The Next Big Thing in School Improvement Routledge

Based on the "I Wish My Teacher Knew..." classroom exercise that went viral, a guide for educators and the community on how to understand children better, build trust, and learn about the challenges they face, with key issues, focus questions, and lesson plans

Mentoring English Teachers in the Secondary School Shell Education

It is acknowledged that today's teachers are tasked with educating increasingly diverse students as well as with addressing their academic and social-emotional needs. The Stars in the Schoolhouse: Teaching Practices and Approaches that Make a Difference offers a visionary look at teaching skills and practices that focus on the classroom, technology, and specific content areas that are often ignored in educational conversations. Emphasis is placed on research-based strategies, practices, and theories that can be readily translated into classroom practice, whilst examining cutting-edge teaching practices that make a difference in improving general educator and/or student performance across the grade spans. This high-quality teaching resource will be of interest to regular and special educators, school administrators, guidance counselors, graduate education professors, and university students.

Becoming a Literacy Leader Springer

Education and learning opportunities bring about the potential for individual and national advancement. As learners move away from traditional scholarly media and toward technology-based education, students gain an advantage with technology in learning about their world and how to interact with modern society. The Handbook of Research on Learning Outcomes and Opportunities in the Digital Age provides expert research relating to recent technological advancements, technology and learning assessments, and the effects of technology on learning environments, making it a crucial reference source for researchers, scholars, and professors in various fields.

Handbook of Research on K-12 Blended and Virtual Learning Through the i2Flex Classroom Model Pan Australia

This book examines the recent popularity of the dystopian genre in literature and film, as well as connecting contemporary manifestations of dystopia to cultural trends and the implications of technological and social changes on the individual and society as a whole. Dystopia, as a genre, reflects our greatest fears of what the future might bring, based on analysis of the present. This book connects traditional dystopian works with their contexts and compares these with contemporary versions. It centers around two main questions: Why is dystopia so popular now? And, why is dystopia so popular with young adult audiences? Since dystopia reflects the fears of society as a whole, this book will have broad appeal for any reader, and will be particularly useful to teachers in a variety of settings, such as in a high school or college-level classroom to teach dystopian literature, or in a comparative literature classroom to show how the genre has appeared in multiple locales at different times. Indeed, the book's interdisciplinary nature allows it to be of use in classes focussing on politics, bioethics, privacy issues, women's studies, and any number of additional topics.

An Education in Facebook? OECD Publishing

This edited collection explores plurilingual education in the unique English medium instruction (EMI) context of the Arabian Peninsula. The book argues that integrating a plurilingual pedagogy alongside current EMI in the region could enhance students' learning and contribute to a language policy that embraces linguistic diversity while fostering regional identity. It brings together the work of experts in Arabic and English language policy and planning, presenting empirical research relating to plurilingual pedagogical practices within the region. The book offers a range of recommendations for educators on how to integrate plurilingual pedagogies in classroom teaching. This becomes more important since many educators in the region are non-Arabic speakers and are teaching students with diverse linguistic backgrounds through English. With a holistic and interdisciplinary approach to the linguistic landscape in the Arabian region, this book will be of great interest to researchers,

scholars, and students in the fields of applied linguistics, language education, teacher education, and EMI.

[Language Learning Motivation in Japan](#) Routledge

How many teachers take the time to connect with students on a personal level? How do you find the time, anyway? Teachers who manage to transcend the normal student-teacher relationships can benefit everyone in school--particularly the "challenging" students--and, along the way, prevent school violence, support school safety, improve school climate, and promote learning. In a time of an increasingly rigid "zero tolerance" of the slightest hint of violence, which results in automatic suspension or expulsion, Allen N. Mendler calls for a more caring, flexible approach to school safety. Connecting with Students outlines dozens of positive strategies for bridging the gap between teacher and student through personal, academic, and social connections. Easily tailored to any learning environment, the activities and guidelines provide you with the tools you need in the classroom, from the "H & H" greeting to the "2 x 10" method and the "4H," "think-aloud," and "paradoxical" strategies. As both teachers and administrators alter their own attitudes and behavior, they learn to listen to students and accommodate their needs. The end result will be lasting relationships that can foster deeper understanding and growth for educators and students alike. In this book, you will discover ways to stay optimistic and persistent and see your students as having something to teach you. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

Touchy Subject Stenhouse Publishers

The Handbook of Distance Education, 4th Edition is a comprehensive compendium of research in the field of distance education. The volume is divided into four sections covering the historical and theoretical foundations of distance education, attributes of teaching and learning using technology, management and administration, and different audiences and providers. Throughout, leading scholars address future research needs and directions based on current research, established practices, and recent changes to implementation, pedagogy, and policy.

