[World War II Partisan Warfare in Italy](#)
 Bloomsbury Publishing
 The first two volumes of this definitive history of German armor are now available in English! Known for its emphasis on detail, the Spielberger series shows in factory, test and combat photographs, and detailed line drawings, all production models, prototypes and modifications of specific armor and military vehicles. Volume I covers all variations of the "Panther" tanks, including all vehicles that used the Panther chassis. Volume II on the Sturmgeschutz assault guns, shows all short and long gun versions, as well as the various support vehicles of the Sturmartillerie. Upcoming volumes include: Volume III on the Panzer IV, and

Volume IV and the Panzer III.
Labour Market Trends Schiffer Pub Limited
 Author Mike Green provides new insights into the creation and ultimate failure of the German Panther tank. In most people's opinion, the German Panther tank was the most elegant tank design of World War II. It embodied a balance of firepower, armor protection, and mobility unmatched by any other tank of the period. Yet, it was not the war-winner it might have been. Author Mike Green examines the disparity between the potential of the Panther design and the actuality of the fielded Panther tank in this book. Though many viewed the Panther as an engineering masterpiece and a technological breakthrough, it failed to meet expectations on the battlefield, and thus proved a major setback to Hitler's dreams of world domination. Green explores the evolution, and devolution, of the Panther,

providing keen insight and new reasons for its ultimate failure.
[Tiger I & Tiger II](#) Bloomsbury Publishing
 The Global Industrial Complex: Systems of Domination is a groundbreaking collection of essays by a diverse set of leading scholars who examine the entangled and evolving global array of corporate-state structures of hegemonic power--what the editors refer to as "the power complex"--that was first analyzed by C. Wright Mills in his 1956 classic work, *The Power Elite*. In this new volume edited by Steven Best, Richard Kahn, Anthony J. Nocella II, and Peter McLaren, the power complex is conceived as co-constituted, interdependent and imbricated systems of domination. Spreading insidiously on a global level, the transnational institutional relationships of the power complex combine the logics of capitalist exploitation and profits and industrialist

norms of efficiency, control, and mass production, While some have begun to analyze these institutional complexes as separate entities, this book is unique in analyzing them as overlapping, mutually-enforcing systems that operate globally and which will undoubtedly frame the macro-narrative of the 21st century (and perhaps beyond). The global industrial complex--a grand power complex of complexes--thus poses one of the most formidable challenges to the sustainability of planetary democracy, freedom and peace today. But there can be no serious talk of opposition to it until it is more popularly named and understood. The Global Industrial Complex aims to be a foundational contribution to this emerging educational and political project.

Panther vs T-34 Presidio Press

This book illustrates the history and US military service of this weapon system from its advent in the early 1950s through the first Gulf War. Widely used in Vietnam, where it had the longest range of any land-based artillery, the M107 and M110 series of vehicles, formed the backbone of US self-propelled artillery.

M107/M110 Afv Modeller

This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World War II from Somaliland to Japan. A nation-by-nation overview of each country's development of tanks and their involvement in World War II is before providing an A-Z of each army's tanks and fighting vehicles including armoured cars, personnel carriers, amphibious craft and mortar carriers. Quirker profiles of vehicles such as the German TKS tankette are given.

Imagine Design Create iUniverse

The second volume in The Panther Project series detailing the incredible restoration being carried out on a Panther Ausf. A in the workshops of the Wheatcroft Collection. This volume comprises 208 pages, covers the period 2009-2018, and concentrates on the restoration of the Turret and its contents, the Maybach 230 P30 engine, and various components of the cooling and fuel systems. It contains 440 photographs and 12 A4 color diagrams, including 45 pre-restoration images, and a wartime history.

The Military Balance 2021 Pen and Sword

A revised and updated single-source reference book accurately detailing the German field forces employed in Normandy in 1944 and their losses. In this book, military historian Dr. Niklas Zetterling provides a sobering analysis of the subject matter and debunks a number of popular myths concerning the

Normandy campaign—the effectiveness of Allied air power; the preferential treatment of Waffen-SS formations in comparison to their army counterparts; etc. He supports his text with exhaustive footnoting and provides an organizational chart for most of the formations covered in the book. Also included are numerous organizational diagrams, charts, tables, and graphs. “A valuable reference for anyone seriously interested in the battle for Normandy.”

