This book presents one of the first systematic assessments of aesthetic insights into world politics. It examines the nature of aesthetic approaches and outlines how they differ from traditional analysis of politics. The book explores the potential and limits of aesthetics through a series of case studies on language and poetics.

Embodied experience and sensorial understandings in Western music The Western history of aesthetics is characterised by tension between theory and practice. Musicians listen, play, and then listen more profoundly in order to play differently, adapt the body, and sense the environment. They become deeply involved in the sensorial qualities of music practice. Artistic practice refers to the original meaning of aesthetics—the senses. Whereas Baumgarten and

Goethe explored the relationship between sensibility and reason, sensation and thinking, later philosophers of aesthetics deemed the sensorial to be confused and unreliable and instead prioritised a cognitive or objective approach. Written by authors from the fields of philosophy, composition, performance, and artistic practice, *Sensorial Aesthetics in Music Practices* repositions aesthetics as a domain of the sensible and explores the interaction between artists, life, and environment. Aesthetics becomes a field of sensorial and embodied experience involving temporal and spatial influences, implicit knowledge, and human characteristics. Contributors: Kathleen Coessens (Koninklijk Conservatorium Brussel, Orpheus Institute), Tim Ingold (University of Aberdeen), Michaël Levinas (Conservatoire National Supérieur de Musique de Paris), Fabien Lévy (Hochschule für Musik Detmold), Lasse Thoresen (Norwegian Academy of Music), Vanessa Tomlinson (Queensland Conservatorium of Music), Salomé Voegelin (University of the Arts London)

We do politics in, through, and as bodies. All our political activity is inevitably corporeal. Parliamentary debates, party assemblies, street demonstrations, and civil disobedience are all

bodily actions. Political regimes maintain their power by controlling our bodies, both through explicit acts of violence and, more insidiously, by inculcating somatic norms of obedience to the political authorities and ideologies. This oppression can be effectively challenged if we use somaesthetics to identify and examine the bodily habits and feelings that express and reinforce such domination. Somaesthetically explored, they can be refashioned and help overcome the oppressive social conditions that produce them.

'The Oxford Handbook of Aesthetics' has assembled 48 brand-new essays, making this a comprehensive guide available to the theory, application, history, and future of the field. *Aesthetics and World Politics* Apollo Books

This book contains six chapters covering key areas of musical aesthetics, including aesthetics of emotions; aesthetics of listening; aesthetics of performance; aesthetics of composition; aesthetics of nature; and aesthetics of commerce. Each chapter adopts an experiential approach to aesthetics, in which perceptual and intuitive musical responses - real-time experiences - are

valued as a source of truth. Unlike intellectual aesthetics, which values conscious associations and meticulous artistic appraisals, experiential aesthetics looks primarily at everyday subconscious appreciations. The explorations here draw from the social sciences, hard sciences, philosophy, literature, theology, musicology, humanities, and other fields that directly or indirectly contribute to an understanding of our attraction to music. Presenting user-friendly distillations of numerous theories, concepts, and functions, this book will be of interest to both lay readers and expert practitioners.

Critical Communities and Aesthetic Practices brings together eminent international philosophers to discuss the inter-dependence of critical communities and aesthetic practices. Their contributions share a hermeneutical commitment to dialogue, both as a model for critique and as a generator of community. Two conclusions emerge: The first is that one's relationships with others will always be central in determining the social, political, and artistic forms that philosophical self-reflection will take. The second is that our practices of aesthetic judgment are bound up with our efforts as philosophers to adapt ourselves and our objects of interest to the inescapably historical and indeterminate conditions of experience. The papers collected here address the issue that critical communities and aesthetic practices are never politically neutral and can never be abstracted from their particular contexts. It is for this reason that the contributors investigate the politics, not of laws, parties or state constitutions, but of open, indefinitely critical communities such as audiences, peers and friends. Critical Communities and Aesthetic Practices is distinctive in providing a current selection of prominent positions, written for this volume. Together, these comprise a pluralist, un-homogenized collection that brings into focus contemporary debates on critical and aesthetic practices.

