Learn French In A Hurry McGraw Hill Professional
Learning French from Spanish and Spanish from French provides adult English speakers who have learned either Spanish or French as a second language with the tools to learn the other as a third language. Research in the growing fields of third-language acquisition and multilingualism documents how successful

language learners intuitively build on their existing knowledge as they learn a new language. In this vein, Learning French from Spanish and Spanish from French takes advantage of the fact that learners with intermediate proficiency in a second language are used to thinking consciously about language, know themselves as language learners, and can capitalize on what they know about one language to understand the other. With chapters conveniently organized by grammatical concept and including supplementary resources such as exercises, parallel

reading texts, and audio files, this book will benefit students, travelers, and budding multilinguals alike.

here been to furnish enlightened readers, versed only in the English language, the means of acquiring, through the medium of their vernacular, some proportioned, trustworthy, and effective knowledge and appreciation, in its chief classics, of the great literature which has been written in French. This object has been sought, not through narrative and description, making books and authors the subject, but through the literature itself, in specimen extracts illuminated by the necessary explanation and criticism. Unlike the first two volumes in The After-School Series, which dealt with Greek and Latin, literature limited and finished, this third title in the set deals with French literature, a living body that is indefinitely vast in extent, and still in the vital process of growth. ♥♥ French Learning Books free CLASSIC FRENCH COURSE IN ENGLISH ♥♥ Start speaking French in minutes, and learn key vocabulary, phrases, and grammar in just minutes more with Lower Beginner French, a completely new way to learn French with ease! The book *Constructions in French* is the first collected volume to focus on French syntax from a constructionist perspective. It has been written with two kinds of readers in mind: for readers interested in the relationship between the French linguistic tradition and cognitive linguistics, and for readers who would like to examine how constructional analysis can be applied to a variety of French language phenomena. The eleven papers illustrate the insights generated by combining lexicalist and constructionist approaches, focusing on syntax as a dynamic system and using corpus data

from a variety of speech genres. The contributions provide new findings about French usage trends (in linguistics and in psycholinguistics), including insights into new, nonstandard and poorly studied constructions.

Do you want to learn French? This book walks you step by step through the basics you need to know in order to communicate in French, taking full advantage of your existing knowledge of English. - "How is English relevant?" The English language uses over 6,000 French words, words like "important", "table", "description", and thousands more. If your English is reasonably good, it's a safe bet that you already know about 3,000 French words. You don't know which ones, though. And it's not just vocabulary. French grammar is very similar to English's grammar. Learning French should be a breeze, but usually, it's not. This book validates your

existing knowledge of French - a knowledge you didn't know you had - to help you Learn French, *The Easy Way!* All roads lead to Rome... but some are easier and faster! - How long does it take to go from London to Paris? Most people would say, "about 1 hour", because that's how long it takes if you take a direct flight out one of London's airports. Or if you're driving, it will take 6 hours on the shortest route. But on foot, without a map and traveling at random? It could take years and years, going through Moscow, LA, Uganda, Nicaragua, Brazil, Quebec... A lot of people wouldn't make it at all. Learning a language is a lot like that. You think you are on a straight path but chances are, that's not true. Most people end up lost along the way and never actually learn more than a few set phrases, in spite of years of language studies in school. Going from London to Paris can take about an hour, but only if you take a direct flight. Most students think, "Ok, I'm going to learn French", and in their mind, it is all about how hard they study and how smart and how talented they are. It seldom occurs to them how big of an issue what they are studying is. Mostly, they just

blame themselves, "well, I guess I am just not good at languages." Of course, you have to study, and some people have an easier time than others, but: Are you on a direct flight from London to Paris, or are you on foot and lost in the middle of some jungle with a lousy map and a compass that doesn't work properly? You could spend years studying French without ever learning to communicate in French. Case in point, the average English speaker knows thousands of French words... and yet the average English speaker sure can't speak French. Studying at random isn't going to help much. As long as you are missing the keys fundamentals of the French language, you will get no closer to speaking French. NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next,

you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
