important

about the  
unique  
context of

Australia's national narrative. The book examines the tension between national and transnational perspectives, attempting to internationalize the often parochial nation-based narratives that characterize national history. Moving from the local and personal to the global, encompassing comparative and international research and drawing on the experiences of researchers working across nations and communities, this collection brings together diverging national and transnational approaches and asks several critical research questions: What is transnational history? How do new transnational readings of the past challenge conventional national narratives and approaches? What are the implications of transnational and international approaches on Australian history? What possibilities do they bring to the discipline? What are their limitations? And finally, how do we understand the nation in this transnational moment? [Australians and Globalisation](#) Emerald Group Publishing Southeast Asia has become a battleground of power-politics today where even the so-called "Middle Powers" have their vital

stakes. Australia's participation in the Southeast Asian drama has naturally aroused the interest of commentators and policy-makers in Asia and abroad. Australia is Asia's nearest "white" neighbour and 70% of its diplomatic activity is concerned with Asian affairs. Dr. Ravindra Varma's analysis of Australia's involvement in Southeast Asia since the Second World War forms the first full-length study by an Asian writer of Australia's Asian policies. The book has grown out of the author's research in India, Australia and a number of Southeast Asian countries, such as, Malaysia, Thailand, Singapore, South Vietnam, The Philippines and Indonesia. His discussions with officials, politicians, diplomats and statesmen of various nations in the area have helped the book to achieve a perspective which is intimate and detached at the same time. The book is indispensable to students of international politics in general and specialists on South and Southeast Asia in particular.

Drawing on previously unavailable archival material, this book argues that

Indonesian nationalism rested on Islamic ecumenism heightened by colonial rule and the pilgrimage. The award winning author Laffan contrasts the latter experience with life in Cairo, where some Southeast Asians were drawn to both reformism and nationalism. After demonstrating the close linkage between Cairene ideology and Indonesian nationalism,

Laffan shows how developments in the Middle East continued to play a role in shaping Islamic politics in colonial Indonesia. Global Matrix V&R unipress GmbH Racism has a long history and its devastating impacts continue to spark heated, moral and political debate and give rise to social movements and widespread protest. This accessible primer

provides a cogent introduction to the study and confrontation of racism in the twenty-first century, making use of key insights from sociology and other social sciences. Drawing on a range of scholars, including from the radical black tradition and the Global South, this book explores key issues in racism studies. Putting racism into historical context, Moran explains the modernity of

racism and its creation through European colonialism and imperialism, racial capitalism, and the development of racist hierarchies stimulated by colonialist exploitation as well as pseudoscientific and Enlightenment thinking centred upon white supremacy. Moran also discusses the intersectional, structural, institutional and systemic nature of racism, and

the connections between race, racism and nationalism evident in the explosion of right-wing nationalist populism around the world. The book also investigates how the self and subjectivity are involved in racism and contribute to the reproduction of racism as a system, before considering whether there are new, cultural forms of racism, and how we can account for

Islamophobia and other racisms described as new, such as colour-blind racism, post-racial racism and racism without racists. Crucially, the book explores anti-racist social movements (such as Black Lives Matter) and how racism has been challenged, and discusses how accounts of race and racism can be given without reproducing the category of race as a 'natural' organiser of

people, groups, and identities. This book will appeal to the general reader and students in the humanities and social sciences with an interest in the continuing impact of racism, racial identities, migration, multiculturalism, ethnic and racial studies, nationalism and identity studies.

This classic introduction to the study of history invites the reader to

stand back and consider some of its most fundamental questions - What is the point of studying history? How do we know about the past? Does an objective historical truth exist and can we ever access it? In answering these central questions, John Tosh argues that, despite the impression of fragmentation created by postmodernism in recent years, history is a coherent discipline

which still bears the imprint of its nineteenth-century origins. Consistently clear-sighted, he provides a lively and compelling guide to a complex and sometimes controversial subject, while making his readers vividly aware of just how far our historical knowledge is conditioned by the character of the sources and the methods of the historians who work on them. Australians and Australian communities in Britain since c.1901. It offers a comprehensive overview of current scholarship in this exciting, new and developing field of inquiry. This book has a contemporary focus, drawing on both recent and historical experiences with a view to understanding continuing trends, such as the consistent preponderance of women and the recent surge in young

professionals, and issues such as expatriatism, imperialism, globalisation, national identity and overseas citizenship. This book will appeal to scholars of Australian Studies (within Australia and Britain especially), History, Demography, Literary and Cultural studies and Tourism. The topics of this book range from Australians in Britain (especially London),

including artists, literary intellectuals, students, women, tourists and travellers, servicemen, nurses, teachers and journalists, global professionals; the changing community; demographic trends; migration; links between the two countries; Australian newspapers in London; and Australia in the 'British world'.