I Wish My Teacher Knew IGI Global

This book synthesises current theory and research on L2 motivation in the EFL Japanese context carried out by internationally recognized researchers and upcoming researcher-educators working in various educational contexts in Japan. Topics covered include the issues of cultural identity, demotivation, language communities, positive psychology, possible L2 selves and internationalisation within a key EFL context. The studies in the book utilise a wide variety of research methodologies aiming to narrow the gap between theory and practice and examine L2 motivation in primary, secondary and tertiary education. This volume will be of interest to research/teacher professionals who are currently engaged in active ESL/EFL practice, EFL educators, researchers, and teacher-trainers both inside and outside Japan, who are interested in research on L2 motivation in general and within the Japanese context in particular, as well as graduate and postgraduate researchers.

From Crisis to Catastrophe Routledge

Caldecott Medalist Allen Say presents a stunning graphic novel chronicling his journey as an artist during WWII, when he apprenticed under Noro Shinpei, Japan's premier cartoonist. DRAWING FROM MEMORY is Allen Say's own story of his path to becoming the renowned artist he is today. Shunned by his father, who didn't understand his son's artistic leanings, Allen was embraced by Noro Shinpei, Japan's leading cartoonist and the man he came to love as his "spiritual father." As WWII raged, Allen was further inspired to consider questions of his own heritage and the motivations of those around him. He worked hard in rigorous drawing classes, studied, trained--and ultimately came to understand who he really is. Part memoir, part graphic novel, part narrative history, DRAWING FROM MEMORY presents a complex look at the real-life relationship between a mentor and his student. With watercolor paintings, original cartoons, vintage photographs, and maps, Allen Say has created a book that will inspire the artist in all of us.

Handbook of Research on Professional Development for Quality Teaching and Learning ASCD

"I have had the good fortune to watch both David and Tina facilitate learning groups and have learned from the power of their modeling. . . . I am delighted that they have gathered their

wisdom here in this volume to share with others eager to embark on the journey and experience the joys of facilitating learning with colleagues." —From the Foreword by Ron Ritchhart, senior research associate, Project Zero, Harvard Graduate School of Education One of the most important shifts in schools in the last two decades has been the growing emphasis on collaboration among teachers and other educators. Whether you are a teacher facilitating a group for the first time or an experienced facilitator seeking to further develop your skills, this book is for you. Organized to be used as both an exploration of the role of facilitating and as a handbook of strategies, this resource covers a range of contexts that include faculty meetings, department meetings, professional learning communities, grade-level teams, and inquiry groups. This book is a perfect companion to the authors' bestseller, *The Facilitator's Book of Questions*, which focuses on the skills needed to facilitate protocols or structured conversations. *Facilitating for Learning* extends the scope of that work by also examining the facilitator's responsibilities for supporting a group's learning during all parts of a meeting, between meetings, and within the larger school context and culture. It is an essential resource for teachers, administrators, coaches, and teacher educators. Book Features: Contrasts facilitating for learning with other professional development roles, including staff development, coaching, and supervision. Outlines the basic responsibilities and tasks of facilitating teacher learning groups, including "moves" the facilitator might employ. Considers challenges related to school culture and leadership, group interactions, and time constraints. Provides resources to help facilitators develop their skills, including tools and references to other works on facilitation.

Applied Linguistics in the Middle East and North Africa IGI Global Funny, poignant, and deeply moving, *The Line Tender* is a story of nature's enduring mystery and a girl determined to find meaning and connection within it. Wherever the sharks led, Lucy Everhart's marine-biologist mother was sure to follow. In fact, she was on a boat far off the coast of Massachusetts, collecting shark data when she died suddenly. Lucy was seven. Since then Lucy and her father have kept their heads above water--thanks in large part to a few close friends and neighbors. But June of her twelfth summer brings more than the end of school and a heat wave to sleepy Rockport. On one steamy day, the tide brings a great

