Cuddly teddy bears teach children about colours, in English and French.

STRESS ET BURNOUT Brill Archive

A gentleman pickpocket, elegant to the bone, plies the best cafes of Cairo. Ossama is a thief: "not a minister, banker or real estate developer - a modest thief". His country may be a disaster but he is a hedonist, convinced that "nothing on this Earth is tragic for an intelligent man". In one fat victims wallet, he discovers a highly compromising letter, revealing bribery, corrupt ministers, and lethally shoddy building practices. He decides he must act...

Journal de Trévoux Peeters Publishers

The 17th congress of the Association Internationale pour l'Histoire du Verre (AIHV), held in Antwerp, Belgium from 4 to 8 September 2006, brought together scholars from all over the world specialized in the history of glass. AIHV is an international organisation whose membership spans the globe, from Los Angeles to Tokyo and from Helsinki to Adelaide. Since its creation 50 years ago, AIHV members have studied and reported on the extraordinary development of glass in all historical periods in the Annales of the AIHV. Next to containing numerous contributions on the use, manufacture and trade of glass in the Antique period, also the importance of glass in more recent historical periods, starting from the 15th century and ending in the 21st century, are dealt with in detail. Additionally, apart from contributions on stained glass, on glass decoration and the use of enamelling, a substantial series of papers dealing with the chemical analysis of glass form part of this proceedings volume. --Book Jacket.

A book that lists French language words and gives their equivalent in English, and English language words with their equivalent in French.

Table Des Planches Enluminées D'histoire Naturelle de M. D'Aubenton. Avec Les Denominations de M.M. de Buffon, Brisson, Edwards, Linnæus Et Latham. Précédé D'une Notice Des Principaux Ouvrages Zoologiques Enluminés Lulu.com

Dans cet ouvrage les auteurs recensent les concepts fondamentaux et les dernières avancées dans le domaine de l'acquisition, de la perception, du codage et du rendu des couleurs. Destiné aux chercheurs et ingénieurs, aux étudiants en Master ou Doctorat, cet ouvrage dresse un état de l'art sur les problématiques scientifiques et techniques soulevées par les différentes étapes de la chaîne numérique couleur. Cet ouvrage aborde les aspects fondamentaux liés à la colorimétrie et à la physiologie, à la constance et à l'apparence des couleurs. Il traite aussi des aspects plus techniques liés aux capteurs et à la gestion des couleurs sur écran. Une attention particulière a été également apportée à la notion de rendu des couleurs en synthèse d'images. Au delà de la couleur, un état de l'art approfondit est aussi mené sur le codage, la compression, la protection et la qualité d'images et de vidéos couleur.

Phytogénie Ou Théorie Mécanique de la Végétation Рипол Классик

In *Individuals and Materials in the Greco-Roman Cults of Isis* Valentino Gasparini and Richard

Veymiers present a collection of reflections on the individuals and groups which animated one of Antiquity's most dynamic, significant and popular religious phenomena: the reception of the cults of Isis and other Egyptian gods throughout the Hellenistic and Roman worlds. These communities, whose members seem to share the same religious identity, for a long time have been studied in a monolithic way through the prism of the Cumontian category of the "Oriental religions". The 26 contributions of this book, divided into three sections devoted to the "agents", their "images" and their "practices", shed new light on this religious movement that appears much more heterogeneous and colorful than previously recognized.

Central to any reappraisal of Southey's mid to late career, is 'Roderick'. This best-selling epic romance has not been republished since 1838 and is contextualised here within Southey's wider oeuvre. The four-volume edition also benefits from a general introduction, volume introductions, textual variants, endnotes and a consolidated index.

Actes Du Neuvième Congrès International Des Égyptologues teNeues

Cet ouvrage collectif recense les dernières avancées dans le domaine de l'analyse automatique des images numériques couleur. Destiné aux chercheurs, ingénieurs R&D et étudiants en Master ou Doctorat, il constitue un état de l'art critique et le plus exhaustif possible sur les problématiques scientifiques soulevées par les différentes étapes constituant une chaîne de traitement des images couleur. Le filtrage et la segmentation des images fixes sont abordés par des techniques récentes telles que les outils morphologiques couleur, les équations aux dérivées partielles, l'algèbre quaternionique ou l'analyse de graphes. La caractérisation des textures couleur est traitée par la prédiction linéaire ou des descripteurs statistiques. La reconnaissance d'objets fixes ou en mouvement dans des vidéos couleur nécessite d'utiliser des attributs invariants aux conditions d'éclairage. Une attention particulière a été apportée aux espaces couleur, et notamment ceux séparant la luminance de la chrominance.

Colors New Directions Publishing

The contributions to the present volume show that the countries that are often presented in the literature as forming part of a stereotypical and seemingly monolithic "Islamic world" in fact represent considerable diversity. From Iran to Senegal, we encounter a vast array of social and religious structures, historical trajectories, political regimes and relative positions of societies and individuals. We encounter also, in many different and often unexpected ways, the individual in multiple contexts. The present volume presents perspectives on everyday life in Muslim societies beyond the spectacular. From a broad academic background in Islamic and Iranian studies, social anthropology, sociology, philosophy and history, its contributors show that everyday life as well as religious practice in countries as diverse as Senegal, Niger, Egypt, Tunisia and Iran is not informed by one single "Islamic" tradition, but rather by multiple and often surprisingly different modes of religiosity and non-religiosity.

