First Big Book of Space Orient Blackswan

"A compelling appeal, at just the right time, for continuing to look up."—Air & Space America's space program is at a turning point. After decades of global primacy, NASA has ended the space-shuttle program, cutting off its access to space. No astronauts will be launched in an American craft, from American soil, until the 2020s, and NASA may soon find itself eclipsed by other countries' space programs. With his signature wit and thought-provoking insights, Neil deGrasse Tyson—one of our foremost thinkers on all things space—illuminates the past, present, and future of space exploration and brilliantly reminds us why NASA matters now as much as ever. As Tyson reveals, exploring the space frontier can profoundly enrich many aspects of our daily lives, from education systems and the economy to national security and morale. For America to maintain its status as a global leader and a technological innovator, he explains, we must regain our enthusiasm and curiosity about what lies beyond our world. Provocative, humorous, and wonderfully readable, *Space*

Chronicles represents the best of Tyson's recent commentary, including a must-read prologue on NASA and partisan politics. Reflecting on topics that range from scientific literacy to space-travel missteps, Tyson gives us an urgent, clear-eyed, and ultimately inspiring vision for the future. *National Geographic Kids Everything Space* National Geographic Kids A journey to the International Space Station: the making of the biggest media project ever filmed in orbit. In Summer 2021, PHI and EMMY(R) Award-winning digital entertainment pioneers Felix & Paul Studios will launch the public into an infinite universe. A groundbreaking immersive VR exhibition will enable the audience to visit the ISS, where they encounter experiments, zero-gravity living, and breathtaking spacewalks.