Comparative aesthetics is the branch of philosophy which compares the aesthetic concepts and practices of different cultures. The way in which the various cultures of the world conceive of the aesthetic dimension of life in general and art in particular is revelatory of profound attitudes and beliefs which themselves make up an important part of the culture in question. This anthology consists of entirely new essays by some of the leading, internationally recognised scholars in the field. The subjects addressed include the influence of Upanishadic thought on the classic Indian tradition in aesthetics and the way in which that tradition continues to have relevance to issues discussed today; how Buddhist thought in general and Zen in particular shape aesthetic attitudes in Japanese culture; how Confucianism affected not only the morality but also the classical aesthetics of China; how different ideas of the self and of human nature affect artistic training and practice in different cultures; how feminism can draw inspiration from classic non-European lines of thought in the area of aesthetics, and how different attitudes to nature underpin a whole range of aesthetic beliefs and attitudes in western and eastern thought. These ideas reveal both deep differences and deep similarities between east and west. No-one seeking to understand the cultures discussed in these essays can ignore their aesthetic dimension, which often holds the key to understanding the deepest motives which have formed them.

The appreciation of nature and natural beauty demands our attention as environmental issues become ever more urgent. In this timely introduction, Glenn Parsons provides an overview of philosophical work on the aesthetics of nature, identifying key conceptual questions, clarifying central theories, and analyzing the ethical ramifications of our experience of natural beauty. Outlining five major approaches to understanding the aesthetic value of nature, this second edition explores the aesthetic appreciation of nature as it occurs in wilderness, in gardens, and in the context of appreciating environmental art. Now updated to cover recent developments in the field, it includes: · A new chapter on the sublime, the picturesque, and the beautiful · Expanded discussion of empirical and evolutionary accounts of nature appreciation, as well as the appreciation of the environment in non-Western cultures · A new chapter on the aesthetic appreciation of animals · An in-depth analysis of the appreciation of nature through cinema and photography · Discussion of the relation between environmental appreciation and climate change Combining a clear and engaging style with a sophisticated treatment of a fascinating subject, *Aesthetics and Nature* explores the aesthetic dimension of humanity's relationship with our physical surroundings. This a must-read for anyone who cares about nature and the future of our environment.

This new collection of essays seeks to focus on three areas where television has recently been in an intriguing state of flux. Taking as our background the emergence of multimedia conglomerates and cash-rich cable channels, we look at the way old national terrestrial channels and the brash new internationally commercialized ones have innovated in the domain of television programming. In all there are fourteen original essays, an introduction to the book's theme by the editor and a foreword by Professor Annette Hill. Section one "Realizing the Real" looks at contemporary patterns of television consumption and the presentational styles which package the real in news, current affairs and other 'live' television formats. Essays on rhetorical strategies in the news coverage of the war in Iraq, on national and international inflections of Sky News in Europe and coverage of the recent EURO2004 football tournament, as well the multi-channel reporting of a prominent paedophilia scandal, are presented in this section. They all analyse the extent to which the grounded and the local are threatened and distorted by hegemonic forces in media today. The findings of a comprehensive new study of Portuguese social practices and viewing habits are also featured in this section. Section Two "Realizing Performance" addresses the way new trends in reality programming and other documentary practices have impacted on fiction and entertainment television. There are essays on the recent wave of British television comedy heavily influenced by TV newsmagazine and fly-on-the-wall documentary styles and two pieces on new American series, 24 and CSI, which have revolutionized the narrative parameters and evidential base for thrillers and cop shows respectively, coming up with new ways to 'perform' space, time and science. Finally there is an essay on Nigel Kneale's *The Year of the Sex Olympics* (1968), a survivor from the era of the single play who seems to anticipate the future of television in reality-based gameshow-style entertainment. Each of these essays shows that the success of these programmes is dependent on a fresh restylization of the conventions and formulas which govern mainstream television programming. They therefore see the representation of the real in fiction as primarily an aesthetic reappraisal. Section Three "Performing the Real" looks at the explosion in reality television programming itself. It focuses on the coming to pass of 70s and 80s theorists' visions of both a passive voyeuristic society and one increasingly at peace with the notion of surveillance. We have been progressively acculturated to watching and being watched. Orwellian anxiety has given way to Baudrillardian acceptance of the message and the medium fused in a new order of mediated reality or hyperreality. Essays refer specifically to the globalization of shows and formats and their local inflections and to coverage of reality shows in print media and on the net. There are essays on *The Bachelor* and gender stereotyping, *Joe Millionaire* and the conventions of melodrama, and two on *Big Brother*, one on the problems of communication within a sealed environment and another on its reception in Portugal. Concerns about the self and its authenticity are consistency raised in all the essays of this section.

