Ce livre, fruit d'une longue quête, propose un nouveau modèle d'accompagnement du cheval, prenant davantage en considération ses mouvements naturels, les ondulations du corps qui les déterminent, pour « les amplifier ou les infléchir ». Orientée par ses propres maîtres, inspirée des principes de l'aïkido et expérimentée sur un demi-siècle, cette nouvelle pratique équestre est décrite sous ses aspects techniques et philosophiques. En développant les qualités partagées du cheval et du cavalier, ces nouveaux principes de dressage refondent le respect du cheval par la préservation du naturel de sa locomotion et l'apaisement de son mental

qui en découle. Patrice Franchet d'Espèrey ouvre ainsi la voie d'un art équestre qui développe le bien-être de la relation : chacun reçoit plus et rend davantage. Cet ouvrage s'inscrit dans la tradition de l'équitation, la bouleverse, la prolonge et relance la transmission. Patrice Franchet d'Espèrey, ancien écuyer du Cadre noir, fut responsable du centre de documentation de l'École nationale d'équitation, devenue depuis Institut français du cheval et de l'équitation après son regroupement avec les Haras nationaux. Élève et disciple de René Bacharach, le dernier grand écuyer bauchériste du xxe siècle, il est docteur en sciences de l'éducation. Il a publié plusieurs ouvrages sur l'histoire de l'équitation et les techniques équestres. Bruno Girardon connaît Patrice Franchet d'Espèrey depuis plus de quarante ans, ayant été son élève. Ingénieur et entrepreneur, il est responsable énergie dans un groupe international du secteur de l'aéronautique. Les chevaux et l'équitation sous toutes ses formes sont devenus une passion. Ce livre est le fruit d'une longue amitié et d'une grande

complicité.

"Some cultures had extensive equestrian records, others very meagre deposits. Working through the centuries we see how the horse was utilised from early domestication on the Eurasian Steppes, in the Mesopotamian civilisations, in Egypt, Assyria, Urartu, Iran, Media, Persia and Greece until under Alexander the Great the horse became a vehicle for his world expansion. Aspects not usually considered are strongpoints of the text. These include breeding, horse husbandry, control mechanisms, veterinary and hazard aspects, and the different systems of training for chariot and cavalry warfare."-- Jacket.

Alien Energy Odile Jacob

Before the great flood described in the Old Testament, there was a race of giants called Nephilim inhabiting the earth. One of the giants - Ogias - fought a great dragon. An apocryphal expansion of an obscure verse in Genesis, "The Book of Giants: The Fallen Angels and Their Giant Sons" was composed prior to the 2nd

century BCE.

The UFO and crop circle enigmas have been interpreted as extraterrestrial or hoaxes, but there are subtle answers to genuine reports (not hoaxes) which have never been explored. Andrew Collins, best-selling British author, puts forth the idea that ground-based energy forms, with an intelligence, are responsible for these phenomena. Collins' experiments at crop circle locations are described along with photographs and data reported initially in 1994.

Extrait: ...si Dieu étoit Dieu, c'est à dire, s'il y avoit véritablement un Dieu, comme nos Christicoles l'entendent et le disent, il seroit également l'auteur de toutes les creatures, également l'auteur de tous les Hommes et de tous les Peuples; il ne seroit pas seulement le Dieu des Juifs ou des Grecs, mais aussi le Dieu de tous les Peuples et de toutes les Notions de la Terre, et partout il seroit également le Protecteur de tous et leur Bienfaiteur. Or les prétendus miracles qui sont rapportés dans ces prétendus Sts et sacres Livres et particulièrement ceux qui sont rapportés dans les Hyres du vieux Testament, n'auroient été faits, suivant leur rapport, que pour marquer de la part de Dieu une injuste et odieuse acception de peuples et de personnes, et pour détruire et accabler de maux et de misères--comme de sang froid et de propos délibéré les uns, et pour favoriser tout particulièrement les autres: car cette acception de peuples et de personnes préférablement des uns aux autres se voit manifestement dans les susdits livres du vieux Testament, et notamment dans ceux qui rapportent la vocation et le choix qu'ils disent que Dieu fit des Patriarches Abraham, Isaac et Jacob pour de leur posterité se faire tout particulièrement un peuple qu'il sanctifieroit et béniroit par dessus tous les

autres peuples de la Terre, car ces livres marquent expressément que Dieu apella le premier de ces Patriarches, qu'il lui commanda de sortir de son Pais, de quitter tous ses parens et amis et de s'en aller dans un autre Pais, qu'il lui montreroit, lui promet Gen. 12: 1. tant en...

