Choose ten major contemporary diasporic writers (from Abdulrazak to Zadie), ask ten leading authorities to write about their use of metaphor, and this is the result: a timely reassertion of metaphor's unrivalled capacity to encompass sameness and difference and create understanding and empathy across boundaries of nationality, race and ethnicity.

Humans possess the most expressive faces in the animal kingdom. Adam Wilkins presents evidence ranging from the fossil record to recent findings of genetics, molecular biology, and developmental biology to reconstruct the fascinating story of how the human face evolved. Beginning with the first vertebrate faces half a billion years ago and continuing to dramatic changes among our recent human ancestors, *Making Faces* illuminates how the unusual characteristics of the human face came about—both the physical shape of facial features and the critical role facial expression plays in human society. Offering more than an account of morphological changes over time and space, which rely on findings from paleontology and anthropology, Wilkins also draws on comparative studies of living nonhuman species. He examines the genetic foundations of the remarkable diversity in human faces, and also shows how the evolution of the face was intimately connected to the evolution of the brain. Brain structures capable of recognizing different individuals as well as “reading” and reacting to their facial expressions led to complex social exchanges. Furthermore, the neural and muscular mechanisms that created facial expressions also allowed the development of speech, which is unique to humans. In demonstrating how the physical evolution of the human face has been inextricably intertwined with our species' growing social complexity, Wilkins argues that it was both the product and enabler of human sociality.

Three Ways to Capsize a Boat is travel writing at its best, crackling with Chris Stewart's zest for life, irresistible humor, and unerring lack of foresight. Chris Stewart had a long and eclectic list of jobs. From some of the most glamorous careers--he was original drummer in Genesis--to the more offbeat--a sheep shearer and circus performer--he had done it all...or almost all. So when he is offered the chance to captain a sailboat in the Greek islands one summer, something he had never done before, he jumped at the chance, even though he'd never actually sailed before. So begins the hilarious and wild adventures of *Three Ways to Capsize a Boat*. From setting the boat on fire not once, but several times in the Aegean Sea to his not-so-grand arrival in Spetses to meet the owners of the boat (who says it isn't graceful to plow into the docks as a means of coming to a stop?), Stewart quickly catches the sailing bug. By the end of the summer, as he is facing the dreary

prospect of going back to sheep shearing, he jumps at the chance to be part of a crew to follow Viking Leif Eiriksson's historic journey across the Atlantic Ocean. From coming to terms with the long, cold nights at sea and unchanging cuisine to battling intense seasickness and managing to go to the bathroom during a massive storm (a lot harder than you'd think!), Stewart keeps his good humor, but learns, in the end, that perhaps the best things in life are worth coming ashore for.

The Craft and Science of Coffee follows the coffee plant from its origins in East Africa to its current role as a global product that influences millions of lives through sustainable development, economics, and consumer desire. For most, coffee is a beloved beverage. However, for some it is also an object of scientific study, and for others it is approached as a craft, both building on skills and experience. By combining the research and insights of the scientific community and expertise of the crafts people, this unique book brings readers into a sustained and inclusive conversation, one where academic and industrial thought leaders, coffee farmers, and baristas are quoted, each informing and enriching each other. This unusual approach guides the reader on a journey from coffee farmer to roaster, market analyst to barista, in a style that is both rigorous and experience based, universally relevant and personally engaging. From on-farming processes to consumer benefits, the reader is given a deeper appreciation and understanding of coffee's complexity and is invited to form their own educated opinions on the ever changing situation, including potential routes to further shape the coffee future in a responsible manner. - Presents a novel synthesis of coffee research and real-world experience that aids understanding, appreciation, and potential action - Includes contributions from a multitude of experts who address complex subjects with a conversational approach - Provides expert discourse on the coffee value chain, from agricultural and production practices, sustainability, post-harvest processing, and quality aspects to the economic analysis of the consumer value proposition - Engages with the key challenges of future coffee production and potential solutions

Successfully navigate the rich world of travel narratives and identify fiction and nonfiction read-

alikes with this detailed and expertly constructed guide. Just as savvy travelers make use of guidebooks to help navigate the hundreds of countries around the globe, smart librarians need a guidebook that makes sense of the world of travel narratives. *Going Places: A Reader's Guide to Travel Narratives* meets that demand, helping librarians assist patrons in finding the nonfiction books that most interest them. It will also serve to help users better understand the genre and their own reading interests. The book examines the subgenres of the travel narrative genre in its seven chapters, categorizing and describing approximately 600 titles according to genres and broad reading interests, and identifying hundreds of other fiction and nonfiction titles as read-alikes and related reads by shared key topics. The author has also identified award-winning titles and spotlighted further resources on travel lit, making this work an ideal guide for readers' advisors as well a book general readers will enjoy browsing.

