*Doing Business 2010*  
Commonwealth  
Secretariat  
Digital technologies are  
spreading rapidly, but  
digital dividends--the  
broader benefits of faster

growth, more jobs, and  
better services--are not. If  
more than 40 percent of  
adults in East Africa pay  
their utility bills using a  
mobile phone, why can't  
others around the world  
do the same? If 8 million  
entrepreneurs in China--  
one third of them women--  
can use an e-commerce  
platform to export goods

to 120 countries, why  
can't entrepreneurs  
elsewhere achieve the  
same global reach? And if  
India can provide unique  
digital identification to 1  
billion people in five  
years, and thereby reduce  
corruption by billions of  
dollars, why can't other  
countries replicate its  
success? Indeed, what's

holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory

uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable

workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should

create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

### **Achieving Excellence Through Customer**

World Bank Publications

This 2019 Article IV Consultation with Namibia discusses that with the temporary stimuli now ended, the economy is rebalancing while the government is implementing a significant

fiscal consolidation. A likely slow recovery, the need for further fiscal adjustment to bring public debt to a sustainable path, persistent inequalities and structural impediments to growth, point to a challenging outlook. Immediate measures are needed to deliver the authorities' fiscal adjustment plans and bring public debt to a sustainable path. Policies should combine spending reductions and revenue increases that support long-term growth. Better targeting of cash transfers

would protect the poor. Structural reforms are urgently needed to strengthen productivity and external competitiveness and boost long-term growth. Reforms should streamline business regulations, contain public sector wage dynamics, and reduce costs of key production inputs. Over time, it is important to remove non-tariff barriers to exports, foster the adoption of new technologies, and address shortages of skilled workers.

The growth of the global knowledge economy is transforming the demands of the labour market in economies worldwide. It will require workers to develop new skills and knowledge, whilst education systems will need to adapt to the challenges of lifelong learning, and these changes will be as crucial in transition and developing economies as it is in the developed world. This publication explores how lifelong

learning systems can encourage growth, discusses the changing nature of learning and the expanding role of the private sector in education, and considers the policy and financing options available to governments to address the challenges of the global knowledge economy.

**World Development Report 2016** World Bank Publications  
Financial disclosure systems are a vital component of transparency. By now 161

countries around the world have introduced financial disclosure systems, becoming commonplace around the world. But, although the rules are on the books, many practitioners are still struggling with the intricacies of the rules and how to implement them in the socioeconomic, historical, and legal context of their own country. Little guidance is available to assist them. This book aims to fill that void and provide practitioners with practical scenarios to

consider before deciding on a particular course of action. This book contains short chapters that elaborate each topic and provide clear guidance on the issues that policy makers and those involved in the implementation of financial disclosure obligations will need to take into account before making a decision. How do you decide who should file? And how often? Online or in hard copy? And what exactly? Everything they own directly—or also those apartments they

own indirectly? How should information in declarations be checked? Should it be shared with public? How accessible should it be? This is the sort of practical guidance that this book aims to provide.

*The Economist* Org. for Economic Cooperation & Development  
The Information and Communications for Development series looks in depth at how information and communications technologies are affecting economic growth in

developing countries. This new report, the fourth in the series, examines the topic of data-driven development, or how better information makes for better policies. The objective is to assist developing-country firms and governments in unlocking the value of the data they hold for better service delivery and decision making and to empower individuals to take more control of their personal data. We are undoubtedly experiencing a data revolution in which our ability to generate,

process, and utilize information has been magnified many times over by the machines that we increasingly rely upon. This report is about how the data revolution is changing the behavior of governments, individuals, and firms and how these changes affect the nature of development: economic, social, and cultural. How can governments extract value from data to improve service delivery in the same way that private companies have learned to do for profit? Is

it feasible for individuals to take ownership of their own data and to use it to improve their livelihoods and quality of life? Can developing-country firms compete with the internet majors on their own turf and be even more innovative in their use of data to serve local customers better? Though the report is aimed primarily at government policy makers, it also has great relevance for individuals concerned about how their personal data is used and how the data revolution might