—The NYMAS Review

Armored Champion Elderberry Press

Ian Gooderson presents a study of close air support in World War II, with the analysis focusing on the use of tactical air power by British and American forces during the campaigns in Italy and northwestern Europe between 1943 and 1945.

For Want of a Gun Schiffer Military History

This remarkable story exposes the Sherman tank scandal of World War II, involving some of the biggest American names and stretching from the White House and Pentagon to factories and battlefronts. Outgunned by more powerful German opponents, the inferiority of American tanks led to some of the worst setbacks of the war, prolonging it in Europe. US tankers ultimately prevailed, but over 60,000 armored division soldiers were killed and wounded; their preventable sacrifice inspired the Hollywood movie *Fury*. Included are striking images of the Sherman's adversaries (photographed exclusively at the National Museum of Cavalry and Armor), along with original equipment, documents, period propaganda, and vintage photos of Sherman tanks in action. As a German officer noted, "I was on this hill with six 88mm antitank guns...Every time they sent a tank, we knocked it out. Finally we ran out of ammunition, and the Americans didn't run out of tanks."

Patton's Juggernaut: The Rolling 8-Ball 8th Tank Battalion of the 4th Armored Division Routledge

A pictorial history and analysis of the infamous World War II German tanks. The German Tiger I and Tiger II (known to the Allies as the King Tiger or Royal Tiger) were the most famous and formidable heavy tanks of the Second World War. In their day, their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the myths that have grown up around them. The Tigers were over-

engineered, required raw materials that were in short supply, and were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting on the Western and Eastern fronts. Yet the myth of the Tigers, with their 88mm guns, thick armor, and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of color plates showing the main variants of the designs and the common ancillary equipment and unit markings. His book is an essential work of reference for enthusiasts.

PANTHER External Appearance & Design Changes Gallantry

This step by step guide shows how to build, correct, detail and finish the impressive 1:16 Trumpeter Jagdtiger kit and also provides unique interior reference photos of one of the three remaining preserved vehicles.

Theory of Ground Vehicles Afv Modeller

When Italy surrendered in 1943, it sparked a resistance movement of anti-German, anti-fascist partisans. This book explores the tactics, organizational structure and equipment of the brave Italian resistance fighters. Beginning with low-level sabotage and assassinations, the groups continued to grow until spring 1944 when a remarkable, unified partisan command structure was created. Working in close co-ordination with the Allies, they received British SOE and American OSS liaison teams as well as supplies of weapons. The German response was ferocious, and in autumn 1944, as the Allied advance stalled, the SS and Italian RSI looked to eradicate the partisans once and for all. But when the Allies made their final breakthrough in the last weeks of the war the partisans rose again to exact their revenge on the retreating Wehrmacht. From an expert on Italian military history in World War II, this work provides a comprehensive guide to the men and women who fought a desperate struggle against occupation, as well as the German and Italian fascist security forces unleashed against them.

Kursk 1943 Osprey Publishing

This is the biography, not of an individual but of a small military unit, the 8th Tank Battalion, 4th Armored Division (1943-1946). Combat with the German Army was the destiny of this Battalion. Nothing in my long, full life could compare

with the priceless opportunity that I had to command the men of the 8th Tank Battalion. This is their story.

John Wiley & Sons

The market's most comprehensive guide to German combat vehicles. The Complete Guide to German Armored Vehicles is an encyclopedia of all the armored vehicles used by the Nazis in World War II. At over four hundred pages and with over six hundred photos, many of which never before seen by the public, this volume becomes the market's most comprehensive on the subject. David Doyle, award-winning author of dozens of books on the subject, provides mechanical information, photos, and usage history for:

- Armored cars • Half-tracks • Tanks • Assault guns • Jagdpanzers • Panzerjagers • Self-propelled guns, howitzers, and mortars • Flakwagens • Flammpanzers • Recovery vehicles • Armored Engineer vehicles

An encyclopedic resource by an authority on the subject, The Complete Guide to Armored Vehicles is a must-have for modelers, gamers, and WWII buffs alike.

