This book started as a self-serving exercise to personally organize the major details and interesting facts of each Indianapolis 500 over the hundred-plus-year history of the greatest race in the world. For many of us passionate racing fans who have attended a multitude of 500s, there is a tendency for the details of the races to (somewhat) blend together. I

hope this book will help to provide clarity in this regard as well as educate. During high school, many of us chose to use CliffsNotes to assist in the education process. This book is somewhat patterned after that concept. It falls somewhere between Donald Davidson and Rick Schaffer—the best and by far the most detailed book on the history of the Indianapolis 500—and a multitude of pictorial books with limited information. I hope it will prove to be an easy read with entertaining and educational information. *Jim Clark* Motorbooks

Gives a unique insight into design and project work for a number of companies in the motor industry. It is aimed at both automobile enthusiasts and to encourage upcoming generations to consider a career in the creative field. Written in historical order, it traces the changes in the car design process over nearly 50 years. *Motor Sport* Simon and Schuster  
As Lewis Hamilton, Max Verstappen and Charles Leclerc battle it out head-to-head in the most hotly contested championship in years, this in-depth book, with a foreword from Haas team principal

Guenther Steiner, tells the story of how the sport evolved into the exhilarating high octane spectacle it is today. The new rules introduced in 2022 signal the greatest change to F1 in a generation, cracking the field wide open and seeing some of the most compelling and competitive races in the last 25 years. Technical changes aimed at levelling the playing field for the teams combined with the sport's tightening budget cap have made the races closer than ever. There will be more sprint races - trialled in 2021 - and greater fan interest driven by Netflix's hugely successful 'Drive to Survive' series. So, how did we get here? How did F1 become the acknowledged 'Pinnacle of Motorsport'? Simon Arron and Tony Dodgins have identified the 100 most significant changes to the series since its inception in 1950. Formula One is unrecognizable from its debut season, where drivers raced around on old bomber training aerodrome in Northamptonshire with oil drums to mark the corners and straw bales the only concession to safety. New fans will welcome a complete and highly illustrated guide to the history of F1, while older fans will be able to

compare their own views of what were the pivotal moments of change, in a book written by experienced motoring writers with two lifetimes worth of knowledge of the sport. The book will link technical progress with the personalities involved, indeed many of the swiftest changes have come about as a result of accidents or tragedies - the death of Roland Ratzenberger at Imola in 1994, the same weekend as Ayrton Senna, could have been avoided by the HANS safety device. The introduction of the halo saved Romain Grosjean's life in Bahrain last year, but only came about because of the tragic accident that claimed Jules Bianchi in Japan. Along with changes to circuits and the technology of the cars, this book highlights the commercial changes and the controversies that threatened to split the sport apart - such as the threat of breakaway series proposed at various times by teams. A must-read for completists or for those new to the sport, F1: The Pinnacle is a fascinating insight into one of the most exciting and dangerous sports in the world.

After finishing as runner-up three times in the drivers' world championship, in 1992 Mansell finally secured the title. It was the crowning achievement of a hugely successful career, in which he won 31 Grand Prix, a record for a British driver that stood until Lewis Hamilton overhauled him in 2014. Always an aggressive driver, his exciting style meant he was hailed as a hero by his millions of fans in the UK and around the world. Out of the car, he was outspoken and charismatic, which merely served to enhance his reputation. Now, 20 years after he retired from F1, Mansell looks back on a stellar career in which he battled against many legends of the sport, from Lauda through the Senna and Prost years and on to Schumacher. He provides vivid insights into what it was like to race against those greats in an era when the risks to drivers were enormous. He explains what motivated him to get to the top, and takes the reader behind the scenes to give an unrivalled insight into the sport and the key moments of his career. Still closely involved in Formula One, Mansell assesses how F1 has changed, and gives his authoritative verdict on the sport, the cars and the

drivers. It is an unmissable account from one of Britain's greatest sporting heroes. **Formula One: The Pinnacle** McFarland The Britannica Book of the Year 2011 provides a valuable viewpoint on the people and events that shaped the year. In addition to keeping the Encyclopaedia Britannica updated, it serves as a great reference source for the latest news on the ever-changing populations, governments, and economies throughout the world.

Conceived by Colin Chapman, the Lotus 72 is one of the most successful Formula 1 cars ever made. This innovative car - with its wedge-shaped profile, side-mounted radiators and inboard front brakes - was driven during 1970 by Jochen Rindt, Formula 1's posthumous World Champion, and also gave Emerson Fittipaldi the World Champion's crown in 1972. Here, in this new Haynes Manual, is a unique

perspective on what it takes to restore, maintain and race a Lotus 72, as well as an insight into the design and engineering of this legendary racing car.

There has been an explosion in the quantity of sports history literature published in recent years, making it increasingly difficult to keep abreast of developments. The annual number of publications has increased from around 250 to 1,000 a year over the last decade. This is due in part to the fact that during the late 1980s and 90s, many clubs, leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements. It is also the result of the growing popularity and realisation of the importance of sport history research within academe. This international bibliography of books, articles, conference proceedings and essays in the English language is a one-stop for the sports historian to know what is new.

**Motor Racing - The Pursuit of Victory 1930-1962** SAE International

Stunning photographs from motor racing history, most previously unpublished, in a book that examines the many facets of Grand Prix racing before the dominance of television. A beautiful look at a fascinating time in motor racing.