affect their future job prospects. For private sector firms, particularly those in developing countries, the report suggests how they might expand their markets and improve their competitive edge. For development professionals, the report provides guidance on how they might use data more creatively to tackle long-standing global challenges, such as eliminating extreme poverty, promoting shared prosperity, or mitigating the effects of climate change. The

report's chapters explore different themes associated with the supply of data, the technology underlying it, and the demand for it. An overview chapter focuses on government use of data and presentation of definitions. Part I of the report then looks at the "supply side" of the data sector, with chapters on data connectivity and capacity (where data comes from, how it is stored, and where it goes) and data technology (specifically big data analytics and artificial

intelligence) and how this is contributing to development. Part II looks at the sector's "demand side," with a chapter on people's use of data and another that examines how firms use digital platforms in the data economy and how that contributes to competitiveness. Part III brings together the policy implications for developing-country stakeholders, with a chapter considering government policies for data, including data protection and privacy. A

closing Data Notes appendix looks at statistical indicators associated with the use of data and presents the 2018 update of the Digital Adoption Index (DAI), a composite indicator introduced in the 2016 World Development Report: Digital Dividends.

The publication is an international standard on the design and operation of an efficient and accurate vital statistics system at national level. It provides guidelines on collection, compiling and disseminating vital statistics. More

specifically it contains (a) basic principles for a vital statistics system; (b) uses of vital statistics and civil registration records; (c) topics to be covered in a vital statistics system; (d) sources of vital statistics and how they function; (e) quality assurance in the vital statistics system and (f) strategies in improving civil registration and vital statistics systems in countries. It also informs policy makers and the general public on the importance of vital statistics and hence further improving the vital

statistics system.  
*Hong Kong's Tortuous Democratization* MIT Press  
 The UN E-Government Survey 2008: From E-Government to Connected Governance assesses the e-government readiness of the 192 Member States of the UN according to a quantitative composite index of e-readiness based on website assessment, telecommunication infrastructure, and human resource endowment. ICTs can help reinvent government in such a way that existing institutional

arrangements can be restructured and new innovative arrangements can flourish, paving the way for a transformed government. The focus of the report this year, in Part 2, is e-government initiatives directed at improving operational efficiency through the integration of back-office functions. Whilst such initiatives, if successful, will deliver benefits to citizens, the primary purpose is to improve the effectiveness of government and governmental agencies.

Models of back-office integration, irrespective of the delivery mode, fall into three broad categories: single function integration, cross functional integration, and back-office to front-office integration. The level of complexity, expressed in terms of the number of functions within the scope and number of organizations involved, is the primary factor influencing a successful outcome - with a tendency amongst the more ambitious projects to fail to deliver the full

anticipated benefits. The key variables involved in the delivery of back-office integration are the people, processes and technology required. Whilst the technology is increasingly resilient and 'fit for purpose', the evidence indicates that success or failure is less a technological issue and more a people issue - in particular, the ability to change public service cultures and motivate public sector workers to new ways of working, address trade union concerns, and provide

adequately skilled and competent management

 AFRICAN SUN MeDIA  
 Who you hire defines everything, from business success down to who you are as a leader. That's why hiring top talent is the #1 priority of most CEOs, and yet, studies show that the majority don't believe they recruit highly talented people. As the talent economy continues to evolve, CEOs need to adapt the way they compete for talent in

order to keep up. As a current SaaS CEO and former recruiter, Jerome Ternynck packs 30 years of learnings and differentiated recruiting strategies into Hiring Success to provide CEOs a future-ready perspective for talent. You'll walk away with the ability to attract, select, and hire the best talent at a global scale on demand--leading to hiring success now and in the future.