Andalucia is the quintessence of Spain and yet, historically and culturally, it is surprisingly unlike the rest of the country. Its literary history began to develop with the Romans and reached an early flowering when Arabic poets drew on centuries of literary tradition, together with the landscapes and passions of Moorish Spain. Later, Prosper Mérimée, Byron and Washington Irving forged legends of exotic southern Spain that persist to this day and Spanish writers themselves captured the rich tapestry of Andalusian culture, from Cervantes' Seville to the Córdoba of Baroque poet Luis de Góngora and Lorca's 'hidden Andalusia'. With the advent of the Civil War, a new generation flocked to Andalusia and were inspired to write some of the twentieth century's most iconic works of literature, from Hemingway's *For Whom the Bell Tolls* to Gerald Brenan's *The Spanish Labyrinth* and Laurie Lee's trilogy of books. As vibrant and compelling as the region itself, *Andalusia: A Literary Guide for Travellers* illuminates the very soul of Spain.

Chris Stewart's *Driving Over Lemons* told the story of his move to a remote mountain farm in Las Alpujarras - an oddball region of Spain, south of Granada. Funny, insightful and real, the book became an international bestseller. *A Parrot in the Pepper Tree*, the sequel to *Lemons*, follows the lives of Chris, Ana and their daughter, Chloë, as they get to grips with a misanthropic parrot who joins their home, Spanish school life, neighbours in love, their amazement at Chris appearing on the bestseller lists . . . and their shock at discovering that their beloved valley is once more under threat of a dam. *A Parrot in the Pepper Tree* also looks back on Chris Stewart's former life - the hard times shearing in midwinter Sweden (and driving across the frozen sea to reach island farms); his first taste of Spain, learning flamenco guitar as a 20-year old; and his illustrious music career, drumming for his school band Genesis (sacked at 17, he never quite became Phil Collins), and then for a circus.

Contemporary Spain reflects broader patterns of globalization and has been the site of tensions between nationalists and immigrants. This case study examines a rural town in Spain's Andalucía in order to shed light on the workings of coexistence. The town of Órgiva's diverse population includes hippies from across Europe, European converts to Sufi Islam, and immigrants from North Africa. Christina Civantos combines the analysis of written and visual cultural texts with oral narratives from residents. In this book, we see that although written and especially televisual narratives about the

town highlight tolerance and multiculturalism, they mask tensions and power differentials. Toleration is an ongoing negotiation, and this book shows us how we can identify the points of contact that create robust, respect-based tolerance. "This is a book that is both a personal account and a rigorous academic study. It is a model for the kind of engaged humanistic work we are now beginning to see as a hallmark of the post-theory moment, and one that remembers the hard lessons of ethnographic fieldwork as well as the challenging foundational work from philosophically-tinged theory." --Debra A. Castillo, Cornell University "Filled with rich descriptions and interwoven personal anecdotes of both Civantos and her interlocutors that complement scholarly analysis." -- Jessica R. Boll, Carroll University

How early American Catholics justified secularism and overcame suspicions of disloyalty, transforming ideas of religious liberty in the process. In colonial America, Catholics were presumed dangerous until proven loyal. Yet Catholics went on to sign the Declaration of Independence and helped to finalize the First Amendment to the Constitution. What explains this remarkable transformation? Michael Breidenbach shows how Catholic leaders emphasized their church's own traditions—rather than Enlightenment liberalism—to secure the religious liberty that enabled their incorporation in American life. Catholics responded to charges of disloyalty by denying papal infallibility and the pope's authority to intervene in civil affairs. Rome staunchly rejected such dissent, but reform-minded Catholics justified their stance by looking to conciliarism, an intellectual tradition rooted in medieval Catholic thought yet compatible with a republican view of temporal independence and church-state separation. Drawing on new archival material, Breidenbach finds that early American Catholic leaders, including Maryland founder Cecil Calvert and members of the prominent Carroll family, relied on the conciliarist tradition to help institute religious toleration, including the Maryland Toleration Act of 1649. The critical role of Catholics in establishing American church-state separation enjoins us to revise not only our sense of who the American founders were, but also our understanding of the sources of secularism. Church-state separation in America, generally understood as the product of a Protestant-driven Enlightenment, was in key respects derived from Catholic thinking. *Our Dear-Bought Liberty* therefore offers a dramatic departure from received wisdom, suggesting that religious liberty in America was not bestowed by liberal consensus but partly defined through the ingenuity of a persecuted minority.

