CRISTOPHER BAILEY

The Crusades Through Arab Eyes Bantam Books for Young Readers

It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime. This text focuses on the question: what is lost when a language dies?

On Paper LIT Verlag Münster

Border regions around the new eastern and south-eastern edges of the European Union have seen the re-emergence of previous cultures and ethnicities. This has caused a reappraisal of people's relationship with history. Border-related institutions established at international, regional and local levels have endeavoured to make the border regions places of cultural encounter, providing a new way forward for future generations through new kinds of cooperation.

This book represents a reconstruction of the Proto-Germanic vocabulary as attested in ancient and modern Germanic languages and projected to the Proto-Germanic level. The volume contains valuable linguistic information giving an outline of Proto-Germanic language, culture and pre-historic tradition. It is the first attempt to reconstruct the Proto-Germanic lexicon after the work of Falk and Torp in the beginning of the XXth century.

Adapting to Modernity Soffer Publishing

Analyses the development of Portuguese and Spanish from Latin and their subsequent transformation into several non-standard varieties. Clements demonstrates that grammar formation not only takes place in parent-to-child communication, but also in adult-to-adult communication. He argues that cultural identity and cognitive abilities are important factors in language formation and maintenance.

Profoundly concerned with the properties of access, perceptual complexity, and pragmatic presuppositions, here formalized as a calculus of markedness, this study attempts to provide a highly principled explanation of morphological complexity and change. Here, markedness is construed as a qualitative statement, as a natural parametric device, and not as an empirically empty algorithmic tool. This work is fundamentally concerned with iconicity as a property of grammatical encoding. A major contribution to a dynamic theory of language as a communicative endeavor, this study is strongly oriented towards universals with prognostic capacity. Moreover, the terms morphology and naturalness are here given biological reference, keyed as they are to the basis for a biology of language, and it is thus altogether fitting that this first English-language version of a work that has long enjoyed critical airing in Europe be prefaced with an essay by none less than Rupert Riedl -- Back cover.

TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Lexicon Grammaticorum John Wiley & Sons

Natural Morphology is the term the four authors of this monograph agreed on to cover the leitmotifs of their common and individual approaches in questions of theoretical morphology. The introduction summarizes the basic concepts and strategies of Natural Morphology, to be followed by Mayerthaler who deals with universal properties of inflectional morphology, and Wurzel with typological ones which depend on language specific properties of inflectional systems, and Dressler with universal and typological properties of word formation. The final chapter by Panagl is an indepth study of diachronic evidence for productivity in word formation and for the overlap of word formation with inflectional morphology.

Chinese philosophy is often dismissed as either too underdeveloped or too mystical in comparison to the well-developed philosophies of the West. However, Mou Zongsan, arguably the most important Chinese philosopher of the twentieth century, devoted the majority of his more than sixty-year career to establishing and fostering a dialogue between Western and Eastern philosophy. To achieve this, he produced volumes of original work that detailed how Chinese philosophy addresses many of the same universal issues as Western philosophy and how, when combined with Western thought, it has much to contribute toward producing a universal value system. In 1978, Mou Zongsan delivered a series of lectures to graduate students outlining his unique East-West comparative approach. Published in Chinese in 1983, the transcription of those lectures has been a primary resource for learning about Chinese philosophy. In Nineteen Lectures on Chinese Philosophy, these public addresses are presented in English for the very first time. Rigorously researched and cross-referenced with Mou's previous works, this meticulous translation also includes synopses and key concepts that further enhance this essential resource for anyone interested in a deeper study of Chinese philosophy.
