately follow the relevant Part 2 specification requirements. The three sections provide the reader with a full compendium without being overly prescriptive.

The dory has seen duty as a fishing boat, lumberman's batteau, lifeboat, recreational rowing boat, and racing sailboat. The most comprehensive book about dories ever published, this is at once a history of the dory, a practical handbook on dory building, and a compendium of 23 dory designs with full construction details. The author, a longtime contributor to *National Fisherman*, and the illustrator, Sam Manning, are perhaps the foremost experts on the subject. A steady stream of letters and photographs to the late John Gardner from successful dory builders worldwide has been testimony to the widespread popularity and influence of this book.

The Humanscale series is an important toolkit for everyone who designs for the human body. It incorporates the extensive amount of human engineering data compiled and organized by Henry Dreyfuss Associates throughout the twentieth century, including research of anthropologists,

psychologists, scientists, human engineers, and medical experts. Originally published in 1974, Humanscale 1/2/3 consists of pictorial selectors equipped with rotary dials. This portfolio contains three selectors (two sides each) which present over 20,000 bits of information, encompassing anthropometry, guidelines for seating design, and requirements for the handicapped and elderly. Men, women, and children; large and small; are represented. Measurements are given in metric as well as English units. Engineers, architects, industrial designers, planners, interior and furniture

designers, and craftsmen will find that the selectors minimize their searching through numerous and conflicting sources and unreliable information. The Humanscale materials are not a panacea, of course. More detailed studies dealing with interior space, safety, human strength and movement, displays, vision, reach, and controls should also be consulted. The selectors should be used in a creative way, and models and mock-ups based on the data should be tried out with the intended users.
