Body electronics is a self-healing system that utilizes nutrient saturation through diet and supplementation. Thomas Chavez learned this discipline under its developer, Dr. John Whitman Ray, and in *Body Electronics*, Chavez expands it to cover every imaginable trauma and illness. The basis for the approach is the melting of melanin protein complexes (crystals) in the body that develop through years of poor diet, insufficient water, poor bowel ecology, and other factors. The book addresses such topics as how to achieve appropriate levels of nutrient saturation with the right combination of enzymes and minerals; how much water to drink and why it's important; how eating cooked food can be a damaging addiction; and how to achieve a healthy relationship with bacterial flora for intestinal health. In addition to physical wellness, the book addresses spiritual and psychological well being. The results of body electronics have been called miraculous; this book shows why.

Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that “teams and players have winning streaks,” that “flattery works,” or that “the more people who agree, the more likely they are to be right”—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.

All natural health treatments, whether they involve dietary changes, vitamin or herbal supplementation, detoxification therapies, or bodywork, focus on removing the disease causing agents using the body's own power of healing. This process often brings on an unpleasant reaction known as the 'healing crisis'. Unlike a disease crisis (illness) the healing crisis is a sign of improving health. In this book you will learn how to distinguish between a healing crisis and a disease crisis. You will learn how healing works, what to do, and what not to do to facilitate healing, and how to cope with unpleasant symptoms until the crisis is over. If you undergo any type of natural healing program, you must be well informed about the symptoms and processes of the healing crisis. The book will guide you through the natural healing process.

Disease Signs in the Iris is intended for those who already have knowledge of the basic principles of irisdiagnosis. Part 1 is a translation from the German of the original work on iris interpretation by Theodor Kriege: Krankheitszeichen in der Iris. The disease signs are considered and explained as shown in original iris photographs. With few exceptions the conditions depicted have been confirmed by special methods of diagnosis, such as radiographic and blood investigations, as well as by the findings of surgical operations. The monochrome photographs especially highlight the structural changes and contrast values. The original text has been translated by A.W. Priest, and in Part 2 he correlates the iris findings with appropriate herbal and biochemical medication.

Iridology is the science of observing and identifying marking in the iris. These markings represent a person's genetic blueprint and congenital characteristics, and offer a means of evaluating the functioning of various bodily organs. Iridology is a completely noninvasive, natural option for diagnosing disease and illness via analysis of the eyes. This book is an indispensable source for enthusiasts of alternative medicine. Contains a rare collection of color photographs of eyes illustrating the principles of this growing field.

In *Foods That Heal*, Dr. Bernard Jensen uses the teachings of Hippocrates and VG Rocine, as well as his own research and theories, to offer compelling evidence that what we ingest has a profound effect on our health and wellbeing. Part One may change the way you look at your next meal. The section contains a host of helpful troubleshooting advice: health cocktails for common ailments, herbal teas, tonics, vitamin- and mineral-packed food combinations, and detailed data on the roles foods play in the optimum efficiency of specific bodily systems, functions, and overall health. Part Two provides an easy-to-understand guide to fruits and vegetables. Each listing in this section presents a history of use, a buyer’s guide, therapeutic benefits, and nutrient information. Part three contains easy-to-prepare recipes utilizing the “Foods That Heal.” Each recipe makes use of the freshest and most natural ingredients – ingredients that are not processed or altered by chemical preservatives, food colorings, or additives. Both those looking to improve their health and those interested in taking an active role in enhancing their overall wellbeing will find this book interesting, informative, and full of common-sense suggestions for attaining good health through proper nutrition.

Operation Big Fun Basic Health Publications

A complete guide to decoding the iris to reveal health predispositions for prevention and early treatment • Details the fundamental reflex signs of iridology and how to identify constitutional strengths and weaknesses in the stroma, pigments, and capillaries of the eyes as well as read energy patterns in pupil tone • Explores the history and development of iridology from the 18th century to today • Includes analysis of real case studies with full-color photos and illustrations The iris of your eye is a personal and unique identifier that expresses much more about us than we can imagine.

Through detailed observation of the irises’ stroma, pigments, and capillaries, you can determine a person’s constitutional strengths and weaknesses and gain insight into their genetic predisposition to certain illnesses as well as preventive and treatment options that would be most effective. By reading the iris, practitioners of natural medicine can interpret the signs that reveal a client’s lifestyle choices and use this knowledge to make enlightened decisions regarding the client’s health plan and how to help them realize their full potential. In this full-color guide, Gustau Pau, an iridologist with more than 35 years of experience, details the chromatic scale and signs expressed in the eyes and how to use them to identify organs and their function as well as susceptibility to specific ailments. He explores the history and development of iridology from Hildegard von Bingen’s work on healing to 18th-century European scientists, including Ignaz von Peczely, the father of modern iridology. He reveals recent iridology developments on identifying genetically inherited physical traits, explaining how individuals can use this insight to make nutritional and lifestyle choices that will offset inherited weaknesses and bolster strengths. Focusing on the digestive system, he shows how the pupillary zone can reveal digestive function and demonstrates how diet is responsible for causing many diseases. The author also explores miasmas in the eyes, includes methods for reading energy patterns in pupil tone, and offers the scientific explanation for the old contention that the “eyes are the windows of the soul.” Illustrating the fundamental signs that iridologists use for reference, Pau provides sample iridographies and real case studies with photos and diagrams. Explaining how scientific research on the eye has not yet caught up with the innovations of iridology, he shows how the eyes reveal both our internal state and future health and have a much broader role in the body that we are only now just discovering.