Le Parfait Joaillier, ou Histoire des pierreries Taylor & Francis

From the acclaimed author of Blue and other color histories, the beautifully illustrated story of pink, from the first ancient pigments to Barbie Pink has such powerful associations today that it's hard to imagine the color could ever have meant anything different. But it's only since the introduction of the Barbie doll in 1959 that pink has become decisively feminized. Indeed, in the eighteenth century, pink was frequently masculine, and the color has signified many things beyond gender over the course of its long history—from the prim to the vulgar, and from the romantic to the eccentric. In this richly illustrated book, Michel Pastoureau, a celebrated authority on the history of colors, presents a fascinating visual, social, and cultural history of pink in the West, from antiquity to today. Pink pigments first appear in ancient Macedonian paintings, but it was not until the eighteenth century that vivid, saturated pinks were developed for dyeing and painting. At the same time, a popular new flower—the pink rose—finally gave the color a standard name, and pink, assuming a place in everyday life, began to acquire its own symbolism, distinct from that of red, yellow, or white. Bringing the story up to the twentieth and twenty-first centuries, Pink describes how the color, both adored and detested, became associated with many other things, from softness and pleasure to nudity and sex. Illustrated throughout with a wealth of captivating images, Pink is an entertaining and enlightening account of the evolving role and significance of the color in art, fashion, literature, religion, science, and everyday life across the millennia.

The Colors of Infamy Lavoisier

Les médias 3D relief, leur capture, leur retransmission en relief, possiblement en direct, sont aujourd'hui disponibles et portent l'évolution attendue pour la télévision et l'Internet. Ces technologies (« télévision 3D », « free viewpoint TV » ou « Vidéo 3D »), impactent toute la chaîne audiovisuelle : · les techniques d'acquisition relief sont plus variées · les scènes sont représentées par des structures numériques plus ou moins informatives : vidéos multi-vues sans/avec profondeur, modèles 3D · la reconstruction extrait lesdites représentations des vidéos multi-vues, · leur compression facilite la diffusion des médias, · l'affichage (auto-)stéréoscopique, avec/sans adaptation/enrichissement et/ou synthèse de vues intermédiaires, permet l'expérience visuelle immersive ciblée. La vidéo 3D recouvre donc de multiples facettes. Visant à donner aux étudiants une vision d'ensemble du sujet et aux chercheurs un texte de référence actuel aussi complet que possible, cet ouvrage en présente les principaux développements relevant de domaines variés : mathématiques appliquées, vision par ordinateur, informatique graphique, réalité virtuelle, psychophysique et physiologie de la vision humaine...

Mechanisms of Colour Discrimination covers the proceedings of an International Symposium on the Fundamental Mechanisms of the Chromatic Discrimination in Animals and Man, held in Paris, France at the College De France on July 25-29, 1958, sponsored by the International Council of Scientific Unions. This book is organized into six parts encompassing 10 chapters. The main focus of this book is on the zoological, neurophysiological, biochemical, and psychophysical problems related to color discrimination in animals and human.

HĂRȚI ALE CUNOAȘTERII. SUNETE, MIREȘME ȘI MIAȘME ASP / VUBPRESS / UPA

From the acclaimed author of Blue, a beautifully illustrated history of yellow from antiquity to the present In this richly illustrated book, Michel Pastoureau—a renowned authority on the history of color and the author of celebrated volumes on blue, black, green, and red—now traces the visual, social, and cultural history of yellow. Focusing on European societies, with comparisons from East Asia, India, Africa, and South America, Yellow tells the intriguing story of the color's evolving place in art, religion, fashion, literature, and science. In Europe today, yellow is a discreet color, little present in everyday life and rarely carrying great symbolism. This has not always been the case. In antiquity, yellow was almost sacred, a symbol of light, warmth, and prosperity. It became highly ambivalent in medieval Europe: greenish yellow came to signify demonic sulfur and bile, the color of forgers, lawless knights, Judas, and Lucifer—while warm yellow recalled honey and gold, serving as a sign of pleasure and abundance. In Asia, yellow has generally had a positive meaning. In ancient China, yellow clothing was reserved for the emperor, while in India the color is associated with happiness. Above all, yellow is the color of Buddhism, whose temple doors are marked with it. Throughout, Pastoureau illuminates the history of yellow with a wealth of captivating images. With its striking design and compelling text, Yellow is a feast for the eye and mind.

This massive 2 volume set contains 200 papers from the Congress, held in Grenoble, 6-12 Sept 2004. These papers cover the whole field of the present egyptological researches, from the Origins to the Graeco-roman period.

Tracts BoD - Books on Demand

From the acclaimed author of Blue, a beautifully illustrated history of the color white in visual culture, from antiquity to today As a pigment, white is often thought to represent an absence of color, but it is without doubt an important color in its own right, just like red, blue, green, or yellow—and, like them, white has its own intriguing history. In this richly illustrated book, Michel Pastoureau, a celebrated authority on the history of colors, presents a fascinating visual, social, and cultural history of the color white in European societies, from antiquity to today. Illustrated throughout with a wealth of captivating images ranging from the ancient world to the twenty-first century, White examines the evolving place, perception, and meaning of this deceptively simple but complex hue in art, fashion, literature, religion, science, and everyday life across the millennia. Before the seventeenth century, white's status as a true color was never contested. On the contrary, from antiquity until the height of the Middle Ages, white formed with red and black a chromatic triad that played a central role in life and art. Nor has white always been thought of as the opposite of black. Through the Middle Ages, the true opposite of white was red. White also has an especially rich symbolic history, and the color has often been associated with purity, virginity, innocence, wisdom, peace, beauty, and cleanliness. With its striking design and compelling text, White is a colorful history of a surprisingly vivid and various color.
