A new expanded edition
of the classic study of
translation, finally back in
print The difficulty (and
necessity) of translation is
concisely described in

Nineteen Ways of Looking
at Wang Wei, a close
reading of different
translations of a single
poem from the Tang
Dynasty—from a
transliteration to Kenneth
Rexroth’s loose
interpretation. As Octavio
Paz writes in the
afterword, “Eliot
Weinberger’s commentary
on the successive
translations of Wang
Wei’s little poem

illustrates, with succinct
clarity, not only the
evolution of the art of
translation in the modern
period but at the same
time the changes in
poetic sensibility.”

How the way we perceive
our bodies plays a critical
role in the way we
perceive ourselves:
stories of phantom limbs,
rubber hands, anorexia,

and other phenomena. The body is central to our sense of identity. It can be a canvas for self-expression, decorated with clothing, jewelry, cosmetics, tattoos, and piercings. But the body is more than that. Bodily awareness, says scientist-writer Moheb Costandi, is key to self-consciousness. In *Body Am I*, Costandi examines how the brain perceives the body, how that perception translates into our conscious experience of the body, and how that experience contributes to our sense

of self. Along the way, he explores what can happen when the mechanisms of bodily awareness are disturbed, leading to such phenomena as phantom limbs, alien hands, and amputee fetishes. Costandi explains that the brain generates maps and models of the body that guide how we perceive and use it, and that these maps and models are repeatedly modified and reconstructed. Drawing on recent bodily awareness research, the new science of self-consciousness, and historical milestones in

neurology, he describes a range of psychiatric and neurological disorders that result when body and brain are out of sync, including not only the well-known phantom limb syndrome but also phantom breast and phantom penis syndromes; body integrity identity disorder, which compels a person to disown and then amputate a healthy arm or leg; and such eating disorders as anorexia. Wide-ranging and meticulously researched, *Body Am I* (the title comes

from Nietzsche's Thus Spoke Zarathustra) offers new insight into self-consciousness by describing it in terms of bodily awareness.

Nine, Ten: A September 11 Story New Directions

Publishing

A gorgeously illustrated co-publication with Christine Burgin by "one of the world's great essayists" (The New York Times). With a guide to the illustrations by Mary Wellesley. Angels have soared through Western culture and consciousness from Biblical to contemporary times. But what do we really know about these celestial beings? Where do they come from, what are they made of, how do they communicate and perceive? The celebrated

essayist Eliot Weinberger has mined and deconstructed, resurrected and distilled centuries of theology into an awe-inspiring exploration of the heavenly host. From a litany of angelic voices, Weinberger's lyrical meditation then turns to the earthly counterparts, the saints, their lives retold in a series of vibrant and playful capsule biographies, followed by a glimpse of the afterlife. Threaded throughout Angels & Saints are the glorious

illuminated grid poems by the eighteenth-century Benedictine monk Hrabanus Maurus. These astonishingly complex, proto-“concrete” poems are untangled in a lucid afterword by the medieval scholar and historian Mary Wellesley.

Internationally acclaimed as one of the most innovative writers today, Eliot Weinberger has taken the essay into

unexplored territories on the borders of poetry and narrative where the only rule, according to the author, is that all the information must be verifiable. With *An Elemental Thing*, Weinberger turns from his celebrated political chronicles to the timelessness of the subjects of his literary essays. With the wisdom of a literary archaeologist-astronomer-anthropologist-zookeeper, he leads us through histories, fables, and meditations about the ten

thousand things in the universe: the wind and the rhinoceros, Catholic saints and people named Chang, the Mandaean on the Iran-Iraq border and the Kaluli in the mountains of New Guinea. Among the thirty-five essays included are a poetic biography of the prophet Muhammad, which was praised by the *London Times* for its "great beauty and grace," and "The Stars," a reverie on what's up there that has already been translated into Arabic, Chinese, Hindi, and Maori.

The Body Double New Directions Poetry Pamphlets
A kaleidoscopic, fast-paced tour of Latin America from one of the Spanish-speaking world's most outstanding writers. Lamenting not having more time to get to know each of the nineteen countries he visits after winning the prestigious Premio Alfaguara, Andrés Neuman begins to suspect that world travel consists mostly of "not seeing." But then he realizes that the fleeting nature of his trip provides him with a

unique opportunity: touring and comparing every country of Latin America in a single stroke. Neuman writes on the move, generating a kinetic work that is at once puckish and poetic, aphoristic and brimming with curiosity. Even so-called non-places—airports, hotels, taxis—are turned into powerful symbols full of meaning. A dual Argentine-Spanish citizen, he incisively explores cultural identity and nationality, immigration and globalization, history

