### **Leadership Development for Interprofessional Education and Collaborative Practice** BRILL

This book discusses the developments in policy and practice in the field of formal, non-formal and continuing vocational education and training in Spain since 1970. It describes how VET has been transformed and become one of the country's main areas of pedagogical innovation, and also examines current developments, such as the role of non-formal vocational education and training, the accreditation of vocational qualifications acquired in the non-formal system, and the adoption of dual apprenticeships that bear little resemblance to central European dual systems. Written by respected researchers in these fields, the first section is informative and analytical, offering a description of the system and comments based on academic literature and research. The second section illustrates the research on relevant issues, portraying empirical data from different regions in Spain, as well as nationwide data. Explaining and interpreting data on the basis of the authors' different theoretical frameworks, the book provides a comprehensive, updated and accurate overview of VET and relevant research in Spain, as well as their relation to European and global developments.

The Constitution of Kenya: Contemporary Readings IGI Global  
The emergence of artificial intelligence has created a vast amount of advancements within various professional sectors and has transformed the way organizations conduct themselves. The implementation of intelligent systems has assisted with developing traditional processes including decision making, risk management, and security. An area that requires significant attention and research is how these companies are becoming accustomed to computer intelligence and applying this technology to their everyday practices. Transdisciplinary Perspectives on Risk Management and Cyber Intelligence is a

pivotal reference source that provides vital research on the application of intelligent systems within various professional sectors as well as the exploration of theories and empirical findings. While highlighting topics such as decision making, cognitive science, and knowledge management, this publication explores the management of risk and uncertainty using training exercises, as well as the development of managerial intelligence competency. This book is ideally designed for practitioners, educators, researchers, policymakers, managers, developers, analysts, politicians, and students seeking current research on modern approaches to the analysis and performance of cyber intelligence.

Impacts of Globalization and Innovation in Mathematics Education CRC Press

Clinical legal education (CLE) is potentially the major disruptor of traditional law schools' core functions. Good CLE challenges many central clichés of conventional learning in law—everything from case book method to the 50-minute lecture. And it can challenge a contemporary overemphasis on screen-based learning, particularly when those screens only provide information and require no interaction. Australian Clinical Legal Education comes out of a thorough research program and offers the essential guidebook for anyone seeking to design and redesign accountable legal education; that is, education that does not just transform the learner, but also inculcates in future lawyers a compassion for and service of those whom the law ought to serve. Established law teachers will come to grips with the power of clinical method. Law students struggling with overly dry conceptual content will experience the connections between skills, the law and real life. Regulators will look again at law curricula and ask law deans 'when'?

International Perspectives on Teachers Living with Curriculum Change CRC Press

Winner of the 2022 CIES Jackie Kirk Outstanding Book Award  
Higher education is increasingly recognized as crucial for the livelihoods of refugees and displaced populations caught in emergencies and protracted crises, to enable them to engage in contemporary, knowledge-based, global society. This book tells the story of the Borderless Higher Education for Refugees (BHER) project which delivers tuition-free university degree programs into two of the largest protracted refugee camps in the world, Dadaab and Kakuma in Kenya. Combining a human rights approaches, critical humanitarianism and a concern with gender relations and intersecting inequalities, the book proposes that higher education can provide refugees with the possibility of staying put or returning home with dignity. Written by academics based in Canada, Kenya, Somalia and the USA, as well as NGO workers and students from the camps, the book demonstrates how North-South and South-South collaborations are possible and indeed productive.

International Handbook of Education for the Changing World of Work Routledge

This heavily revised second edition defines the current state of the art for informatics education in medicine and healthcare. This field has continued to undergo considerable changes as the field of informatics continues to evolve. The book features extensively revised chapters addressing the latest developments in areas including relevant informatics concepts for those who work in health information technology and those teaching informatics courses in clinical settings, techniques for teaching informatics with limited resources, and the use of online modalities in bioinformatics research education. New topics covered include how to get appropriate accreditation for an informatics program, data science and bioinformatics education, and undergraduate health informatics education. Informatics Education in Healthcare: Lessons Learned addresses the broad range of informatics education programs and available techniques for teaching informatics. It therefore provides a valuable reference for all

involved in informatics education.