Ecole de Cavalerie by Francois Robichon de la Guerinie, one of the bibles of classical dressage, most famous for its introduction of the shoulder-in. According to Col. Alois Podhajsky, this is "the most revolutionary book on riding of all times. Its principles are still applied unaltered at the Spanish Court Riding School and may be seen there in daily use." by Francois Robichon de la Guerinie William Steinkraus writes: "The first of the great 18th-century masterpieces, Francois Robichon de la Guerinie's Ecole de Cavalerie, boasts not only a marvelous and ground-breaking text---a cornerstone of modern dressage---but also superb engraved plates by Charles Parrocel. La Guerinie's work is still considered the equestrian 'Bible' of the Spanish Riding School of Vienna, and though it has only recently been translated word for word into English, it stands as an enduring landmark of equestrian literature."

Christian Authier en est convaincu : il y a de la place pour un dictionnaire de littérature française loin des sentiers battus et résolument contemporain. Guidé par le goût et la curiosité qu'il exerce depuis quelque vingt ans de critique et d'écriture, il nous invite au vagabondage. Dans ces trouvailles d'un promeneur solitaire, il y a les auteurs morts trop tôt (Frédéric Berthet, Jean-Marc Roberts), ceux depuis trop longtemps (Roger Nimier). Si la part belle est faite aux « hussards » (Blondin, Déon) et à leurs héritiers (Besson, Neuhoff), on trouvera également dans cette anthologie des prix Nobel, des auteurs d'un unique roman ou encore ceux pour happy few. Le trop méconnu Éric Holder côtoie Michel Houellebecq, à l'anarchiste Michel Ragon succède le royaliste Jean Raspail, l'ex-mao Daniel Rondeau croisera le gaulliste Jean Dutourd. Le lecteur en quête de découvertes devrait avoir de quoi se satisfaire. Connaissez-vous Éric Tellenne, Guillaume Clémentine, Eva Kristina Mindszenti, Michael Sebban, Sophie Maurer ? Sans doute pas. Ils sont là. Ils sont cent. Ils vous attendent.

In this delightful little volume, Honoré de Balzac, the renowned 19th century French novelist and playwright, takes readers on a short fantasy journey to the mystical island of Java where he - or rather the narrateur - encounters a deadly poison-breathing tree, civilized monkeys, a love-sick sparrow, and the epitome of Oriental desirability of the day - the women of Java.

And in the days of Nimrod, the mighty man (or giant), a fire appeared which ascended from the earth, and Nimrod went down, and looked at it, and worshipped it, and he established priests to minister there, and to cast incense from it. From that day the Persians began to worship fire...-from "The Fourth Thousand Years" One of the most prolific and respected Egyptologists of the Victorian era, Budge here offers his translation of the 4th-century A.D. Syrian text commonly known as "the Cave of Treasures," a history of the world from the Creation to the crucifixion of Christ and considered by some to be an apocryphal book of the Bible. Budge's extensive notes, linking the work to other ancient writings, as well as the numerous illustrations, make this unusual work, first published in 1927, an excellent resource for students of ancient civilizations and comparative mythology. SIR E. A. WALLIS BUDGE (1857-1934) was curator of Egyptian and Assyrian antiquities at the British Museum from 1894 to 1924. Among his many works of translation and studies of ancient Egyptian religion and ritual is his best-known project, The Egyptian Book of the Dead.

The Book of Giants Xenophon Press LLC

This is Eisenman's original, ground-breaking work in which he criticizes the archaeology and paleography of Qumran as it had been developed by 'the specialists' up to that time and rather offers his own hypothesis-starting with the fact that it was impossible to consider that the Maccabees were the so-called "Wicked Priests" at Qumran, primarily because everything known about them agrees, for the most part, with the doctrines and positions emanating from the documents known at that time to emanate from the area known as "Qumran" along the Northwestern part of the Dead Sea and which, for that reason, we call "The Dead Sea Scrolls." In addition, he shows rather that the Establishment against whom the Qumran Scrolls were in an almost homogeneous manner directed was rather that of the Herodians and the Priests that owed both their appointment and

