Pacific Ocean Park - or P.O.P. - was extraordinary in both its glamorous rise and spectacular fall. Located between Santa Monica and Venice, it was a family-oriented attraction in the '50s with modernist-style rides. P.O.P.'s attendance surpassed that of Disneyland and was often widely seen in movies and television shows throughout the '60s. Its Cheetah auditorium hosted important early rock shows, including those by The Doors and Pink Floyd. Merritt and Priore's spectacular history features hundreds of images, most of them unseen, including original ride designs.

The first day of summer foretells new beginnings for John Moore, a renowned, yet emotionally stalled artist, when he notices Mark Ormond, a guarded young poet, on Southern California's Will Rogers State Beach. After John cajoles him, Mark agrees to sit for a portrait he intends to present as an anniversary gift to his long-time lover, Edward Bloom. A famous actor away shooting a film, Edward's relationship with Mark is strained, but Mark hopes to force the issue with the painting. Over the course of the summer in Santa Monica Canyon, a deep friendship develops between Mark and John, challenged by the surprise revelation that they share an unhappy history. As events unfold, both men come to insights and resolutions about life, the value they place on their

work in the arts, and lastly, their desire to reconnect and commit to life and to love. Praise for the Novels of Gregory Hinton

"A compelling account of the lives of Japanese and Japanese

Americans incarcerated during World War II . . . instructive and moving."—Nippon.com From the editor of the award-winning Children of Manzanar, Heather C. Lindquist, and Edgar Award winner Naomi Hirahara comes a nuanced account of the "Resettlement": the relatively unexamined period when ordinary people of Japanese ancestry, having been unjustly imprisoned during World War II, were finally released from custody. Given twenty-five dollars and a one-way bus ticket to make a new life, some ventured east to Denver and Chicago to start over, while others returned to Southern California only to face discrimination and an alarming scarcity of housing and jobs. Hirahara and Lindquist weave new and archival oral histories into an engaging narrative that illuminates the lives of former internees in the postwar era, both in struggle and unlikely triumph. Readers will appreciate the painstaking efforts that rebuilding required and will feel inspired by the activism that led to redress and restitution—and that built a community that even now speaks out against other racist agendas. "Through this thoughtful story, we see how the harsh realities of the incarceration experience follow real lives, and how Manzanar will sway generations to come. When you finish the last chapter you will demand to read more."—Gary Mayeda, national president of the Japanese American Citizens League "An engaging, well-written telling of how former Manzanar detainees played key roles in remembering and righting the wrong of the World War II incarceration."—Tom Ikeda, executive director of Densho

A Finalist for the Folio Prize, the Goldsmiths Prize, the Scotiabank Giller Prize, and the Baileys Women's Prize for Fiction. One of The New York Times' Top Ten Books of the Year. Named a A New York Times Book Review Notable Book and a Best Book of the Year by The New Yorker, Vogue, NPR, The Guardian, The Independent, Glamour, and The Globe and Mail A luminous, powerful novel that establishes Rachel Cusk as one of the finest writers in the English language A man and a woman are seated next to each other on a plane. They get to talking—about their destination, their careers, their families. Grievances are aired, family tragedies discussed, marriages and divorces analyzed. An intimacy is established as two strangers contrast their own fictions about their lives. Rachel Cusk's *Outline* is a novel in ten conversations. Spare and stark, it

follows a novelist teaching a course in creative writing during one oppressively hot summer in Athens. She leads her students in storytelling exercises. She meets other visiting writers for dinner and discourse. She goes swimming in the Ionian Sea with her neighbor from the plane. The people she encounters speak volubly about themselves: their fantasies, anxieties, pet theories, regrets, and longings. And through these disclosures, a portrait of the narrator is drawn by contrast, a portrait of a woman learning to face a great loss. *Outline* takes a hard look at the things that are hardest to speak about. It brilliantly captures conversations, investigates people's motivations for storytelling, and questions their ability to ever do so honestly or unselfishly. In doing so it bares the deepest impulses behind the craft of fiction writing. This is Rachel Cusk's finest work yet, and one of the most startling, brilliant, original novels of recent years.

