TOBY MAXIMUS

General Report of the Colonial Land and Emigration Commissioners Peter Lang

This book offers a selection of papers dealing with second language acquisition, foreign language teaching and creole linguistics inspired by the scientific legacy of Mauritian-born scholar Georges Daniel Véronique (Port-Louis, 1948). An important part of the book is devoted to the description of learner varieties with a focus on sociolinguistic factors, such as the learner situation - from asylum seekers to Erasmus students -, the degree of familiarity with the target language - having or not previous knowledge about a genetically related language -, the degree

of literacy, and the type of instruction. Linguistic complexity, case marking, the use of self-positioning pronouns, verbal morphology and aspectual values are among the linguistic phenomena analyzed by the authors having contributed to this part of the volume. Another part of this volume deals with language didactics and addresses the questions of whether manipulating specific constructions from a usage-based perspective and a focus-on-form approach do indeed aid beginner learners to acquire complex forms in L2 German and nominal forms in L2 Polish, respectively. It also explores how some educational policies in Sweden have affected both the offer of French as a Foreign Language and its demand by students. The contributions to creole studies present diachronic analyses targeting the /z/ plural marking in Réunion creole, Fa d'Ambô and spoken French, and

a set of NPs found in two speeches pronounced in 1835 on the island of Agaléga by a coconut oil producer whose features are similar to Mauritian creole. Linguistic, social and historical factors are at the center of these contributions. **History of the Language Sciences / Geschichte der Sprachwissenschaften / Histoire des sciences du langage. 1. Teilband** Springer Science & Business Media

This volume provides the first comprehensive reference work in English on the French language in all its facets. It offers a wide-ranging approach to the rich, varied, and exciting research across multiple subfields, with seven broad thematic sections covering the structures of French; the history of French; axes of variation; French around the world; French in contact with other languages; second language acquisition; and French in

literature, culture, arts, and the media. Each chapter presents the state of the art and directs readers to canonical studies and essential works, while also exploring cutting-edge research and outlining future directions. The Oxford Handbook of the French Language serves both as a reference work for people who are curious to know more about the French language and as a starting point for those carrying out new research on the language and its many varieties. It will appeal to undergraduate and graduate students as well as established scholars, whether they are specialists in French linguistics or researchers in a related field looking to learn more about the language. The diversity of frameworks, approaches, and scholars in the volume demonstrates above all the variety, vitality, and vibrancy of work on the French language today.

The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .

Within the field of second language acquisition, interest in the acquisition of French as a second language has a long-standing tradition, especially in the European context. The aim of this book is to offer a synthesis of current research within this area. It contains contributions from different researchers in the field, including studies on the acquisition of grammar, formulaic language, lexis and pragmatic devices, and covering interlanguage development from beginner level up to very advanced, presumably near-native levels of proficiency. The learners in the studies reported in the volume represent different L1 backgrounds and age groups. The chapters shed light on current issues in research on second language acquisition from different theoretical perspectives, and contribute to a better understanding of L2 French and SLA in general. The volume should be of interest for students, teachers and researchers of L2 French and SLA. Originally published in *Language, Interaction and Acquisition* 3:1 (2012) **French (inc. Afin de parvenir à une meilleure entente entre pays voisins, maîtriser une autre langue que sa langue maternelle serait souhaitable Selon ces recommandations, le Conseil de l'Europe et l'Union européenne présentent ici un projet sur l'enseignement et l'apprentissage des langues étrangères dans le contexte scolaire. Il a pour objectif de développer, dans le cadre du concept de plurilinguisme, les bases générales de méthodologie de langue tertiaire en les illustrant d'exemples, sur le modèle de la séquence linguistique "l'allemand après l'anglais". Les organisateurs du projet, le Centre européen pour les langues vivantes du Conseil de l'Europe et le Goethe Institut Inter Nations, coopèrent à cet égard, en collaboration avec des institutions régionales actives dans le domaine de l'enseignement de langues étrangères.

Modern Language Teaching Routledge

Writing in English, German, or French, more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context. The gradually emerging institutions concerned with the study, organisation,

documentation, and distribution are considered as well as those dealing with the utilisation of language related knowledge. Special emphasis has been placed on related disciplines, such as rhetoric, the philosophy of language, cognitive psychology, logic and neurological science.

The Serial and Oral Method of Teaching Languages; Adapted to the French Walter de Gruyter

This study has grown out of an interest in French education and culture that dates from fondly remembered student days in France. Specifically, it is an attempt to explain the educational thought of Claude Fleury, a literate, responsible homme de lettres who analyzed the historical origins of public education as it existed in seventeenth-century France and, on that basis, proposed what he considered to be a more generally useful program of studies. Generous space has been devoted to historical, social, and pedagogical background in an effort to place Fleury's thought in its proper cultural context; namely, that of the decline of the Classical Age and the dawn of the Age of Reason. This background material represents also an attempt to explain, at times in detail, the origin of Fleury's *Traite du Choix et de la Methode des Etudes* and his rise to scholarly and pedagogical prominence at court. It is possible that Fleury's thought, while of most immediate interest to students of seventeenth-century cultural history, will be of interest also to a more general audience. In particular, those charged with providing education that must respond to the ever increasing practical needs of society and at the same time give to contemporary man a of his cultural heritage may find in Fleury's thought some useful sense historical perspective. It is a pleasure to acknowledge that this study would not have been possible without the encouragement and guidance of Dr. William W.

Claude Fleury (1640-1723) as an Educational Historiographer and Thinker Routledge

The European linguistic diversity goes far beyond the official national languages of the present 27 member states of the European Union. In every country several languages of smaller or larger groups of speakers are used besides the official language or the languages of the majority population. These languages are autochthonous languages that have been used for a long time in the individual country as well as allochthonous languages of different groups of migrants and their descendants. The sometimes complicated relations between national, regional and minority languages within various countries are discussed in this volume. Besides reports on several countries, the general sociolinguistic and legal conditions are dealt with in overview contributions. In addition, the Dublin Declaration on the relationship between official languages and regional and minority languages in Europe is presented in 24 languages.
