 Passionaria Stoicescu is a major Romanian  
 poet and writer, author of more than 60  
 books. Important literary critics have  
 praised the qualities of her work. Here are  
 just a very few excerpts of their writings:  
 Passionaria Stoicescu is obviously a daring  
 poetess. If one notices the numerous  
 accents that can be found in the passion  
 she offers, in her steadfastness, ardor,  
 amazement, confession, risk, aspiration,  
 mental transformations, infiltrations in the

immaculate, a sort of disappointment,  
 interrogation, absolutism of innocence,  
 and consumption of incorruptibility, then  
 she is even more obstinate than any other  
 dialectics of the metamorphoses she burns  
 in without knowing how to pretend. /Ion  
 Caraion/ As once in Miss Amherst's case,  
 or as in our autochthonous environment in  
 Constanța Buzea's case, in Passionaria  
 Stoicescu's poetry the erotic feeling  
 includes something bigger: a poetess's  
 feeling. Hence, maybe a certain  
 intellectual tension of the former and a  
 certain sensuality of the latter. /Laurențiu  
 Ulici/ Writing down her own secrets, fears  
 and hopes with that clear and thin thread  
 that can lead to the invisible, being  
 accompanied by that soft melody which is  
 sung by a fiancée's voice, or by that of a  
 tormented mother, tired as that of a wife,  
 the poetess presents herself in what she

sings, suffers and offers to life with the  
 naturalness of a permanent simplicity. [...]

She will remain the same consistent  
 person to herself, to the formula of a  
 poetry characterized not only by an  
 energetic femininity, but aspiring through  
 the eloquence of her speech, through the  
 profoundness of her poetic thought, to  
 what we call poetry of reflection, perfectly  
 outlined and always of an exemplary  
 feeling of purity. /Radu Cârnelci/  
 Passionaria Stoicescu's poetry can exist  
 without any typological principles, residing  
 not only in the feminine-masculine, but  
 also in the modernism-traditionalism or in  
 the innovation-experiment. The author  
 does not feel or continue with the  
 distinctions that are characteristic to her  
 chronological generation, nor does she  
 take into consideration the spatial original  
 concept. This means she ought to be

taken over like a priceless trophy. /Aureliu Goci/ An effigy for the coat of arms of our contemporary Romanian poetry, Passionaria Stoicescu's creation is an emblematic one as far as the significance of the postmodernist lyrics is concerned. As a predestination of a fulfillment in a sign, her poetry surrounds her name with nimbus, the poetess being born out of an ardent passion for all that life can give to us. Fascinating and threatening at the same time, like the vastness of a sea, she embodies the life where the temptation of the swimming goes beyond the risk of a shipwreck in Nothing. Aware of her mission, the author wanders in poetry looking for the 'code' of her freedom to plunge in disillusion, with the entire assuming of her greatness and tragic. As a unique certitude opposed to frivolousness, the word is the divine gift of the saving sacrifice in the dramatic and permanent confronting with her own limits. The author's poetic universe can be defined according to the directions of a new aesthetics, of a lucid and responsible consciousness that takes the daily occurrence into consideration, revealing its dramatic character just in that lack of meaning which is assumed in a self-referential manner. Biography becomes the element which rules the imaginary. However it is emphasized from an abysmal point of view, as a reiteration of certain mythical or Biblical message. According to the same order of the artistic act of consciousness, the poetess assumes Christ's passion in the dissipation of an existence she offers to herself, begging for the body, the Word i.e. the mind, and all this in the name of such a love and detested life which is fulfilled only through poetry. /Antonia Bodea/ Out of this World Rawat Publications Originally published in German in 1921, 'In the World War' is a fascinating and deeply personal memoir of a high-ranking Austrian diplomat who experienced firsthand the events leading up to and during World War I. As the former Foreign Minister of Austria, Czernin von und zu Chudenitz played an important role in the diplomacy of the time, and his insights into the political and military strategy of the war are invaluable. Howard Gardner's brilliant conception of individual competence is changing the face of education today. In the ten years since the publication of his seminal *Frames of Mind*, thousands of educators, parents, and researchers have explored the practical implications of Multiple Intelligences (MI) theory—the powerful notion that there are separate human capacities, ranging from musical intelligence to the intelligence involved in understanding oneself. *Multiple Intelligences: The Theory in Practice* brings together previously published and original work by Gardner and his colleagues at Project Zero to provide a coherent picture of what we have learned about the educational applications of MI theory from projects in schools and formal research over the last decade.