Meet Chris Stewart, the eternal optimist. A man who flies to Spain, sees a peasant farm on the wrong side of the river and, with scarcely a second thought, hands over a cash deposit. And then finds he has acquired not just the farm, but the farmer, too, who has no intention of leaving. Not to mention the lack of running water, electricity or even a bridge. It would be enough to send most people straight back home. But Chris and his wife Ana are made of stronger stuff - and besides, they have sunk all their savings into their farm, El Valero, and buying a flock of sheep. So there is no

turning back. Life gets tough, but it also gets good. *Driving Over Lemons* is that rare thing - a funny, insightful book that charms you from the first sun-lit page to the last. And one that makes running an Andalucian mountain farm seem like a half-decent career move. It has been a major bestseller both in Britain and Spain.

This is not a guidebook, though I hope it gives the reader some ideas on places worth seeing, accommodation worth considering, and decent restaurants worth dining in. It does not normally give a list of possible places to stay (only places I have experienced myself being included), but at the end of each chapter, there will be a Practicalities page containing the following: 1 Useful websites on places, maps, and transport. In general, sites relevant to more than one chapter will be found the first time they are relevant and are referenced in later chapters. 2 Accommodation on these pages will be only where I have stayed. I go for cheaper places when I travel alone, although I nearly always choose en-suite rooms as I got older, and moderately cheap when I went with Pam. In general, absence of comment means it is OK, bearing this in mind. 3 Restaurants are only mentioned on these pages if they are particularly good, either absolutely or in terms of value for money or if definitely not recommended. 4 Must-sees appear in the chapters themselves but will be summarised on these pages. The index is based on my historic fury at finding pages, only to get a totally uninformative mention of the place in passing. Text (normal print) references are meant to show the first or only page with information about the place. Those planning holidays may find it more helpful to go immediately to pages shown in italic print, where they will often find helpful URLs. I have checked all the multitude of URLs in this book in February 2012, inserting a lot of new ones in place of dead sites. Occasionally my comments on a site may be a bit dodgy now, but there are some great sites here. I'm not sure how I overcame temptation to spend ages just looking at some!

Globalization promises to bring people around the world together, to unite them as members of the human community. To such sanguine expectations, Pheng Cheah responds deftly with a sobering account of how the "inhuman" imperatives of capitalism and technology are transforming our understanding of humanity and its prerogatives. Through an examination of debates about cosmopolitanism and human rights, *Inhuman Conditions* questions key ideas about what it means to be human that underwrite our understanding of globalization. Cheah asks whether the

contemporary international division of labor so irreparably compromises and mars global solidarities and our sense of human belonging that we must radically rethink cherished ideas about humankind as the bearer of dignity and freedom or culture as a power of transcendence. Cheah links influential arguments about the new cosmopolitanism drawn from the humanities, the social sciences, and cultural studies to a perceptive examination of the older cosmopolitanism of Kant and Marx, and juxtaposes them with proliferating formations of collective culture to reveal the flaws in claims about the imminent decline of the nation-state and the obsolescence of popular nationalism. Cheah also proposes a radical rethinking of the normative force of human rights in light of how Asian values challenge human rights universalism.

Metaphor and Diaspora in Contemporary Writing Harvard University Press

2023 PROSE Award in European History "An invaluable historical example of the creation of a scientific conception of race that is unlikely to disappear anytime soon." —Washington Post "Reveals how prestigious natural scientists once sought physical explanations, in vain, for a social identity that continues to carry enormous significance to this day." —Nell Irvin Painter, author of *The History of White People* "A fascinating, if disturbing, window onto the origins of racism." —Publishers Weekly "To read [these essays] is to witness European intellectuals, in the age of the Atlantic slave trade, struggling, one after another, to justify atrocity." —Jill Lepore, author of *These Truths: A History of the United States* In 1739 Bordeaux's Royal Academy of Sciences announced a contest for the best essay on the sources of "blackness." What is the physical cause of blackness and African hair, and what is the cause of Black degeneration, the contest announcement asked. Sixteen essays, written in French and Latin, were ultimately dispatched from all over Europe. Documented on each page are European ideas about who is Black and why. Looming behind these essays is the fact that some four million Africans had been kidnapped and shipped across the Atlantic by the time the contest was announced. The essays themselves represent a broad range of opinions, which nonetheless circulate around a common theme: the search for a scientific understanding of the new concept of race. More important, they provide an indispensable record of the Enlightenment-era thinking that normalized the sale and enslavement of Black human beings. These never previously published documents survived the centuries tucked away in Bordeaux's municipal library. Translated into English and accompanied by a detailed introduction and headnotes written by Henry Louis Gates, Jr., and Andrew Curran, each essay included in this volume lays bare the origins of anti-Black racism and colorism in the West.