**Higher Education Leadership and Governance in the Development of the Creative and Cultural Industries in Kenya** Taylor & Francis

Tourism is much more than an economic sector, it is also a social, cultural, political, and environmental force that drives societal change. Understanding, responding to, and managing this change will inevitably require knowledge workers who are able to address a range of problems associated with tourism, travel, hospitality, and the increasingly complex operating environment within which they exist. The purpose of this Handbook is to provide an insightful and authoritative account of the various issues that are shaping the higher educational world of tourism, hospitality and events education and to highlight the creative, inventive and innovative ways that educators are responding to these issues. It takes as its central focus a dynamic curriculum space shaped by internal and external factors from global to local scales, a variety of values and perspectives contributed by a range of stakeholders, and shifting philosophies about education policy, pedagogy and teaching practice. A benchmark for future curriculum design and development, it critically reviews the development of conceptual and theoretical approaches to tourism and hospitality education. The Handbook is composed of contributions from specialists in the field, is interdisciplinary in coverage and international in scope through its authorship and content. Providing a systematic guide to the current state of knowledge on tourism and hospitality education and its future direction this is essential reading for students, researchers and academics in Tourism, Hospitality, Events, Recreation and Leisure Studies.

Education for Holistic Transformation in Africa Springer Science & Business Media

The first resource to combine the theory of globalizing education preparation programs (EPP) with practice collected from all regions of the world, *At School in the World: Developing Globally Engaged Teachers* makes the case for the necessity of incorporating global citizenship and intercultural competence development into education curricula at all levels. This volume includes the voices of forty-seven emerging and distinguished intercultural education scholars from ten countries, providing a breadth and depth of experiences and practices never before

collected in one book. This is an ideal resource for division leaders of EPP at colleges and universities, education policy developers, teacher preparation faculty, preservice teachers (undergraduate and graduate), and practicing teachers. Through insights from the field and practical examples, along with its broad scope, this comprehensive work aims to help these education practitioners develop their awareness of the importance of internationalization of teacher education; develop their intercultural competence; and learn strategies for incorporating global approaches in their courses and programs.

Information knowledge and technology for Development in Africa Springer

This text discusses the relationship between state, market, civil society and education, examining such topics as: development in education inspectorates; the way in which universities are stimulated to support themselves financially; and the way education prepares students for citizenship.

**Higher Education in Africa** Bloomsbury Publishing

*The Constitution of Kenya: Contemporary Reading*, provides an in-depth assessment of the interface between constitutionalism and Kenya's new Constitution. Focusing on the historical trajectory on the search for a new Constitution, Chapter One lays the groundwork upon which the fault line between constitutionalism and the issue areas are articulated in the other chapters in relation to the new Constitution. The superb chapters on the carefully selected issue areas, make this edited volume an essential reading. The book makes an important contribution to the evolving constitutionalism and policy clarification on Kenya's new Constitution. It is a welcome and timely intervention by legal scholars and practitioners on the new constitution and the challenges facing Kenya in its implementation. The book is an excellent teaching and reading manual for students in law, history, politics, diplomacy, and international relations as well as for the practitioners.

Education Research in African Contexts Routledge

This compelling anthology illuminates the transformative role of education research in Africa, presenting a bricolage of studies by scholarship holders of the East and South African-German Centre of Excellence for Educational Research Methodologies and Management (CERM-ESA). Bridging insights from these two regions, the book examines the vital intersections between

education, society and culture, with a focus on fostering sustainable educational reform and empowering local communities. At the heart of the book is a shared commitment to evolving higher education in Africa through collaborative, context-sensitive research. Anchored by the partnership of five universities across two continents, CERM-ESA's initiatives support capacity-building and innovation in African educational contexts, working directly with schools, communities and policymakers to address the unique challenges of the continent. With themes ranging from indigenous methodologies and climate change education to gender equity and academic resilience, the chapters showcase diverse and locally relevant approaches that inform and inspire change across educational sectors. Targeted toward education researchers, policymakers and practitioners invested in African development, *Education Research in African Contexts* offers an in-depth exploration of educational methodologies that honour traditions while embracing progressive change. The book provides invaluable insights for educators and leaders seeking to support responsive, impactful education systems. Through critical reflection and innovative research, the volume reimagines educational paradigms that respect African realities, encouraging readers to explore new possibilities for inclusive and transformative research.

MEDINFO 2015: EHealth-enabled Health CRC Press

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Managing Digital Records in Africa Springer Nature

Information, knowledge, and technology occupy significant space in the information and knowledge society and ongoing debates on development such as sustainable development goals (SDGs) agenda 2030 and the fourth industrial revolution (4IR). Disruptive technologies and cyber-physical systems, obscuring the lines between the physical, digital and biological, escalated by the COVID-19 pandemic, present a 'new normal' that profoundly affects the nature and magnitude of responses required to sustain and benefit from the new developments. Africa, known for its late adoption of new technologies and innovations, is leapfrogging

development stages in several enviable ways. This book, *Information knowledge and technology for development in Africa*, written by eminent African scholars, comprises chapters that satisfactorily address information access, artificial intelligence, information ethics, e-learning, library and information science education (LISE) in the 4IR, data literacy and e-scholarship, and knowledge management, which are increasingly essential for information access, services, and LISE in Africa. We expect the book to support research, teaching and learning in African higher education and worldwide for comparative scholarship.

