Set against the cultural and political backdrop of interwar Europe and the Americas, *Poetry in Pieces* is the first major study of the Peruvian poet Cesar Vallejo (1892-1938) to appear in English in more than thirty years. Vallejo lived and wrote in two distinct settings---Peru and Paris---which were continually crisscrossed by new developments in aesthetics, politics, and practices of everyday life. Michelle Clayton combines close readings of Vallejo's writings with cultural, historical, and theoretical analysis, connecting Vallejo---and Latin American poetry---to the broader panorama of international modernism and the avant-garde, and to writers and artists such as Rainer Maria Rilke, James Joyce, Georges Bataille, and Charlie Chaplin. *Poetry in Pieces* sheds new light on one of the key figures in twentieth-century Latin American literature, while exploring ways of rethinking the parameters of international lyric modernity.

An account of the way social relations governing the production of cotton in Peru's South Coast changed as capitalism penetrated Peru's agrarian base; the analysis is unusual in that the author looks at the plantation system from a "peasant" poi

Arequipa, Peru's second largest city, has the most intense regional culture in the central Andes. Arequipeños fiercely conceive of themselves as exceptional and distinctive, yet also broadly representative of the nation's overall hybrid nature—a blending of coast (modern, "white") and sierra (traditional, "indigenous"). The Independent Republic of Arequipa investigates why and how this regional identity developed in a boom of cultural production after the War of the Pacific (1879-1884) through the mid-twentieth century. Drawing on decades of ethnographic fieldwork, Thomas F. Love offers the first anthropological history of southwestern Peru's distinctive regional culture. He examines both its pre-Hispanic and colonial altiplano foundations (anchored in continuing pilgrimage to key Marian shrines) and the nature of its mid-nineteenth century "revolutionary" identity in cross-class resistance to Lima's autocratic control of nation-building in the post-Independence state. Love then examines Arequipa's early twentieth-century "mestizo" identity (an early and unusual case of "browning" of regional identity) in the context of raging debates about the "national question" and the "Indian problem," as well as the post-WWII development of extravagant displays of distinctive bull-on-bull fighting that now constitute the very performance of regional identity. Love's research reveals that Arequipa's "traditional" local culture, symbolically marked by populist, secular, and rural elements, was in fact a project of urban-based, largely middle-class cultural entrepreneurs, invented to counter continuing Limeño autocratic power, marked by nostalgia, and anxious about the inclusion of the nation's indigenous majority as full modern citizens.

Transnacionalidad e hibridez en el ensayo hispánico LID Editorial

Adding to the burgeoning study of medicine and science in Latin America, this important book offers a comprehensive historical perspective on the highly contentious issues of sexual and reproductive health in an important Andean nation. Raul Necochea Lopez approaches family planning as a historical phenomenon layered with medical, social, economic, and moral implications. At stake in this complex mix were new notions of individual autonomy, the future of gender relations, and national prosperity. The implementation of Peru's first family planning programs led to a rapid professionalization of fertility control. Complicating the evolution of associated medical services were the conflicting agendas of ordinary citizens, power brokers from governmental and military sectors, clergy, and international health groups. While family planning promised a greater degree of control over individuals' intimate lives, as well as opportunities for economic improvement through the effective management of birth rates, the success of attempts to regulate fertility was far from assured. Today, Necochea Lopez observes, although the quality of family planning resources in Peru has improved, services remain far from equitably available.

This volume examines how the essay, a privileged genre for the articulation of national identities in Latin America and Spain for decades, is being reconfigured in the present age of globalisation and transnationalisation. Este volumen estudia cómo el ensayo, que durante décadas ofreció un foro privilegiado a la articulación de identidades nacionales en Latinoamérica y España, se está reconfigurando en una era de globalización y transnacionalización.

This groundbreaking history explores the many unrecognized, enduring linkages between the state of California and the country of Chile. The book begins in 1786, when a French expedition brought the potato from Chile to California, and it concludes with Chilean president Michelle Bachelet's diplomatic visit to the Golden State in 2008. During the intervening centuries, new crops, foods, fertilizers, mining technologies, laborers, and ideas from Chile radically altered California's development. In turn, Californian systems of servitude, exotic species, educational programs, and capitalist development strategies dramatically shaped Chilean history. Edward Dallam Melillo develops a new set of historical perspectives—tracing eastward-moving trends in U.S. history, uncovering South American influences on North America's development, and reframing the Western Hemisphere from a Pacific vantage point. His innovative approach yields transnational insights and recovers long-forgotten connections between the peoples and ecosystems of Chile and California.

Domination and Cultural Resistance examines the social life of the Yura, a Quechua-speaking Andean ethnic group of central Bolivia, and focuses especially on their indigenous authorities, the kuraqkuna or elders. Combining ethnohistorical research with contemporary fieldwork, Roger Neil Rasnake traces the evolution of leadership roles within the changing composition of the native Andean social groupings, the ayllus—from the consolidation of pre-Hispanic Aymara polities, through the pressures of the Spanish colonial regime and the increasing fragmentation of the republican era, to the present.

