Administrative Theories and Management Thought Bloomsbury Publishing

This title was first published in 2000: Global competition is increasingly impacting on even the most isolated of companies; the only way for any company to sustain competitive advantage

is by tapping into the single remaining area of great potential - the management of people. If we want to be an above-average company, we will need an above-average ratio of above-average people who perform at above-average levels. None of which will happen without above-average levels of management. Malcolm Birkin's *Building the Integrated Company* offers a model for exploiting the human potential within organizations. This potential is one which, in previous decades, through an absence of focus on business basics and an adherence to mistaken ideas about sustainable competitive advantage, we have contrived to turn into all-too-limited performance. The first stage in any new learning process is to unlearn the misplaced concepts and bad habits we have developed. Section One of the book describes and contrasts the similarities and differences of American, European and Japanese management and then describes the characteristics of the Integrated Company, which has absorbed and perfected the best systems and philosophies from around the world. Anyone seeking to follow this lead needs to be able to distinguish the realities of these management systems from the myths. Section Two is built around a series of 13 detailed and scored questionnaires, containing over 240 individual questions,

enabling the reader to assess every aspect of their business, from management focus to the behaviours of the workforce, against the Integrated Company model. Section Three, the largest and most important section, deals with integration, addressing the practical implementation of the systems and philosophies in a clear, logical and hands-on manner. As the name suggests, the Integrated Company is a holistic model, involving every aspect of the business. Nevertheless, managing people - the unlimited potential - remains the most complex

Human resource (HR) governance is a relatively new construct that has recently begun attracting more and more attention in both research and practice. As a part of corporate governance, it represents the internal and external normative framework of human resource management and its supervision in organizations. This book theoretically integrates HR governance with the related domains of corporate governance, general management, HR management, and leadership. By doing so, it provides scholars and practitioners in the field with a precisely delineated system of theoretical concepts for their work and helps to translate these concepts into concrete research questions and practical guidelines. By interpreting the new ISO 30408 norm on human governance and taking into account recent developments, the book helps to comply with and anticipate current and future HR regulations.

Join the global movement that's making corporations more people-centric to achieve great results. The world is facing a global leadership crisis. Seventy-seven percent of leaders think they do a good job of engaging their people, yet 88 percent of employees say their leaders don't engage enough. There is also a high level of suffering in the workplace: 35 percent of employees would forgo a pay raise to see their leaders fired. This is an enormous waste of human talent--despite the fact that \$46 billion is spent each year on leadership development. Based on extensive research, including assessments of more than 35,000

leaders and interviews with 250 C-level executives, *The Mind of the Leader* concludes that organizations and leaders aren't meeting employees' basic human needs of finding meaning, purpose, connection, and genuine happiness in their work. But more than a description of the problem, *The Mind of the Leader* offers a radical, yet practical, solution. To solve the leadership crisis, organizations need to put people at the center of their strategy. They need to develop managers and executives who lead with three core mental qualities: mindfulness, selflessness, and compassion. Using real-world inspirational examples from Marriott, Accenture, McKinsey & Company, LinkedIn, and many more, *The Mind of the Leader* shows how this new kind of leadership turns conventional leadership thinking upside down. It represents a radical redefinition of what it takes to be an effective leader--and a practical, hard-nosed solution to every organization's engagement and execution problems.
