"In 1915 the American Museum of Natural History (AMNH) embarked upon a mission to energize the American textile industry. Curators sought to innovate a distinctly 'American' design idiom drawing on a more universal "primitive" language. Ethnographic objects were included in study rooms; designers gained access to storage rooms; and museum artifacts were loaned to design houses and department stores. In order to attract designers and reluctant manufacturers, who quickly responded, collections were supplemented with specimens including fur garments from Siberia, Persian costumes, and Javanese textiles. This book positions the project at the AMNH in

the broader narrative of early 20th-century design education in New York, which includes the roles of The Metropolitan Museum of Art, the Brooklyn Museum, and the Newark Museum"--

An updated edition of this indispensable reference, surveying the history of textiles from 25,000 years ago to the present. The history of textiles, more than that of any other artifact, is a history of human ingenuity. From the very earliest needles of 25,000 years ago to the smart textiles of today, textiles have been fundamental to human existence, and enjoyed, prized, and valued by every culture. Silks from China, cottons from India, tapestries from Flanders, dyes from South America—the appeal of different weaves, colors, and patterns was long a motivation for trade, the exchange of ideas, and sometimes even war. Mary Schoeser's groundbreaking book, now revised and updated to incorporate new research with color illustrations, presents a chronological survey of textiles around the world from prehistory to the present. It explores how they are made, what they are made from, how they function in society, and the ways in which they are valued and given meaning as well as reflecting on the environmental challenges they present today. *World Textiles* offers an invaluable introduction to this vast and fascinating subject for makers, designers, textile and fashion professionals, collectors, and students alike.

Exploring Textile Arts Laurence King Publishing

Filling a critical gap in Vienna 1900 studies, this book offers a new reading of fin-de-si?e culture in the Austro-Hungarian Monarchy by looking at the unusual and widespread preoccupation with embroidery, fabrics, clothing, and fashion - both literally and metaphorically. The author resurrects lesser known critics, practitioners, and curators from obscurity, while also discussing the textile interests of better known figures, notably Gottfried Semper and Alois Riegl. Spanning the 50-year life of the Dual Monarchy, this study uncovers new territory in the history of art history, insists on the crucial place of women within modernism, and broadens the cultural history of Habsburg Central Europe by revealing the complex relationships among art history, women, and Austria-Hungary. Rebecca Houze surveys a wide range of materials, from craft and folk art to industrial design, and includes overlooked sources-from fashion magazines to World's Fair maps, from exhibition catalogues to museum lectures, from feminist journals to ethnographic collections. Restoring women to their place at the intersection of intellectual and artistic debates of the time, this book weaves together

discourses of the academic, scientific, and commercial design communities with middle-class life as expressed through popular culture.

This Bulletin discusses the Met's extensive collection of Renaissance textile pattern books, used primarily by women to embroider clothes and accessories. The practice of embroidery was seen as a virtuous endeavor, and textile pattern books, published with great frequency from the 1520s onward, were designed to inspire, instruct, and encourage "beautiful and virtuous women" in this esteemed practice. Straddling the disciplines of early printmaking, ornament design, and textile decoration, these works help shed light on the crucial period when the concept of fashion as a means of distinguishing individual identity became fixed in Western society.

A detailed study of Tudor textiles, highlighting their extravagant beauty and their impact on the royal court, fashion, and taste At the Tudor Court, textiles were ubiquitous in decor and ceremony. Tapestries, embroideries, carpets, and hangings were more highly esteemed than paintings and other forms of decorative art. Indeed, in 16th-century Europe, fine textiles were so costly that they were out of reach for average citizens, and even for many nobles. This spectacularly illustrated book tells the story of textiles during the long Tudor century, from the ascendance of Henry VII in 1485 to the death of his granddaughter Elizabeth I in 1603. It places elaborate tapestries, imported carpets, lavish embroidery, and more within the context of religious and political upheavals of the Tudor court, as well as the expanding world of global trade, including previously unstudied encounters between the New World and the Elizabethan court. Special attention is paid to the Field of the Cloth of Gold, a magnificent two-week festival—and unsurpassed display of golden textiles—held in 1520. Even half a millennium later, such extraordinary works remain Tudor society's strongest projection of wealth, taste, and ultimately power.

The interiors section shows surfaces and interior products such as wallpaper, upholstered furniture, fabric hangings and floor coverings, and features a wide range of designers from Marimekko in Finland to Anna Glover in the UK. Fine-art prints and experimental work from international artists and designers such as Cristian Zuzunaga and Liberty Art Fabrics are represented in the final part.

Textile design inhabits a liminal space spanning art, design and craft. This book explores how textile design bridges the decorative and the functional, and takes us from handcrafting to industrial manufacture. In doing so, it distinguishes textiles as a distinctive design discipline, against the backdrop of today's emerging design issues. With commentaries from a range of international design scholars, the book demonstrates how design theory is now being employed in diverse scenarios to encourage innovation beyond the field of design itself. Positioning textiles within contemporary design research, *Textile Design Theory in the Making* reveals how the theory and practice of textile design exist in a synergistic, creative relationship. Drawing on qualitative research methods, including auto-ethnography and feminist critique, the book provides a theoretical underpinning for textile designers working in interdisciplinary scenarios, uniting theory and texts from the fields of anthropology, philosophy, literature and material design.