This study of Peru's transformation from a tottering colonial economy based on extraction of precious bullion to a massive exporter of bulk goods like guano shows how a struggle between protectionists and free traders shaped the state. "This is an elegant and sophisticated book that can be read on many levels, written by an author who never takes the facile road. [Its] significance is great—not just for Peruvian history but for theoretical questions relating to dependency and economic history in nineteenth-century Latin America... Gootenberg has added a major new element to the dependency debate, one that is more intellectually satisfying than the sterile old argument about good guys and bad guys."--Timothy E. Anna, *The Hispanic American Historical Review* "[One] of the best books in recent years on Peruvian history, and a valuable contribution to nineteenth-century commercial and financial studies."--Michael J. Gonzales, *Journal of Economic History* "Fascinating reading. Gootenberg has taken the why of Latin American underdevelopment a step forward by unraveling complexities of the actual historical-economic forces... [This book] is perhaps the most thorough examination of exactly how those internal class and productive forces contributed to Peru's under-development."--Choice Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. In *Economic Nationalism and Globalization: Lessons from Latin America and Central Europe* Henryk Szlajfer offers, against the background of developments in Latin America (mainly Brazil) and Central Europe (mainly Poland) in times of first globalization from late 19th century until late 1930s, a reinterpretation of economic nationalism both as an analytical category and historical experience. Also, critically explored are attempts at proto-economic nationalism in early 19th century Poland and Latin America as well as links between economic nationalism and the emergence of integral political nationalism and authoritarianism. Economic nationalism is interpreted as historically significant world-wide phenomenon intimately linked with the birth, development and crisis of capitalist modernity and as a response to underdevelopment under first globalization. Continuity of economic nationalism under present globalization is suggested.

"A book as fascinating as the history it relates . . . Galeano is a satirist, realist, and historian." —Los Angeles Times For centuries, Europe's imperial powers brutally exploited the peoples and resources of the New World. While soldiers of fortune marched across continents in search of El Dorado, white settlers established plantations and trading posts along the coasts, altering the land and bringing disease and slavery with them. In the midst of a bloody collision of civilizations, the West has birthed new societies out of the old. In the second book of his *Memory of Fire* trilogy, Eduardo Galeano forges a new understanding of the Americas, history retold from a diverse collection of viewpoints. Spanning the end of empire and the age of revolutions, *Faces and Masks* brilliantly collects the strands of the past into an iridescent work of literature.

This book is a systematic inquiry of conspiracy theories across Latin America. Conspiracy theories project not only an interpretive logic of reality that leads people to believe in sinister machinations, but also imply a theory of power that requires mobilizing and taking action. Through history, many have fallen for the allure of conspiratorial narratives, even the most unsubstantiated and bizarre. This book traces the main conspiracy theories developing in Latin America since late colonial times and into the present, and identifies the geopolitical, socioeconomic and cultural scenarios of their diffusion and mobilization. Students and scholars of Latin American history and politics, as well as comparatists, will find in this book penetrating analyses of major conspiratorial designs in this multi-state region of the Americas.

State and Society in Spanish America during the Age of Revolution calls into question the orthodox split of Latin American history into colonial and modern, arguing that this split obscures significant economic, social, and even political continuities from 1780 to 1850. In addition, the book argues that the colonial-modern division makes it difficult to appraise historical changes in a comprehensive way. The book covers an unconventional period-1750 to 1850-and looks at the continuities over this longer, more comprehensive timespan. The essays discuss late colonial and postcolonial developments in gender, racial, class, and cultural relations across Latin America and in specific regions, including Mexico, Colombia, Argentina, and Chile. By bridging these two eras and looking at the "Age of Democratic Revolution" as a whole, the book allows readers to see the coming of Latin America's struggle for independence from Spain and Portugal and the changes after independence. Written by established Latin American scholars as well as up-and-coming historians, these essays are published in this volume for the first time. This book is ideal for courses on Latin American history, including colonial history, national history, and the "Age of Revolution."

Despite post-Cold War arguments about their demise, 'Great Powers' not only continue to thrive, with lesser Powers they form the basis of the constellation of global politics. This topical new Handbook illustrates how and why the new international order has evolved - and is still evolving - since the end of the Cold War, through the application of diplomacy and statecraft. Including cutting edge contributions from over 40 scholars, the handbook is structured around seven sections: Context of Diplomacy Great Powers Middle Powers Developing Powers International Organisations and Military Alliances International Economy Issues of Conflict and Co-operation Through analysis of a wide range of case studies, the Handbook assesses the diplomacy and statecraft of individual powers, offering insights into how they function, their individual perception of national interests and the roles they play in modern statecraft. The contributors also seek to evaluate the organizations and contemporary issues that continue to influence the shaping of the new international order. A comprehensive survey of diplomacy across the world, this work will be essential reading for scholars and professionals alike.

Bolivia is an unusually high-altitude country created by imperial conquest and native adaptations - today, it remains one of the most multi-ethnic societies in the world with one of the largest Amerindian populations in the Americas. It has seen the most social and economic mobility of Indian and mestizo populations in any country in Latin America. This work, having also appeared in Spanish, Portuguese, Japanese and Chinese in its earlier editions, has become the standard survey of the history of Bolivia. In this new edition, Klein explores the changes that occurred in the past two decades under the leadership of Evo Morales and his indigenous government, and how his party has emerged in the post-Evo years as one of the most important in Bolivia. The work also expands on the changes in both the traditional mining economy and the rise of a new commercial export agriculture.