 Incorporating the most

recent data available for 2002, this report analyses current labour market trends and examines the impact of the global economic downturn and post 11 September developments upon different world regions. Covering Latin America and the Caribbean, East Asia, South East Asia, the Middle East and North Africa and sub-Saharan Africa, the transition economies and industrial countries, it focuses on the distinct labour market characteristics and challenges faced by each

region and economic group. It also traces factors contributing to the global employment decline, such as the increase in informal sector employment, the decrease in employment in information and communication technology, as well as extensive jobs losses in the travel and tourism industries and the export and labour-intensive manufacturing sectors. *Service strategy* United Nations Publications  
The Survey assesses global and regional e-

government development through a comparative rating of national government portals relative to one another. It is designed to provide a snapshot of country trends and relative rankings of e-government development in the implementation of the Sustainable Development Goals. It presents trends and relative rankings of e-government development across 193 Member States through a quantitative composite index, the E-Government Development Index

(EGDI), with three separate components - the Online Service Index (OSI), Telecommunication Infrastructure Index (TII), and Human Capital Index (HCI). Includes addendum on COVID-19 (coronavirus) response [United Nations E-Government Survey 2014](#) International Monetary Fund  
The desire exists within Governments to provide for those who are on the fringes of society. Therefore, indigenous approaches seem relevant in the redistribution of

resources among citizens. This book is therefore not only essential, but also timely. Indigenous Social Security Systems in Southern and West Africa (ISSS) contributes to human service literature for Africa, Southern Africa and West Africa in particular. The richness of the book lies within the variety of contributions that encourage its origin. The book's value is extensive and captures many essential and current topics that have an appeal to academicians,

policy makers, analysts and practitioners in the field of social welfare and social security. Ultimately, the book serves as a pragmatic and expedient tool for human service practitioners and any enthusiast of social security systems.

Org. for Economic Cooperation & Development  
Tourism and the Lodging Sector is a pioneering book, the first text of its kind to examine the lodging sector from a tourism perspective. The book highlights the importance of the lodging sector in tourism as a major income generator and essential part of the travel experience. The book offers an international perspective on topics such as

sustainability, security, economic development, technology and globalization. The issues, concepts and management concerns facing this industry are examined, highlighting important topics such as: the place of accommodations in tourism and vice versa the social ecological and economic implications of lodging development management and restructuring issues in a globalizing industry sustainable tourism and the accommodation

sector cross-sectoral linkages between lodging, food services, gaming, conferences, and other intermediaries the interaction between supply and demand safety and security in tourism and lodging. Tourism and the Lodging Sector critically examines a wide range of lodging establishments from an industry and social science perspective, drawing parallels and distinctions between the various types of accommodation, from campgrounds for the cost-

conscious or adventurous outdoor traveler, to luxury, five-star resorts, and more innovative accommodation such as tree-house hotels and ecolodges. Essential reading for students of tourism, this book is an indispensable guide, unprecedented in the field of tourism management. Dallen J. Key Principles of Public Sector Reforms contains case studies from Cameroon, Ghana, Grenada, India, Kenya, Rwanda, St Vincent and the Grenadines, Saint Lucia, Seychelles, South Africa, Tanzania and Trinidad and Tobago on the policy reforms, strategies and methodologies that support national priorities and greater policy coherence for sustained development and growth. *Namibia* Information and Communications

This publication provides guidance for designing and implementing radiotherapy programmes, taking into account clinical, medical physics, radiation protection and safety aspects. It reflects current requirements for radiotherapy infrastructure in settings with limited resources. It will be of use to professionals involved in the development, implementation and management of radiotherapy programmes

E-Government for Good

Governance in Developing Countries World Bank Publications

Equal rights between men and women are enshrined as a fundamental human right in the UN Charter, and reflected in various internationally agreed instruments, such as the 1979 Convention on the Elimination of All Forms of Discrimination against Women and the 1995 Beijing Declaration and Platform for Action. Although there has been notable progress in some areas, in most nations women are still at a

disadvantage in terms of their role and position in the economic and political arenas. This publication examines the gender dimension of trade and seeks to identify policy challenges and responses to promote gender equality in light of increasing globalisation. Issues discussed include: economics of gender equality, international trade and development; multilateral negotiations on agriculture in developing countries; gender-related issues in the textiles and clothing

sectors; international trade in services; gender and the TRIPS Agreement; the impact of WTO rules on gender equality; human rights aspects; fair	trade initiatives; the role of IT in promoting gender equality, the Gender Trade Impact Assessment and trade reform. <u>Trade and Gender World</u>	Bank Publications Namibia Vision 2030 presents a clear view of where we are, where we want to go from here, and over what time frame.