and language, and turbulent current events. Above all, Neuman investigates the artistic lifeblood of Latin America, tackling with gusto not only literary heavyweights such as Bolaño, Vargas Llosa, Lorca, and Galeano, but also an emerging generation of authors and filmmakers whose impact is now making ripples worldwide. Eye-opening and charmingly offbeat, *How to Travel without Seeing: Dispatches from the New Latin America* is essential reading for anyone interested in the

past, present, and future of the Americas. *Four Days of You and Me* New Directions Publishing Presented at the PEN World Voices Festival as a "post-national" writer, Eliot Weinberger is "a sparkling essayist" (Confrontation), and his writings "a boundary-crossing, shape-shifting cabinet of curiosities" (The Bloomsbury Review). *My Emily Dickinson* New Directions Publishing It is the year 4022; all of the ancient country of Usa has been buried under many feet of detritus from

a catastrophe that occurred back in 1985. Imagine, then, the excitement that Howard Carson, an amateur archeologist at best, experienced when in crossing the perimeter of an abandoned excavation site he felt the ground give way beneath him and found himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, was clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries,

including the remains of two bodies, one of them on a ceremonial bed facing an altar that appeared to be a means of communicating with the Gods and the other lying in a porcelain sarcophagus in the Inner Chamber, permitted him to piece together the whole fabric of that extraordinary civilization.

Marker, by Susan Howe; The Helens of Troy, New York, by Bernadette Mayer; and Pneumatic Antiphonal, by Sylvia Legris. New Directions Publishing From Miranda Kenneally, author of the beloved high school romance Hundred Oaks series, comes a funny enemies to lovers romcom about second, third...maybe even fourth chances. Every May 7th, the students at Coffee County High School take a class trip. And every year, Lulu's relationship with Alex Rouvelis gets a little

more complicated. Freshman year they went from sworn enemies to more than friends after a close encounter in an escape room. It's been hard for Lulu to quit Alex ever since. Through break-ups, make-ups, and dating other people, each year's class trip brings the pair back together and forces them to confront their undeniable connection. From the science museum to Six Flags, New York City to London, Lulu learns one thing is for sure: love is the biggest trip of all. Are

Lulu and Alex meant to be, or are they better apart? Other teen romance books by Miranda Kenneally: Catching Jordan Stealing Parker Things I Can't Forget Racing Savannah Breathe, Annie, Breathe Jesse's Girl Defending Taylor Coming Up for Air **Motel of the Mysteries** Spire The surprising history of the scientific method—from an evolutionary account of thinking to a simple set of steps—and the rise of psychology in the

nineteenth century. The idea of a single scientific method, shared across specialties and teachable to ten-year-olds, is just over a hundred years old. For centuries prior, science had meant a kind of knowledge, made from facts gathered through direct observation or deduced from first principles. But during the nineteenth century, science came to mean something else: a way of thinking. The Scientific Method tells the story of how this approach took hold in laboratories, the

field, and eventually classrooms, where science was once taught as a natural process. Henry M. Cowles reveals the intertwined histories of evolution and experiment, from Charles Darwin's theory of natural selection to John Dewey's vision for science education. Darwin portrayed nature as akin to a man of science, experimenting through evolution, while his followers turned his theory onto the mind itself. Psychologists reimaged the scientific

method as a problem-solving adaptation, a basic feature of cognition that had helped humans prosper. This was how Dewey and other educators taught science at the turn of the twentieth century—but their organic account was not to last. Soon, the scientific method was reimaged as a means of controlling nature, not a product of it. By shedding its roots in evolutionary theory, the scientific method came to seem far less natural, but far more powerful. This book

reveals the origin of a fundamental modern concept. Once seen as a natural adaptation, the method soon became a symbol of science's power over nature, a power that, until recently, has rarely been called into question.

"Bennett writes like no
one else. She is a rare

talent, and *Checkout 19* is a masterful novel." -Karl Ove Knausgaard From the author of the "dazzling. . . . and daring" *Pond* (O magazine), the adventures of a young woman discovering her own genius, through the people she meets-and dreams up-along the way. In a working-class town in a county west of London, a schoolgirl scribbles stories in the back pages of her exercise book, intoxicated by the first sparks of her imagination. As she grows, everything and everyone she

encounters become fuel for a burning talent. The large Russian man in the ancient maroon car who careens around the grocery store where she works as a checkout clerk, and slips her a copy of *Beyond Good and Evil*. The growing heaps of other books in which she loses-and finds-herself. Even the derailing of a friendship, in a devastating violation. The thrill of learning to conjure characters and scenarios in her head is matched by the exhilaration of forging her own way in the world,