Iridology HarperThorsons

The famous adage "The eyes are the windows to the soul" is more than just a lovely metaphor. It's the principle behind behavioral iridology (BI), which assesses personality types, social attributes, and romantic attraction based on iris patterns. Everyone's iris type is classified in one of two ways: the "thinking type" or the "emotional type." In BI studies, the astonishing revelation is that 85 percent of married couples have opposing iris patterns. Opposites are known to attract, but what happens when those differences eventually cause relationship issues rather than intimacy? Jim Verghis, BI, founder of the Institute of Behavioral Iridology, applies this method and explores its effect on long-term relationships. In addition to revealing the nature of attraction, he delves into key elements of maintaining a healthy and loving relationship: personal responsibility, communication, and self-love. Learn to be more aware and respectful of yourself and your partner. Discover the importance of honest communication and effectively voicing your needs. Recognize the foundation and practices of accepting who you are. Filled with numerous strategies and tools, Behavioral Iridology teaches you and your partner to break destructive patterns and look inside yourselves for lasting, meaningful relationship solutions.

After years of living with severe rheumatoid arthritis, Lyme disease, anxiety, and ulcers, Hilde Larsen finally decided she was done with hospitals, medications, and living a miserable existence. It was a choice that soon propelled her onto a lonely journey where she would courageously battle to not just overcome her physical challenges, but also to find her true purpose and a new beginning. As she leads others through her journey from a total loss of health and vitality back to the life of her dreams, Larsen details her downward spiral triggered by processed foods, recurrent ulcers and stomach issues, chronic pain, and ultimately the diagnoses of rheumatoid arthritis and Lyme disease. Still, as Larsen reveals, she determinedly held onto hope and a message from an inner-voice that she could be healed and made a life-changing decision that would take her down a new path where she stopped the medications that masked her symptoms, transformed her diet, revisited and healed old wounds, and finally bid farewell to her old self and body. Through it all, Larsen demonstrates that even the greatest of challenges in life can be conquered with faith, perseverance, hope, and love. From HELL to Inspired chronicles one woman’s incredible quest to free herself from an unhealthy existence, fulfill her dreams, and inspire others to take back their power.

Irisdiagnosis is the Science of diagnosing illness from the marks and colour changes in the iris of the human eye, developed from the original observations and research of Ignaz von Peczley, a Hungarian, who published his findings in 1880. Much research has followed and this method of diagnosis is now applied by homeopathic and naturopathic practitioners in both Europe and America. In *Fundamental Basics of Irisdiagnosis* Theodor Kriege shows you how to practise this for yourself, guiding you through the essentials of the process and teaching you how to diagnose accurately.

The Foundations of Iridology Penguin

Health Magic Through Chlorophyll Random House

Bernard Jensen, who pioneered Iridology in the United States, presents a basic introduction to this science which analyzes the delicate structures of the iris to reveal and locate inflammation in the body. Readers are given an explanation of how the chart works, including detailed illustrations of iris topography showing individual systems charts, and over two dozen color photographs of irises diagnosing stages of different ailments. This book supports Jensen's belief that iridology is an important element in the total, holistic health care program.

Some of the Praise for No Sense of Obligation . . . fascinating analysis of religious belief -- Steve Allen, author, composer, entertainer [A] tour de force of science and religion, reason and faith, denoting in clear and unmistakable language and rhetoric what science really reveals about the cosmos, the world, and ourselves. Michael Shermer, Publisher, Skeptic Magazine; Author, How We Believe: The Search for God in an Age of Science About the Book Rejecting belief without evidence, a scientist searches the scientific, theological, and philosophical literature for a sign from God--and finds him to be an allegory. This remarkable book, written in the laypersons language, leaves no room for unproven ideas and instead seeks hard evidence for the existence of God. The author, a sympathetic critic and observer of religion, finds instead a physical universe that exists reasonlessly. He attributes good and evil to biology, not to God. In place of theism, the author gives us the knowledge that the universe is intelligible and that we are grownups,

responsible for ourselves. He finds salvation in the here and now, and no ultimate purpose in life, except as we define it.

Visions of Health Bernard Jensen Publisher

We all want to live healthier, happier and longer lives, but too many of us are charmed by charlatans, misled by marketing or scammed by sciencey-sounding salespeople. Dr Brad McKay, Australian GP and science communicator, has seen the rise of misinformation permeate our lives and watched as many of us have turned away from health experts. Too often, we place our trust in online influencers, celebrities and Dr Google when it comes to making important health decisions. Fake Medicine explores the potential dangers of wellness warriors, anti-vaxxers, fad diets, dodgy supplements, alternative practitioners and conspiracy theories. This book is an essential tool for debunking pseudoscience and protecting you and your loved ones from the health scams that surround us. Protect your mind, body and wallet by fighting fake medicine.
