My Sister the Vampire #1: Switched Peeters Publishers

In 1990 the Department of Graphic Arts at the Louvre made their holdings available to guest curators for a program called Parti Pris, or "Taking Sides". In this program, major cultural figures outside of the discipline of art history organized exhibitions based on the department's collection. Within its first several years, this novel collaboration produced exhibitions curated by philosopher Jacques Derrida and filmmaker Peter Greenaway. Jean Starobinski, noted literary critic and intellectual historian from the University of Geneva, was selected as the third curator in the program. In his exhibition and accompanying essay, Starobinski explores the theme of largesse in its broadest sense. Arguing that gift giving and receiving are fundamental human gestures, he examines graphic and textual representations from the offering of the apple to Eve to Salome's gift of the head of John the Baptist, from the giving of laws to the gift of death. Charity, the poetic gift, and the benefits of Fortune all play a role in Starobinski's extended meditation on the act of donation. Lavishly illustrated and dazzling in its scope and imagination,

Largesse is an exemplar of the rich intellectual work that can result from crossing disciplinary boundaries and considering history as a dense network of themes and allusions.

DIZIONARIO FRANCESE, ITALIANO, INGLESE University of Chicago Press

The history of the Order of Friars Minor during the first one and a half centuries of its existence is maybe the most studied period of the 800 years of Franciscan presence in the Church. The publication of the Sources for the lives of Saint Francis and Saint Clare of Assisi in all the main European languages has been of considerable help to spread the historical knowledge regarding Francis of Assisi and his movement and make it available to the average reader. Among these Sources, the *Chronica XXIV Ministrorum Generalium Ordinis fratrum Minorum* by Arnald of Sarrant merits particular attention. It tells the story of the Franciscan Order from the time of Saint Francis till the beginning of the Western Schism in 1378, and therefore contains valuable information regarding the initial period of Franciscan history.

Unfortunately it is not easily available in translation because of its voluminous nature. In fact, it covers a total of 712 pages of the third volume of *Analecta Franciscana*, published by the Franciscan editors of Quaracchi in 1897. Our aim has been that of embarking on the arduous task of translating this voluminous work of history into English from the original Latin. This translation is the fruit of three years of work, and we are now happy to present it to the general public. Because of its voluminous nature we intend to divide it into 5 sections, four of which cover the 575 pages of text and one the appendixes. The whole 575 page Chronicle is here available in 4 sections covering respectively the following historical periods: (1) Saint Francis and the early Franciscan fraternity; (2) The Generals from brother Elias as vicar (1227) to Saint Bonaventure (1274); (3) The Generals from Jerome of Ascoli (1274) to Michael of Cesena (1328); (4) The Generals from Gerard Eudes (1329) to Leonard of Giffoni (1378). A last section will be the translation of the appendixes. The translation is enriched by footnotes and explanations on the various historical events narrated and on the personages of the Chronicle. Our aim has been simply that of providing a readable translation, without pretending to be scholars of mediaeval Latin. We hope that the service we are offering at such an enormous cost of time and personal effort will be of benefit both to students of Franciscan history as well as to those who are qualified to correct its inaccuracies, and who we gratefully thank for their eventual advice and corrections

The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi

argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

This collective volume contains studies in the field of ancient grammar, poetics and philosophy of language. The contributions, written by specialists in the field, focus on central themes in the historiography of ancient linguistics, such as the status of grammar as a discipline in Antiquity, the relationship between poetics and grammatical theory, the constitution and development of the word class system, the descriptive format of grammars, the nature and description of specific word classes, the development of grammatical argumentation. In addition, several methodological issues in the study of ancient grammar and philosophy of language are dealt with: the problem of continuity vs. discontinuity in the history of linguistic thought, the role of schoolroom activities in the development of grammatical description and theory-formation, and problems concerning "tradition", "influence" and "originality" in ancient linguistics. The volume is rounded off with extensive indices of proper names, concepts and technical terms.

This book explores how the Medici Grand Dukes pursued ways to expand their political, commercial, and cultural networks beyond Europe, cultivating complex relations with the Ottoman Empire

and other Islamicate regions, and looking further east to India, China, and Japan. The chapters in this volume discuss how casting a global, cross-cultural net was part and parcel of the Medicean political vision. Diplomatic gifts, items of commercial exchange, objects looted at war, maritime connections, and political plots were an inherent part of how the Medici projected their state on the global arena. The eleven chapters of this volume demonstrate that the mobility of objects, people, and knowledge that generated the global interactions analyzed here was not unidirectional—rather, it went both to and from Tuscany. In addition, by exploring evidence of objects produced in Tuscany for Asian markets, this book reveals hitherto neglected histories of how Western cultures projected themselves eastwards.
