All parts of the body need exercise for optimal health, and the eyes are no different. Vision for Life presents an approach to eye health for people with 20/20 vision who wish to maintain their perfect vision as well as people who see poorly and would like to improve their eyesight. Clients of the Meir Schneider Self-Healing Method experience their own capacity to bring about recovery, reversing the progress of a wide range of degenerative conditions including eye disease. Based in part on the established Bates Method of eyesight improvement and in part on his own professional and personal discoveries, Meir Schneider's pioneering approach has helped thousands of people successfully treat a host of eye problems, including near- and farsightedness, astigmatism, lazy eye, double vision, glaucoma, cataracts, macular degeneration, retinal detachment, retinitis pigmentosa, and nystagmus. This revised edition includes a new chapter on children's eye health and new research and exercises for specific conditions, i.e., glaucoma and nystagmus, near- and farsightedness. Born blind to deaf parents, Schneider underwent a series of painful operations as a young child and was left with 99 percent scar tissue on the lenses of his eyes, resulting in his being declared incurably blind. At the age of seventeen, he discovered how to improve his vision from less than 1 percent to 55 percent of normal vision with the eye exercises presented in this book. Today Schneider drives a car, reads, and enjoys the benefits of full natural vision. He and his clients prove time and time again how much vision can improve with exercise. His contributions to the field of self-healing are recognized by alternative health practitioners and medical doctors alike. In Vision for Life, Schneider shares forty years of discoveries made on his personal and professional journey. The book details simple but effective techniques to gain great vision such as sunning and palming. Such exercises are not only strengthening but also restorative and deeply relaxing. The reader learns how to reverse developing issues before they cause damage or to remedy existing problems, including pathologies such as glaucoma, cataracts, macular degeneration, retinal detachment, and optic nerve neuropathy.

A Massage Therapist's Guide to Lower Back & Pelvic Pain Healing Arts Press

Combines acupressure and massage to treat pain using elastic tape • Shows how the use of an elastic, adhesive tape works with the body's own motions to combine the actions of acupressure and massage • Presents both therapeutic and preventative techniques for acute and chronic pain • Contains step-by-step instructions illustrated in full color detailing how to self-treat pain in all parts of the body Sufferers of chronic pain well know the frustration of treatments involving endless rounds of drugs or expensive physical therapy--that may or may not offer relief. In Acupressure Taping, authors Hecker and Liebchen present a comprehensive guide to a new method of pain treatment--acutaping--which offers a much simpler and more effective alternative. In acutaping, elastic tape is placed over the afflicted area in accordance with related acupuncture points. During the course of normal movement throughout the day, the elastic tape provides a gentle but consistent massage to the inflamed area. Because the skin adheres to the tape, it is shifted against the subtissue during motion, causing lymph tissue to drain and connective tissue to be massaged. The authors show that most bodily dysfunctions can be self-treated through this innovative method. Combining elements of Chinese medicine with osteopathy, acutaping produces a method of treatment for ailments ranging from back pain and tennis elbow to menstrual pain and migraines. Acutaping is an easy and effective treatment--without side effects--that offers welcome relief to sufferers of chronic pain.