Swim out into the Pacific and look back to the shore. To the couple kissing in the hot afternoon, and the young girl rollerskating along the front, and the family setting up camp on the soft, warm sand. To the blues and yellows and pinks of fierce, determined revelry. Santa Monica, where the wooden pier juts out into the Pacific Ocean, marks the end of Route 66. The great American journey west culminates here, and it is on this short stretch of coast that Sarah Lee began shooting her photographic series in 2015. In *West of West* Sarah Lee and Laura Barton explore the idea of the West in shaping American identity, with its idealism and notions of the frontier, and what the American West means in an age of political turbulence, when the East is the rising global force and the frontier is shifting once more.

*Freewaytopia: How Freeways Shaped Los Angeles* explores how social, economic, political, and cultural demands created the web of expressways whose very form—futuristic, majestic, and progressive—perfectly exemplifies the City of Angels. From the Arroyo Seco, which began construction during the Great

Depression, to the Simi Valley and Century Freeways, which were completed in 1993, author Paul Haddad provides an entertaining and engaging history of the 527 miles of road that comprise the Los Angeles freeway system. Each of Los Angeles's twelve freeways receives its own chapter, and these are supplemented by "Off-Ramps"—sidebars that dish out pithy factoids about Botts' Dots, SigAlerts, and all matter of freeway lexicon, such as why Southern Californians are the only people in the country who place the word "the" in front of their interstates, as in "the 5," or "the 101." Freewaytopia also explores those routes that never saw the light of day. Imagine superhighways burrowing through Laurel Canyon, tunneling under the Hollywood Sign, or spanning the waters of Santa Monica Bay. With a few more legislative strokes of the pen, you wouldn't have to imagine them—they'd already exist. Haddad notably gives voice to those individuals whose lives were inextricably connected—for better or worse—to the city's freeways: The hundreds of thousands of mostly minority and lower-class residents who protested against their displacement as a result of eminent domain. Women engineers who excelled in a man's field. Elected officials who helped further freeways . . . or stop them dead in their tracks. And he pays tribute to the corps of civic and state highway employees whose collective vision, expertise, and dedication created not just the most famous freeway network in the world, but feats of engineering that, at their best, achieve architectural poetry. Finally, let's not forget the beauty queens—no freeway in Los Angeles ever opened without their royal presence.

10,000 Steps a Day in L.A.: 52 Walking Adventures is for urban adventurers with a passion for healthy living who are also hungry to explore L.A.'s hidden, unsung, and sometimes quirky side. This unique guidebook provides everything readers need to venture out and tackle the city's 500 square miles. The book is based on a concept that first took hold in Japan—that if people walked 10,000 steps each day, they would burn 20 percent of their caloric intake through that activity alone. Now an ingrained part of the American lifestyle, the 10,000 steps phenomenon is taking the country by storm; it is now a recognized daily goal by a number of major insurance companies like Kaiser Permanente and health institutes such as the World Health Organization, the U.S. Center for Disease Control, the U.S. Surgeon General, and the American Heart Foundation. In this first-ever book to explore the 10,000

steps concept in the City of Angels, these walks take readers through the terrain that makes Los Angeles the envy of many a metropolis—beaches, mountains, rivers, and reservoirs, not to mention the nation's largest urban park, Griffith Park—all while immersing them in the city's history and lore, offbeat locales, and popular landmarks. 10,000 Steps a Day in L.A. promises three things: 10,000 steps in each walk, a blueprint for doing it each weekend of the year (52 walks equals a year's worth of weekends), and a sense of fun and discovery about L.A. that will only make the 10,000 steps goal that much easier to attain. Readers need bring only their feet—pedometers optional.