The Australian Experience is based upon the highly-acclaimed ABC education series of the same name. It covers six major topics or events in Australian History: Aboriginal history; Migration to Australia; Women at work for Australia; the Vietnam war; the Green revolution - the Franklin River; Path to Federation. Each unit uses an enquiry approach and allows flexibility of investigation

through a range of primary and secondary sources, focus questions and activities. **Australians in Britain** Cambridge University Press Third and completely revised edition of a resource book first published in 1975, which covers Australian history from Federation to the present. Emphasis is on an enquiry-based approach to the subject with accompanying

documents and photographs. Indexed. Islamic Nationhood and Colonial Indonesia Abhinav Publications In 2023 the Sydney Review of Books celebrates a decade online and the publication of more than a thousand essays and longform reviews of Australian and international literature. Over these ten years the SRB has cleared a unique space for serious

reflection on literature and for critical thinking about our culture more broadly. The journal has been shaped by the diverse aesthetic, political and critical dispositions of our contributors, each of whom has different questions to ask contemporary literature. As they've asked these questions, they've guided a bold and independent public conversation about literature, and especially about the many forms of Australian literature. Critic Swallows Book brings together twenty-two essays that together demonstrate the eclecticism of the Sydney Review of Books. It includes essays on decolonising Australian literature and revisiting the classics, on blockbuster fiction and book-length poetry, on modernism in the Antipodes and reading during the pandemic. Essays on Susan Sontag and Rita Felski sit alongside critical considerations of Murray Bail and Joan London, of Evelyn Araluen and Samia Khatun. Australia is one of the most ethnically diverse societies in the world today. From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian

society and culture. The Australian People documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the

book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation. *Exploring Australian National Identity* Oxford University Press This book explores the profound social, cultural, and political changes that affected the way in which

Canadians and Australians defined themselves as a «people» from the late nineteenth century to the 1970s. Taking as its central theme the way each country responded to the introduction of new migrants, the book asks a key historical question: why and how did multiculturalism replace Britishness as the defining idea of community for English-speaking Canada and Australia, and

what does this say about their respective experiences of nationalism in the twentieth century? The book begins from a simple premise - namely, that the path towards the adoption of multiculturalism as the orthodox way of defining national community in English-speaking Canada and Australia in the latter half of the twentieth century was both uncertain and unsteady. It followed a

period in which both nations had looked first and foremost to Britain to define their national self-image. In both nations, however, following the breakdown of their more formal and institutional ties to the 'mother-country' in the post-war period there was a crisis of national meaning, and policy makers and politicians moved quickly to fill the void with a new idea of the nation, one that was the

very antithesis to the White, monolithic idea of Britishness. This book will be useful for both history and politics courses in Australia and Canada, as well as internationally .  
*The Australian People* ATF Press  
 The original papers collected in this pioneering volume address the historical archaeology of Aboriginal Australia and its application in researching the shared

history of Aboriginal and settler Australians. The authors draw on case studies from across the continent to show how archaeology can illuminate the continuum of responses by indigenous Australians to European settlement and colonization. Taking an innovative approach to the relationship between archaeological theory and contemporary Australian history, the book also

examines the role of archaeology in current debates over Aboriginal land rights and the role of 'post-contact' archaeology in cultural heritage management. An introduction by the series editors places the Australian material in the context of indigenous archaeological studies worldwide. The volume will be of interest to academic and public archaeologists, indigenous people,

anthropologists, historians, and heritage managers who deal with indigenous communities. **The Oxford Handbook of Australian Politics** Cambridge University Press From colony to federation to the present, it analyses the development of globalisation in Australia. **Experience of Nationhood** Monash Univ Pub "BOOK Abstract: The Oxford Handbook of Australian

Politics is a comprehensive collection that considers Australia's distinctive politics-both ancient and modern-at all levels and across many themes. It examines the factors that make Australian politics unique and interesting, while firmly placing these in the context of the nation's Indigenous and imported heritage and global engagement. The book presents an account of Australian

politics that recognizes and celebrates its inherent diversity by taking a thematic approach in six parts. The first theme addresses Australia's unique inheritances, examining the development of its political culture in relation to the arrival of British colonists and their conflicts with First Nations peoples, as well as the resulting geopolitics. The second theme, improvisation,

focuses on Australia's political institutions and how they have evolved. Place-making is then considered to assess how geography, distance, Indigenous presence, and migration shape Australian politics. Recurrent dilemmas centre on a range of complex, political problems and their influence on contemporary political practice. Politics, policy, and public

administration cover how Australia has been a world leader in some respects, and a laggard in others when dealing with important policy challenges. The final theme, studying Australian politics, introduces some key areas in the study of Australian politics and identifies the strengths and shortcomings of the discipline. This Handbook is an opportunity for others to consider the

nation's unique politics from the perspective of leading and emerging scholars, and to gain a strong sense of its imperfections, its enduring challenges, and its strengths.