Almost unknown when in 1945 he purchased the Indianapolis Motor Speedway and its famous race, Tony Hulman soon became a household name in auto racing circles. He is credited not only with saving the Speedway from becoming a residential housing development but also with reinvigorating auto racing in the United States. Until his purchase of the Speedway, Hulman had not been involved in auto racing; he was the CEO of Hulman & Company, a wholesale grocer. An astute businessman, Hulman made Clabber Girl Baking Powder a national brand and successfully led the reorientation of the family fortunes to include a range of businesses including a beer company, a Coca-Cola franchise, a broadcast empire, and real estate and gas companies. This biography of Hulman covers his many ventures, particularly the

Indianapolis Motor Speedway and Indianapolis 500, and his philanthropy. *Ford Total Performance* Bloomsbury Publishing USA

This is an account of how the small British Team Lotus took the mighty Indianapolis establishment, from the initial European participation in 1961-2 through to 1969. The book gives an insider's account of the dramatic era, and details case histories of each of the 25 cars built.

The Cars of Vel Miletich and Parnelli Jones  
David and Charles

A history of the British influence on the Indianapolis 500, including not only the drivers and cars, but the many others - mechanics, designers, and officials - who have been involved. The story is set out in a series of stand-alone chapters, with a wide variety of informative sidebars, and goes back 100 years to the early days of the race, through the British-led, rear-

engined revolution of the 1960s to the present day.

Forty years after he launched his professional racing career, Mario Andretti's stature in the history of motorsports remains unparalleled. His accomplishments speak for themselves: four-time USAC and CART champion, 1978 Formula One World Champion, 1969 Indy 500 winner, 1967 Daytona 500 winner, and three-time Sebring 12 Hours winner. Jim Clark was a genuine sporting hero. He won 25 of his 72 Grands Prix and in the sixties was the yardstick by which every other driver on the starting grid was judged, and by which they judged themselves. Quite simply, Clark was peerless. Stubborn and notoriously indecisive outside the car, he would nervously chew his fingernails, but he was a genius when he got behind the wheel. To many he remains the greatest racing driver of all time, not just because of his fearsome strike rate and the magnitude and manner of his achievements, but also

because he remained humble and unspoiled throughout. Published on the 50th anniversary of Clark's death, this book, 20 years in the making, is a deeply detailed look at a complex and compelling character.

**Lotus** David and Charles

This book is not so much about racing as it is about race people. These are the people who do the racing, or run the races, or go to races, or hang around racing, or make money from racing. They are generally lively people, sharp-edged, with-it. This is a book about the Indianapolis style of auto racing, and the story is told from the participant's point of view.

**Staying on Track** Routledge

Out of print for twenty years, a new edition of Jim Clark 'Tribute to a Champion' by Eric Dymock will be published in the spring. Lightly edited and completely redesigned in colour throughout, this eagerly sought classic of motor racing celebrates the life and achievements of Jim Clark (1936-1968), World Champion 1963 and 1965. In the new book, Eric Dymock details his place in motor racing history and total command of Formula 1, portraying him as an individual, nail-biting

and insecure, yet the greatest driver in any sort of motor sport. From a Scottish farming family Clark rewrote the annals of American racing at Indianapolis, coming second at his first attempt in 1963, winning in 1965. He seemed a match for any odds during eight dangerous years at the top of motor racing, yet died in an unlikely accident at a minor event at Hockenheim on April 7th 1968. Genius at the wheel was not enough. Rivals' subsequent safety campaigns saved countless lives on and off the track. Eric Dymock observed Clark from before he ever sat in a racing car, covering his professional career as member of The Motor magazine staff from 1962, and then as specialist motor racing correspondent from 1966. This book has photographs of Jim Clark's birthplace, home, memorabilia and archive material from the Jim Clark Room at Duns. The measured analysis throws light on the tense mood of Formula

1 in the hazardous 1960s when Clark narrowly missed four consecutive world titles. Misfortune in the closing laps of the final race of the season twice denied him a unique quartet. Some of his other records remain secure however. Clark's eight "grand slams" (pole position, leading every lap, fastest lap and winning a Grand Prix - his closest rivals Alberto Ascari and Michael Schumacher managed only five) is unlikely to be matched. The new edition will go on sale in the spring at regular bookshop prices for a new generation of Formula 1 fans, as the 50th anniversary of Clark's accident approaches.

Edible Plants David and Charles For over a decade, artist Jimmy Fike traveled across the continental United States in an epic effort to photograph wild edible flora. Edible Plants is the culmination of that journey, featuring over 100 photographs that Fike has selectively colorized to highlight the comestible part

of the plant. While the images initially appear to be scientific illustrations or photograms from the dawn of photography when plants were placed directly on sensitized paper and exposed under the sun, a closer look reveals, according to Liesl Bradner of the Los Angeles Times, "haunting [and] eerily beautiful" photographs. Beyond instilling wonder, Fike's contemporary, place-based approach to landscape photography emphasizes our relationship to the natural world, reveals food sources, and encourages environmental stewardship. His clever and beautiful method makes it easy to identify both the specimen and its edible parts and includes detailed descriptions about the plant's wider purposes as food and medicine. Sumptuously illustrated and delightfully informative, Edible Plants is the perfect gift for anyone curious about unlocking the secrets of native North American plants.