authority to them and the Roman Governors that in due course either replaced or ruled either through or in conjunction with them. He also starts in this work to build his case for the fact that the individual came to be understood in Early Christian History as "James the Righteous" and called by everyone "James the Just"-that same individual known by everyone as "James the Brother of Jesus"-had very much in common with "the Righteous Teacher" described and alluded to in many Dead Sea Scrolls documents. That is why this book, originally published in the early 1980s, was subtitled "A New Hypothesis of Qumran Origins." It was necessary to subject both the archaeology and paleography of Qumran-upon which the so-called "Establishment" or "Consensus of Qumran Scholars" had all based both their theories and chronology to thoroughgoing criticism. This he has done, as only someone who originally studied math and physics, could do, in a meticulously masterful fashion. No one has 'laid a glove' on his analysis since. At the same time and in parallel fashion, he starts to suggest that the 'opponent' of this individual in Early Christian History, Paul, had about the same amount of characteristics with the individual these same Qumran Documents are constantly referring to as "The Spouter of Lying," "the Liar" or "Man of Lying," or "the Scoffer" or "Jester" (not someone to be taken seriously)-but, of course, this is not the same individual as "the Wicked Priest" whom prestigious Qumran 'scholars' on the highest level insist upon saddling him with because they saw "the Wicked Priest" and "the Lying Spouter" described in Qumran Documents as the same individual. Eisenman lays out here in very clear terms that the two individuals denoted as "the Wicked Priest" and "the Lying Spouter" were two distinct and absolutely separate persons-this again, despite what some 'scholars' attempt to foist on him in order to try to make him look ridiculous. No, on the contrary, in doing so, they only make themselves look ridiculous. Eisenman is very careful here - "the Spouter of Lying" is an internal opponent of "the Righteous Teacher" at Qumran. "He denied the Law in the midst of the whole Congregation"! "The Wicked Priest - certainly no 'Maccabean'/'Hasmonean' - was rather an Establishment and probably Herodian High Priest, meaning, appointed by the "Herodians" and their Roman Overlords. [The Dukays](#) Cosimo, Inc. Vilhelm Grønbech was a preeminent professor of the history of religion at the

University of Copenhagen in the early twentieth century. His vast breadth of knowledge of world cultures and religions had profound effect on Danish academic thought, and in *The Culture of the Teutons*, Grønbech turns his keen analysis toward his own culture, that of Germanic Europe. Grønbech draws upon a rich panoply of sources in the Norse sagas, legal rulings, and historical figures both living and mythological to deliver for us a compelling thesis of the tribes that harried Rome, of the Viking Age, of pagan rituals and later widespread adoption of Christianity as much more than the sum of bloodthirsty plundering, as less charitable historians have condemned them. Instead, we delve into a culture alien to that of Tacitus or the Greeks, misunderstood for hundreds if not thousands of years. In seeming contradiction, the pagan worldview is foreign compared to our own today, or to the culturally imperialistic Romans who documented their "barbarian" foes, yet one cannot be truly estranged from his own ancestors. The genius of *The Culture of the Teutons* lies in Grønbech's ability to weave together what at first glance appear polar opposites, but in reality are inexorably linked. The various Germanic tribes of Europe, the Teutons, place unshakeable value on honor, family, and religion to create a society perplexingly carnal yet sophisticated, advanced yet close to nature. And nowhere is this clearer than in their settlement of inhospitable lands such as Iceland or the Faroe Islands, in which they brought order to a seemingly untamable environment. The impact of the peoples of Northern Europe on world history today is so vast no amount of spilled ink can pay it justice. Antelope Hill Publishing is proud to bring this expansive tome back into the limelight for a modern English-speaking audience, now complete with a substantial glossary, index, and hundreds of footnotes to confer important cultural context that would have been assumed common knowledge to its intended Danish audience. This complete edition includes volumes I and II, published in 1909 and 1912, respectively.

Livres de France Ecriture

Racinet provides a recipe for absolute balance, whereby all else succeeds. He searches for answers to riding problems from the inside and provides a thorough understanding of the cause. This is enjoyable reading, whereby you can gain relaxation in your horse. This book outlines and explains the concept of "riding in lightness" as understood by Jean-Claude Racinet who has spent his life riding and teaching the French School of