Although Film Studies has successfully (re)turned attention to matters of style and interpretation, its sibling discipline has left the territory uncharted - until now. The question of how television operates on a stylistic level has been critically underexplored, despite being fundamental to our viewing experience. This significant new work redresses a vital gap in Television Studies by engaging with the stylistic dynamics of TV; exploring the aesthetic properties and values of both the medium and particular types of output (specific programmes); and raising important questions about the way we judge television as both cultural artifact and art form. *Television Aesthetics and Style* provides a unique and vital intervention in the field, raising key questions about television's artistic properties and possibilities. Through a series of case-studies by internationally renowned scholars, the collection takes a radical step forward in understanding TV's stylistic achievements.

*Mono no Aware* and *Gender as Affect* in Japanese Aesthetics and American Pragmatism argues that gender is best understood as a felt sense of the organization of the human body. Through Japanese aesthetics and American pragmatism, this book argues that re-understanding gender as an affect, or a feeling, can expand the ways that gender is understood, enacted, and theorized in experience.

For decades, aesthetics has been subjected to a variety of critiques, often concerning its treatment of beauty or the autonomy of art. Collectively, these complaints have generated an anti-aesthetic stance prevalent in the contemporary art world. Yet if we examine the motivations for these critiques, Michael Kelly argues, we find theorists and artists hungering for a new kind of aesthetics, one better calibrated to contemporary art and its moral and political demands. Following an analysis of the work of Stanley Cavell, Arthur Danto, Umberto Eco, Susan Sontag, and other philosophers of the 1960s who made aesthetics more responsive to contemporary art, Kelly considers Sontag's aesthetics in greater detail. In *On Photography* (1977), she argues that a photograph of a person who is suffering only aestheticizes the suffering for the viewer's pleasure, yet she insists in *Regarding the Pain of Others* (2003) that such a photograph can have a sustainable moral-political effect precisely because of its aesthetics. Kelly considers this dramatic change to be symptomatic of a cultural shift in our understanding of aesthetics, ethics, and politics. He discusses these issues in connection with Gerhard Richter's and Doris Salcedo's art, chosen because it is often identified with the anti-aesthetic, even though it is clearly aesthetic. Focusing first on Richter's Baader-Meinhof series, Kelly concludes with Salcedo's enactments of suffering caused by social injustice. Throughout *A Hunger for Aesthetics*, he reveals the place of critique in contemporary art, which, if we understand aesthetics as critique, confirms that it is integral to art. Meeting the demand for aesthetics voiced by many who participate in art, Kelly advocates for a critical aesthetics that confirms the power of art.

Exporting Japanese Aesthetics brings together historical and contemporary case studies addressing the evolution of international impacts and influences of Japanese culture and aesthetics. The volume draws on a wide range of examples from a multidisciplinary team of scholars exploring transnational, regional and global contexts. Studies include the impact of

traditional Japanese theatre and art through to the global popularity of contemporary anime and manga. Under the banner of soft power or Cool Japan, cultural commodities that originate in Japan have manifested new meanings outside Japan. By (re)mapping meanings of selected Japanese cultural forms, this volume offers an in-depth examination of how various aspects of Japanese aesthetics have evolved as exportable commodities, the motivations behind this diffusion, and the extent to which the process of diffusion has been the result of strategic planning. Each chapter presents a case study that explores perspectives that situate Japanese aesthetics within a wide-ranging field of inquiry including performance, tourism, and visual arts, as well as providing historical contexts. The importance of interrogating the export of Japanese aesthetics is validated at the highest levels of government, which formed the Office of Cool Japan in 2010, and which perhaps originated in the 19th century at governmentally endorsed cultural courts at world fairs. Increased international consumption of contemporary Japanese culture provides a much needed boost to Japan's weakening economy. The case studies are timely and topical. As host of the 2020/2021 Tokyo Olympic Games and the 2025 Osaka Expo, Cool Japan will be under special scrutiny.

Ludwig Gotthard (Theobul) Kosegarten (1758-1818), whose books were burned by German nationalists in 1817, has for many years been seen as a pariah figure by German literary scholars. Only recently has his influence on cultural icons such as the composer Franz Schubert and the painter Caspar David Friedrich become more clearly defined. This companion volume to Lewis M. Holmes's *Kosegarten: The Turbulent Life and Times of a Northern German Poet* (Peter Lang, 2004) explores Kosegarten's contributions to aesthetics, theology, and literature, as well as the broad reception of his works by other writers, artists, and musicians. Extensive historical and cultural contextualization make Kosegarten's Cultural Legacy a valuable resource for university-level courses, especially in the areas of music, art, religion, and literature.