Defence Industrial Strategy Lexington Books

Armor expert Zaloga enters the battle over the best tanks of World War II with this heavy-caliber blast of a book armed with more than forty years of research.

- Provocative but fact-based rankings of the tanks that fought the Second World War
- Breaks the war into eight periods and declares Tanker's Choice and Commander's Choice for each
- Champions include the German Panzer IV and Tiger, Soviet T-34, American Pershing, and a few surprises
- Compares tanks' firepower, armor protection, and mobility as well as dependability, affordability, tactics, training, and overall combat performance
- Relies on extensive documentation from archives, government studies, and published sources—much of which has never been published in English before
- Supported by dozens of charts and diagrams and hundreds of photos

"Ironsides" Simon and Schuster Limited edition, only 2000 copies. Only 2000 copies of this 286 page book will be published worldwide making the Panther Book a "must have" for lovers of history. Authors Roddy Macdougall and Martin Block, with the assistance of Panzer Tracks team bring the most comprehensive study of the formidable Panther tank to date. More than ten years of preparation have gone into this book; There are interviews

Normandy 1944 Afv Modeller

Hero of the Soviet Union Dmitriy Loza has carefully crafted his World War II experiences with U.S.-provided Sherman tanks into a highly readable memoir. Between the fall of 1943 and August 1945, Loza fought in the Ukraine, Romania, Hungary, Czechoslovakia, and Austria. He commanded a tank battalion during much of this period and had three Shermans shot out from under him. Loza's unit participated in such well-known combat actions as the Korsun-Shevchenkivskiy Operation, the Jassy-Kishinev Operation, and the battles for Budapest, Vienna, and Prague. Following the German surrender, Loza's unit was sent to Mongolia, where it participated in the arduous trek across the Gobi Desert to attack the Japanese Kwantung Army in Manchuria. This is the first available detailed examination of the Red Army's exploitation of U.S. war materiel during World War II and one of the first genuine memoirs available from the Russian front. Loza also provides firsthand testimony on tactical command decisions, group objectives and how they were accomplished, and Soviet use of combat equipment and intelligence. Only after the collapse of the USSR and concomitant relaxing of prohibitions against publication of materials related to the Lend-Lease Program there could this account be made available. Dmitriy Loza served as an instructor at the Frunze Academy after the war, retiring in 1967 with the rank of colonel. He resides in Moscow. James F. Gebhardt, now a defense contractor at Fort Leavenworth, is a Vietnam veteran. He is the author of Blood on the Shores: Soviet Naval Commandos in World War II.

Commanding the Red Army's Sherman Tanks Pen and Sword

"An encyclopaedic, four-volume work on every aircraft type proposed, designed, or manufactured in Australia, from Lawrence Hargrave's experiments in the 1880's, through to the authors self-imposed cutoff point in the mid-1980's. The four-volume work lists over 540 aircraft types as well as detailed histories of the companies involved in their construction. Coverage is multi-faceted, being technical, operational, historical, industrial, and political. Along with the text is the most comprehensive collection of photographs, technical drawings, and diagrams yet assembled into the one reference work, many of which have never before been seen outside the original source. Exhaustively researched over the past 40 years by the well-known aviation personality Keith Meggs, a man uniquely placed to write on all aspects of Australian aviation from construction through to operational flight. All volumes are superbly indexed and cross-referenced with the main text reinforced by extensive and detailed endnotes. Aircraft enthusiasts, pilots, aeronautical engineers, manufacturers, industrialists, universities, and other technical institutions, "Australian-built aircraft and the industry" is a must have for your reference library. In Volume One the fourteen chapters cover the following activities: Hargrave, Taylor, the Commonwealth Prize, Early Experimenters, Duigan, WWI Activity, AA&ECo, 1924 Lightplane Competition, LASCo, QANTAS, WAA, RAAF Randwick, Individual Builders 1918-1939, AMSCo, MSB, Matthews Aviation, General Aircraft Co, Cockatoo Dockyard, Tugan Aircraft, Harkness & Hillier, De Havilland (Aust) - part 1, Industry proposals, and other snippets."--Provided by publisher.

M3 Lee Grant Afv Modeller

The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.