white--and then another tragedy, cutting short a friendship everyone insists was "meaningful" but no one can tell Lucy what it all meant. To survive the fresh wave of grief, Lucy must grab the line that connects her depressed father, a stubborn fisherman, and a curious old widower to her mother's unfinished research on the Great White's return to Cape Cod. If Lucy can find a way to help this unlikely quartet follow the sharks her mother loved, she'll finally be able to look beyond what she's lost and toward what's left to be discovered. ★"Confidently voiced."—Kirkus Reviews, starred ★"Richly layered."—Publishers Weekly, starred ★"A hopeful path forward."—Booklist, starred ★"Life-affirming."—BCCB, starred ★"Big-hearted." —Bookpage, starred ★"Will appeal to just about everyone." —SLC, starred ★"Exquisitely, beautifully real."—Shelf Awareness, starred *The Teacher Gap* Springer

This is a book about educational fads, why they arise, and how we might learn to live with them. Those working in schools are subject to perpetual waves of novelty in the name of school improvement. And yet, in the long term very little actually changes. Big ideas come and go, leaving only faint clues as to their existence. The trouble is that the appealing stories that take hold will never solve the fundamental problems of modern schooling. The school system is too complex, too diverse, and too uncertain to be fixed by any Big Idea. Before too long, the Next Big Thing replaces the Last Big Thing. *The Next Big Thing in School Improvement* brings together the unique perspectives of a policy analyst, a headteacher, and a classroom teacher, to explain why it is that the school system often resists our attempts to improve it. Drawing on the recent history of English education policy, a variety of disciplinary traditions, and the emerging field of complexity science, the authors present a new take on why the school system behaves in ways that defy our attempts to change it. This is a book about finding a better way to improve our schools. It is not the Next Big Thing, but it does explain why there will inevitably be one, and what to do when it arrives.

Powerful Ideas in the Classroom Using Squeak to Enhance Math and Science Learning Waveland Press

Educators play a significant role in the intellectual and social development of children and young adults. Next-generation teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the

learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. *Teacher Education: Concepts, Methodologies, Tools, and Applications* explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. Emphasizing the growing role of technology in teacher skill development and training as well as key teaching methods and pedagogical developments, this multi-volume work compiles research essential to higher education professionals and administrators, educational software developers, and researchers studying pre-service and in-service teacher training.

Danny Allen Was Here University of Chicago Press

Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning. The i²Flex classroom model, a variation of blended learning, allows non-interactive teaching activities to take place without teachers' direct involvement, freeing up time for more meaningful teacher-student and student-student interactions. There is evidence that i²Flex leads to increased student engagement and motivation as well as better exploitation of teachers' and classroom time leading to the development of higher order cognitive skills as well as study skills for students' future needs related to citizenship, college, and careers. The *Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model* focuses not only on how to design, deliver, and evaluate courses, but also on how to assess teacher performance in a blended i²Flex way at the K12 level. The book will discuss the implementation of the i²Flex (isquareFlex), a non-traditional learning methodology, which integrates internet-based delivery of content and instruction with faculty-guided, student-independent learning in combination with face-to-face classroom instruction aiming at developing higher order cognitive skills within a flexible learning design framework. While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, educational technology developers, and students interested in how the i²Flex model was implemented in classrooms and the effects of this learning model.

Education and Equality IGI Global

Book contains 12 computer based projects children can create to help understand concepts in Math and Science. Also contains suggestions for off-computer activities to enhance computer projects.

More Tools for Teaching Content Literacy Scholastic Inc.

This book brings together a collection of internationally renowned authors in the STEM field to share innovations in the teaching of STEM. It focuses on the junior secondary years of education (students aged 11-15), since this is the age range in which students choose whether or not to formally opt out of STEM education. It is here that the book makes a significant contribution to the field by integrating the STEM area and focusing on the junior years of schooling. While developing this book, the editors drew on two main premises: Firstly, STEM is seen as the integrated study of science, technology, engineering and mathematics in a coherent learning paradigm that is based on real-world applications. Secondly, it is important to integrate digital technologies into STEM education beyond the superficial use of ICTs seen in many schools. The book also addresses the challenges within STEM education – many of which are long-standing. To this end, it includes chapters on marginalised and diverse communities, ensuring that a broad range of perspectives on STEM education is included.