A newly illustrated and revised edition of Victor Neumann's ground-breaking study into the development of Eastern European thought. "My perspective is that of a phenomenologist and specialist in French and Spanish cultures. As such, the book left a special impression on me: Neumann does not limit himself to the mentioned areas of Europe, but understands the continent in its entirety, that is, 'West' and 'East' as a whole." — World Complexity Science Academy The Renaissance, the Reformation, the Enlightenment - these seismic developments in Western thought were not confined to Italy and her near neighbours, but were paralleled across the vast and culturally diverse territory stretching from Vienna to Constantinople. Drawing on an array of sources, many of which were little-known before he made this ground-breaking study, Victor Neumann charts the development of Eastern European thought and its literary

and artistic expression from the Middle Ages to the modern age. First published, to great acclaim in Romania in 1991, this newly revised, updated and illustrated edition has been published as Neumann's home city of Timișoara prepares to receive visitors from across the world as European Capital of Culture, and at a time when the question of what it means to be European is being debated more than ever.

The bestselling beginner Arduino guide, updated with new projects! Exploring Arduino makes electrical engineering and embedded software accessible. Learn step by step everything you need to know about electrical engineering, programming, and human-computer interaction through a series of increasingly complex projects. Arduino guru Jeremy Blum walks you through each build, providing code snippets and schematics that will remain useful for future projects. Projects are accompanied by downloadable source code, tips and tricks, and video tutorials to help you master Arduino. You'll gain the skills you need to develop your own microcontroller projects! This new 2nd edition has been updated to cover the rapidly-expanding Arduino ecosystem, and includes new full-color graphics for easier reference. Servo motors and stepper motors are covered in richer detail, and you'll find more excerpts about technical details behind the topics covered in the book. Wireless connectivity and the Internet-of-Things are now more prominently featured in the advanced projects to reflect Arduino's growing capabilities. You'll learn how Arduino compares to its competition, and how to determine which board is right for your project. If you're ready to start creating, this book is your ultimate guide! Get up to date on the evolving Arduino hardware, software, and capabilities Build projects that interface with other devices—wirelessly! Learn the basics of electrical engineering and programming Access downloadable materials and source code for every project Whether you're a first-timer just starting out in electronics, or a pro looking to mock-up more complex builds, Arduino is a fantastic tool for building a variety of devices. This book offers a comprehensive tour of the hardware itself, plus in-depth introduction to the various peripherals, tools, and techniques used to turn your little Arduino device into something useful, artistic, and educational. Exploring Arduino is your roadmap to adventure—start your journey today!

#### **Climate of the Romanian Carpathians** Scribe Publications

This book, by the editor of the journal *Incognita*, takes the reader on a fantastic journey through a wide range of cultures and traditions to examine the phenomenon of ecstatic visionary experiences--from Sumerian Gilgamesh and the Taoist Immortals to the imaginative fiction of Jorge Luis Borges. The author provides a comprehensive tour of otherworldly journeys common from immemorial times among shamans, magicians and witches, and illustrates their connection with such modern phenomena as altered states of consciousness, out-of-body experiences, and near-death experiences.--From publisher description.

#### *History and Myth in Romanian Consciousness* Basic Books

Poetry. Translated from the Romanian by Sean Cotter. Nichita Danilov (b. 1952) places himself in the tradition of mystics such as Meister Eckhart, St. John of the Cross, and Pseudo-Dionysius. Combining the spiritual heritage of his native Romania with a surrealist poetics, his writing is playful, ironic, and language-centered, engaging in games of a metaphysical depth. In this selection of his poetry (presented bilingually) and prose, Danilov describes a world full of caprice in a voice coming from the darkness of a purgatory where the divine appears in bizarre images.

#### Belle Rose Humanitas SA

"A critical overview of scientific orthodoxy in an attempt to answer the fundamental questions "what are we?" and "why are we here?" (Kirkus Reviews). Specialist scientific fields are developing at incredibly swift speeds, but what can they really tell us about how the universe began and how we as humans evolved to

