New Perspectives on Br?cke Expressionism

Montlake Romance

The contemporary world is marked by a sense of vulnerability not seen since the end of the Cold War. Climate change, migration, and political instability make people feel the inherent vulnerability of human life. Concepts of "risk" and "danger" are as relevant now as ever before for illuminating contemporary life. Yet, what changes in human lives if one interprets existence with "risk" and "danger" from the perspective of Christian faith? Does the Christian symbol system offer orientation for human lives in a time of crisis? Exploring the work of leading contemporary thinkers, Danish theologian Mikkel Gabriel Christoffersen develops a rich and varied account of Christian doctrine that enables human beings to live with risk and danger, in all vulnerability, with gratitude, courage and care for others. Christoffersen develops an interdisciplinary approach that allows him to draw upon sociological and anthropological reflections on life lived whilst facing risks and dangers. He brings these findings into conversation with Scandinavian, Anglo-American, and German theologians of risk. The

result of his endeavor is a Trinitarian theology of risk that explores the extent to which one can consider the cross of Christ a risk of the incarnation rather than its very purpose. Focusing on vital existential questions makes Christoffersen's considerations vibrant and relevant to scholars and lay-people with an open-minded, intellectual interest in contemporary Christian theology. Choruses of Young Women in Ancient Greece Simon and Schuster What is this prep school preparing them for? Camden Fisher arrives at boarding school haunted by a falling-out with her best friend back home. But the manicured grounds of Lethe Academy are like nothing Cam has ever known. There are gorgeous, preppy boys wielding tennis rackets, and circles of girls with secrets to spare. Only . . . something is not quite right. One of Cam's new friends mysteriously disappears, but the teachers don't seem too concerned. Cam wakes up to strangers in her room, who then melt into the night. She is suddenly plagued by odd memories, and senses there might be something dark and terrible brewing.

But what? The answer will leave Cam--and readers--stunned and breathless, in this thrilling debut novel. *Literature and Psychology* Palgrave Macmillan This book explores metonymy in language, gesture, music, art and film, and discusses the challenges it presents in cross-cultural communication. *Working Fire* Walter de Gruyter "Blake needs a wife in order to keep his inheritance and offers Samantha ten million dollars for a one year marriage contract. It was a marriage contract the planned for everything...except falling in love"-- **Elements of Chemistry** Cambridge Scholars Publishing An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials, practices, regions, and people are

valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social, political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as an example of how dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view. *Not Quite Enough* Oxford

The struggle to read Jeremiah 31:31-34 as Christian Scripture has a long and divided history, cutting across nearly every major locus of

Christian theology. Yet little has been done either to examine closely the varieties of interpretation in the Christian tradition from the post-Nicene period to the modern era, or to make use of such interpretations as helpful interlocutors. This work begins with Augustine's interpretation of Jer 31:31-34 as an absolute contrast between unbelief and faith, rather than the now-standard reading (found in Jerome) of a contrast between two successive religio-historical eras—one that governed Israel (the "old covenant") and a new era and its covenant inaugurated in the coming of Christ. Augustine's absolute contrast loosened the strict temporal concern, so that the faithful of any era were members of the "new covenant." The study traces Augustine's reading of an absolute contrast in a few key moments of Christian interpretation: Thomas Aquinas and high medieval theology, then the 16th and 17th century Reformed tradition. The thesis aims at a constructive reading of Jer 31:31-34, and so the struggle identified in these moments in the Christian tradition is

brought into dialogue with modern critical discussions from Bernhard Duhm to the present.

Finally, the author turns to an exegetical argument for an 'Augustinian' reading of the contrast of the covenants.

How can we bring together the study of genes, embryos and fossils? Embryos in Deep Time is a critical synthesis of the study of individual development in fossils. It brings together an up-to-date review of concepts from comparative anatomy, ecology and developmental genetics, and examples of different kinds of animals from diverse geological epochs and geographic areas. Can fossil embryos demonstrate evolutionary changes in reproductive modes? How have changes in ocean chemistry in the past affected the development of marine organisms? What can the microstructure of fossil bone and teeth reveal about maturation time, longevity and changes in growth phases? This book

addresses these and other issues and documents with numerous examples and illustrations how fossils provide evidence not only of adult anatomy but also of the life history of individuals at different growth stages. The central topic of Biology today—the transformations occurring during the life of an organism and the mechanisms behind them—is addressed in an integrative manner for extinct animals.
