 Men love shortcuts. If there's a way to accomplish a job quicker and more efficiently, they're all for it. That goes for work and working out. Now, new research shows that as little as 15 minutes of resistance training is just as effective in spiking a man's metabolism—his fat-burning furnace—as a workout lasting more than twice as long. All it takes is 15 minutes to achieve lifelong results—and men are more likely to stick to an exercise plan if it's chopped down to those 15 minutes. The Men's Health Big Book of 15-Minute Workouts contains fast-paced circuit training and interval workouts that boost calorie burn, build muscle, and fry belly fat in half the time of regular workouts. Readers can choose from at-home, body-weight-only workouts and total-body barbell programs to exercises that target major muscle groups—the chest, arms, legs, and back—and sport-specific workouts. Other

highlights include: - a special section of 15-minute core workouts to build a rock-hard six-pack - an eating plan with delicious meals that take 15 minutes or less to prepare - workouts for the office or when you're traveling and can't make it to the gym - hundreds of tips from America's best trainers, nutritionists, and exercise scientists

Les services internet, nécessitant des cycles de développement

rapides, avec des fonctionnalités toujours plus nombreuses pour les utilisateurs, ont conduit au développement des méthodes de type agile en entreprise. En parallèle, les exigences à fournir des solutions utiles et utilisables par les usagers rendent la conception des systèmes, services et produits de plus en plus complexes. La méthode agile centrée utilisateurs est une solution d'intégration mutuelle de la conception centrée utilisateurs (où les notions d'itération et de recherche de feedbacks tiennent un rôle important) et de la méthode agile Scrum (orientée gestion de projet) en vue d'apporter plus de garanties sur le produit fini en termes d'utilisabilité. Elle est basée sur l'imbrication de ces deux méthodes, en phase de conception, et sur la réalisation de tests-utilisateurs courts qui permettent de prendre en compte les utilisateurs en phase de développement.