*Global Perspectives on Sustainable Library Practices* Rowman & Littlefield

*Managing Digital Records in Africa* draws on the research work of the InterPARES Trust (ITrust) project that investigated interrelated archival issues focusing on legal analysis, infrastructure, trust, authentication, and education within the African context. This research-focused book provides a legal analysis and systematic assessment of how African institutions manage digital records in four countries (i.e., Botswana, Kenya, South Africa, and Zimbabwe). It also examines the extent to which records are managed using Internet-based applications, trust in such records, and digital record authentication to support the auditing process. Finally, it provides a curriculum analysis in digital records at institutions of higher learning in 38 African countries. The book's case studies illustrate the threads of discussion, which span the ITrust domains of legislation, infrastructure, authentication, trust, and education in archives and records management. The book can be used as a premier reference source by private and public organizations, researchers, educators, archivists, records managers, and postgraduate students to make informed decisions about digital records, records management systems, cloud-based services, authenticating records, and identifying universities on the continent that offer archival programmes. The book may also find expression to practitioners in other fields such as law and auditing.

*Library and Information Science in Developing Countries: Contemporary Issues* IGI Global

The field of library and information science is experiencing significant and continued transformation as a result of advancements in digital technology. Adapting to new technologies is crucial for librarians and other information

professionals, but there exists a particularly acute gap in technology adoption among developing countries. *Library and Information Science in Developing Countries: Contemporary Issues* explores the relationship between global technology development and the impact of new technologies on library practice, library education, and information science. Book chapters and case studies in this work provide insight to and support for practitioners and executives concerned with the management of knowledge, information, and organizational development in different types of work environments and learning communities.

*Transnational Perspectives on Innovation in Teaching and Learning Technologies* Wipf and Stock Publishers

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

*Education Contested* BRILL

This Handbook approaches sustainable development in higher education from an integrated perspective, addressing the dearth of publications on the subject. It offers a unique overview of what universities around the world are doing to implement sustainable development (i.e. via curriculum innovation, research, activities, or practical projects) and how their efforts relate to education for sustainable development at the university level. The Handbook gathers a wealth of information, ideas, best practices and lessons

learned in the context of executing concrete projects, and assesses methodological approaches to integrating the topic of sustainable development in university curricula. Lastly, it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education.

*Kenya National Assembly Official Record (Hansard)* IGI Global

The first of its kind, this book documents and analyzes the international dimension of higher education in Africa based on country case-studies and a consideration of relevant historical and contemporary themes. It identifies trends, developments, and challenges related to the international dimension of higher educational at the institutional, national, and regional levels. It explores the institutional the opportunities and probes the risks while it responds to the growing need for information and analysis of internationalization of higher education in Africa. On the basis of this book project, an effort is underway to establish the African Network for Internationalization of Education (ANIE). This network aims to develop research capacity and expertise to meet the professional and practical needs of individuals, institutions and organizations interested in the international dimension of higher education in Africa.

*A Comparative Analysis of Higher Education Systems* Springer Science & Business Media

This six-volume handbook covers the latest practice in technical and vocational education and training (TVET). It presents TVET models from all over the world, reflections on the best and most innovative practice, and dozens of telling case studies. The handbook presents the work of established as well as the most promising young researchers and features unrivalled coverage of developments in research, policy and practice in TVET.

***Kenya National Assembly Official Record (Hansard)***

Bloomsbury Publishing

Research has revealed ineffectiveness among university graduates in Africa. Some possible causes include a lack of transformative teaching and learning methods. Most of the learning methods used in Africa today were installed by colonial educational systems, often reducing the learner to an empty container waiting to be filled with lecture after lecture. As a result, there is a cry throughout Africa for an education that can empower the learner to think critically, to love both God and

others, and to bring change in his or her community. This is what education for holistic transformation is all about. This book came about as a result of a doctoral study conducted in Kenya, which featured both Christian higher educational institutions and public

universities in a unique comparative analysis that will be helpful to educational leaders on both sides. Readers will learn that transformation is a discovery that takes place through change of perspective. As this research reveals, this new perspective is

triggered by a new revelation, a new truth, a provoking thought, a shocking observation, or a new testimony. Thus, the process of holistic transformation takes place through divine revelation, self-reflection, written material, and "the other."
