From tulsii to turmeric, echinacea to elderberry, medicinal herbs are big business—but do they deliver on their healing promise—to those who consume them, those who provide them, and the natural world? “An eye-opener. . . .

[Armbrecht] challenges ideas of what medicine can be, and how business practices can corrupt, and expand,

our notions of plant-based healing."—The Boston Globe "So deeply honest, sincere, heartfelt, questioning, and brilliant. . . . century, it is also a worldwide industry. Yet most consumers know very little about where those herbs come from and how they are processed into the many products that fill store shelves. In *The Business of Botanicals*, author Ann Armbrrecht follows their journey from seed to shelf, revealing the inner workings of a complicated industry, and raises questions about the ethical and ecological issues of mass production of medicines derived from these healing plants, many of which are imperiled in the wild. This is the first book to explore the interconnected web of the global herb industry and its many stakeholders, and is an invaluable resource for conscious consumers

who want to better understand the social and environmental impacts of the products they buy. "Armbrecht masterfully manages the challenges and complexity of her source material . . . [She] is a spirited storyteller . . . [and] presents all this with the skill of an anthropologist and the heart of an herbalist."—Journal of the American Herbalists Guild Organic Gardening for Everyone Chelsea Green Publishing Gardening, with any kind of plant life, should be viewed as a relaxing and fulfilling activity.