Drawing From Memory Rutgers University Press

How do we get at the meanings of everyday (and not so everyday) objects, and how might these meanings enrich educational research? The study of objects is well established in fields such as archaeology, art history, communications, fine arts, museum studies, and sociology—but is still developing in education. *Object Medleys: Interpretive Possibilities for Educational Research* brings together 37 educational researchers from wide-ranging contexts and multiple knowledge fields to a dialogic space in which subjects and objects, living and nonliving, entangle as medleys to open up understandings of connections made with, between, and through objects. *Object Medleys* offers diverse, innovative modes and lenses for representing, interpreting, and theorising object studies. The book is distinctive within scholarship on object inquiry in that much of the research has been conducted within Southern African educational contexts. This is complemented by contributions from scholars based in Canada and the United Kingdom. The original research

represented in each peer-reviewed chapter expands academic conversations about what counts as data and analysis in educational research. Overall, *Object Medleys* illuminates the applied and theoretical usefulness of objects in response to pressing educational and societal questions. “*Object Medleys* is a rich and fascinating exploration of new possibilities, with potential for research, teaching, and learning that seems almost unlimited. This book is a rich assembly of affordances for exploring and widening the role of objects in educational research. It relocates attention from language and text towards embodied and material storytelling practices where new and marginalised ways of expression can find their ways into classrooms, thereby opening completely new avenues of teaching and learning.” – Kenneth Mølberg Jørgensen, Professor, Aalborg University, Denmark “In a time when materiality is being brought at the centre of critical inquiry in the social sciences and humanities, this edited collection offers unique insights into the relationship between objects, subjectivities, and learning. Beautifully written and cogently argued, the book breaks new ground by casting a critical spotlight on artefacts that might appear mundane at first sight but, on closer inspection, reveal complex patterns of educational potential.” – Tommaso M. Milani, Associate Professor, University of the Witwatersrand, Johannesburg, South Africa

Teaching at Its Best Vernon Press

Students have different learning styles! *Understanding Learning Styles* helps teachers determine the learning style of each student and the appropriate delivery methods to target and address the needs of as many of the intelligences as possible. Different learning-styles are presented in this professional book that helps teachers determine how best to teach their students. Surveys, practical ideas, and suggestions for designing lessons that incorporate multiple learning styles are provided to show teachers how to differentiate instruction. This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills. 208pp.

Handbook of Research on Cross-Cultural Online Learning in Higher Education John Catt

American education as we know it today—guaranteed by the state to serve every child in the country—is still less than a hundred years old. It's no wonder we haven't agreed yet as to exactly what role education should play in our society. In these

Tanner Lectures, Danielle Allen brings us much closer, examining the ideological impasse between vocational and humanistic approaches that has plagued educational discourse, offering a compelling proposal to finally resolve the dispute. Allen argues that education plays a crucial role in the cultivation of political and social equality and economic fairness, but that we have lost sight of exactly what that role is and should be. Drawing on thinkers such as John Rawls and Hannah Arendt, she sketches out a humanistic baseline that re-links education to equality, showing how doing so can help us reframe policy questions. From there, she turns to civic education, showing that we must reorient education's trajectory toward readying students for lives as democratic citizens. Deepened by commentaries from leading thinkers Tommie Shelby, Marcelo Suárez-Orozco, Michael Rebell,

and Quiara Alegría Hudes that touch on issues ranging from globalization to law to linguistic empowerment, this book offers a critical clarification of just how important education is to democratic life, as well as a stirring defense of the humanities. *Inadequate: The system failing our teachers and your children* John Wiley & Sons
This practical guide will help school-based mentors of trainee or newly qualified English teachers in developing their own mentoring skills, whilst providing the essential guidance their trainees need as they navigate their new role in the secondary classroom. With analytical tools for self-evaluation, this is a key resource that will support and inspire mentors and help them identify both strengths and skill gaps to develop confidence and knowledge in their mentoring position. By providing practical tools

such as tasks, feedback guides, further readings and examples of dialogue with trainees, this volume covers the knowledge, skills and understanding every mentor needs. Key topics explored include: Roles and responsibilities of mentors; How to develop a mentor-mentee relationship; Developing beginning English teachers' subject knowledge and expertise, including planning for pupils' learning; Managing workload and student teacher well-being; Developing collaborative practice; Developing the wider, professional role of the teacher. Filled with tried-and-tested strategies based on the latest research, *Mentoring English Teachers in the Secondary School* is a vital guide for mentors of English teachers, both trainee and newly qualified, with ready-to-use strategies that support and inspire both mentors and beginning teachers alike.