play such a dominant role on Earth? John Hands's extraordinarily ambitious book merges scientific knowledge from multiple disciplines and evaluates without bias or preconception all the theories and evidence about the origin and evolution of matter, consciousness, and mankind. The result, a "pearl of dialectical reasoning" (Publishers Weekly, starred review), provides the most comprehensive account yet of current ideas such as cosmic inflation, dark energy, the selfish gene, and neurogenetic determinism. In the clearest possible prose, it differentiates the firmly established from the speculative and examines the claims of various fields to approach a unified theory of everything. In doing so it challenges the orthodox consensus in those branches of cosmology, biology, and neuroscience that have ossified into dogma. Its "shocking and invigorating" analysis (Daily Telegraph, A Best Science Book of 2015) reveals underlying patterns of cooperation, complexification, and convergence that lead to the unique emergence in humans of a self-reflective consciousness that enables us to determine our future evolution. This groundbreaking book is destined to become a classic of scientific thinking. Praise for *Cosmosapiens* "This is a truly exceptional piece of work." —Tim Crane, Knightsbridge Professor of Philosophy, The University of Cambridge "A game-changer. In the tradition of Thomas Kuhn's *The Structure of Scientific Revolutions*, this lucidly written, penetrating analysis challenges us to rethink many things we take for granted about ourselves, our society, and our universe. It will become a classic." —Peter Dreier, E P Clapp Distinguished Professor of Politics, Occidental College "Hands is an astute observer of recent trends in scientific ideas bold enough to point out what he sees as sense and nonsense and intelligently explain why. Even in cases where one might disagree, the arguments are thought-provoking." —Paul Steinhardt, Albert Einstein Professor in Science, Princeton University The Dreamer of Dreams Routledge University College Dublin has provided education on archives for 35 years mainly in the Archives Department. This book of essays celebrates its role in a timely manner as the Archives Department has become part of the new UCD School of History and Archives. The topics covered here include aspects of the history of archives, record keeping, ethics and ethical issues, the publication of diaries, digitisation and digital preservation, the representation of archives in literature, the

use of archives in education, the curatorship of ancient, medieval and early modern archives, the management of church and local authority archives, and, the exploration of the impact of documents in everyday life. Contributors include: Mary Clark (Dublin City Library), Lisa Collins (UCD), Michelle Cooney (Christian Brothers Archives, St Helen's Province), Marianne Cosgrave (Mercy Congregational Archives), Clare Hackett (Guinness Archive), Charles Horton (CBL), Donal Moore (Waterford City Council), Colum O'Riordan (Irish Architectural Archives), Joanne Rothwell (Waterford County Council), and David Sheehy, (Archdiocese of Dublin Archives Service).

The leading experts on parent-child communication show parents and teachers how to motivate kids to learn and succeed in school. Using the unique communication strategies, down-to-earth dialogues, and delightful cartoons that are the hallmark of their multimillion-copy bestseller *How to Talk So Kids Will Listen and Listen So Kids Will Talk*, Adele Faber and Elaine Mazlish show parents and teachers how to help children handle the everyday problems that interfere with learning. This breakthrough book demonstrates how parents and teachers can join forces to inspire kids to be self-directed, self-disciplined, and responsive to the wonders of learning.

#### *Atalanta Fugiens* Search Press Ltd

Queen Marie of Roumania was one of the most fascinating crowned heads of Europe and one of the most extraordinary and independent women of our century. The granddaughter of Queen Victoria and Tzar Alexander II of Russia, at seventeen Marie left the glittering courts of Western Europe to marry the Crown Prince of Roumania. Drawing upon the young queen's diaries and letters, the author describes her struggle to gain an independent footing in the male-dominated court of Roumania, her early years as one of the most admired beauties of Europe, and the decisive period during World War I when she all but ran the Roumanian Government. With the sweep and panache of a great epic, this compelling story is historical biography at its best. This enthralling book is like a huge spicy plum pudding stuffed with juicy fruits Maureen Cleave, *Evening Standard* Exploring Arduino Rizzoli International Publications

There are many students who find philosophy of education difficult, because they have never received teaching in the basic essentials of general philosophy. This book begins by asking the basic

question 'what is philosophy?' and examines a number of possible answers. Step by step the reader is introduced to the modern techniques of linguistic and concept analysis. Whenever a technical term is used it is explained and illustrated by reference to familiar situations in everyday life.

*România în epoca modernizării* Routledge  
An up to date look at macrame techniques which offers crafters and jewellery makers fresh, inspirational ideas and takes an exciting look at a traditional craft.

**The Disheveled Maidens** transcript Verlag

In history, cities and nature are often treated as two separate fields of research. »Concepts of Urban-Environmental History« aims to bridge this gap. The

contributions to this volume survey major concepts and key issues which have shaped recent debates in the field. They address unresolved questions and future challenges. As a handbook, the collection offers a comprehensive overview for researchers and students, both from a historical and an interdisciplinary background.

*Multiple Intelligences* Jones & Bartlett Publishers

The international bestseller – an enthralling exploration of the how and why behind the science of happiness. We all know what it feels like to be happy, but what mechanisms inside our brains trigger such a positive emotion? What does it really mean to be happy, and why can't we

feel that way all of the time? Psychologists and neuroscientists have been studying negative emotions for decades, but until recently few have focused on the subject of happiness. Now, in *The Science of Happiness*, leading science journalist Stefan Klein ranges widely across the latest frontiers of neuroscience and psychology to explain how happiness is generated in our brains, what biological purpose it serves, and the conditions required to foster 'the pursuit of happiness'. A remarkable synthesis of a growing body of research that has not been brought together before, *The Science of Happiness* is, ultimately, a book that helps us understand our own quest for happiness and is certain to help make you happier.