horsemanship. Born in Paris in 1929, Jean-Claude Racinet is a graduate of St. Cyr, the French West Point, Class of 1950. He was a member of the French contingent in Korea (1950-53), where he was wounded twice. As an officer of the French army, he spent seven years in Tunisia and Algeria (1954-61) and four more years in Europe. While he spent most of his army career during the time when the military was getting rid of their horses, he managed, between and during his sojourns overseas, to successfully attend the Superior Equitation Course in the Cavalry School of Saumur (1953-54), winning the title of Champion of Tunisia in open jumping (1956), and to become a member of the Jumping Team of the Military School in Paris (1953). Riding teacher and trainer as a civilian after 1965, he was more particularly known by his retraining of difficult horses and later as an equestrian journalist by his always witty and sometimes scathing articles in the French equestrian monthly *L'Information Hippique*. In the United States since 1983, Jean-Claude Racinet became a successful teacher, trainer, lecturer, clinician, and author. Xenophon Press published in 1994 his highly popular book *Another Horsemanship*, now in its second printing. Jean-Claude Racinet has devoted his life to the vindication of "L'equitation de Legetete" (riding in lightness), which fosters balance by relaxing the horse - more so his mouth - excluding force in the wielding of the aids. In fact, the very essence of riding in the French Classical tradition. (softcover, photos, 135 pgs.) Excerpt from the book: From a rider's point of view, two distinct muscular functions preside over the equestrian performance. The first function assures locomotion. It is acted out through an alternation of extensions and contractions. The second function must establish favorable articular angles and provide a fulcrum to the action of the muscles in charge of the first function. It upholds the structure. In one word, it assures the "posture." This second function works through a steady muscular tension. It is obvious that the muscles affected by the first function, which requires an intermittent tension, cannot in the meantime fulfill the second function, which requires a steady tension. Therefore the two muscle sets affected by either function are, at any given time, totally distinct. Their definition is, however, blurred, since in plain, day-to-day riding, at a walk or at a gallop or over the jumps, the posture constantly changes. At a trot, however, the posture is steady; the head position as well as the angle of the pelvis

is pretty constant. At a trot, even at a racing trot, the horse's body is, so to say, "gelled"; its form does not change.

Provides convincing evidence that angels, demons, and fallen angels were flesh-and-blood members of a giant race predating humanity, spoken of in the Bible as the Nephilim. • Indicates that the earthly paradise of Eden was a realm in the mountains of Kurdistan. • By the author of Gateway to Atlantis. Our mythology describes how beings of great beauty and intelligence, who served as messengers of gods, fell from grace through pride. These angels, also known as Watchers, are spoken of in the Bible and other religious texts as lusting after human women, who lay with them and gave birth to giant offspring called the Nephilim. These religious sources also record how these beings revealed forbidden arts and sciences to humanity--transgressions that led to their destruction in the Great Flood. Andrew Collins reveals that these angels, demons, and fallen angels were flesh-and-blood members of a race predating our own. He offers evidence that they lived in Egypt (prior to the ancient Egyptians), where they built the Sphinx and other megalithic monuments, before leaving the region for what is now eastern Turkey following the cataclysms that accompanied the last Ice Age. Here they lived in isolation before gradually establishing contact with the developing human societies of the Mesopotamian plains below. Humanity regarded these angels--described as tall, white-haired beings with viperlike faces and burning eyes--as gods and their realm the paradise wherein grew the tree of knowledge. Andrew Collins demonstrates how the legends behind the fall of the Watchers echo the faded memory of actual historical events and that the legacy they have left humanity is one we can afford to ignore

only at our own peril.

Grau ist alle Theorie? Von wegen. Wer Pascale Berthiers Texte liest, bekommt einen außergewöhnlich lebendigen Eindruck von der Reitkunst. Es hat viel von dem, was andere Werke haben: systematisch gegliederte, logische Anleitungen und nachvollziehbare Erklärungen. Allerdings hat es etwas, was im Fachbuchregal selten anzutreffen ist: Humor. Damit ist Pascale Berthiers Werk ein unterhaltsames Fachbuch, das komplizierte Sachverhalte in leicht verdaulichen, sehr bildhaften Häppchen serviert. Es beschreibt die Techniken der Légèreté von der Basisarbeit bis zur Entwicklung höherer Lektionen in der Reit- und Fahrpraxis. Das Wort "Baucherismus" wird vom theoretischen Begriff zur greifbaren Praxis. Wie setzt der Reiter, Hand, Knie oder Gesäß korrekt ein? Warum ist die festgestellte Hand viel sanfter, als viele glauben und was bringt die Arbeit mit nur einem Zügel? Berthier stellt kluge Fragen und serviert herzhaft Antworten. Ganz nebenbei lernt der Leser Berthier und ihren Lehrmeister Racinet kennen, was dem Buch eine ganz persönliche Note verleiht.

Maccabees, Zadokites, Christians, and Qumran

The earliest surviving instance of sustained first-person travel narrative in Arabic Mission to the Volga is a pioneering text of peerless historical and literary value. In its pages, we move north on a diplomatic mission from Baghdad to the upper reaches of the Volga River in what is now central Russia. In this colorful documentary from the tenth century, the enigmatic Ibn Fadlan relates his experiences as part of an embassy sent by

Caliph al-Muqtadir to deliver political and religious instruction to the recently-converted King of the Bulgars. During eleven months of grueling travel, Ibn Fadlan records the marvels he witnesses on his journey, including an aurora borealis and the white nights of the North. Crucially, he offers a description of the Viking Rus, including their customs, clothing, body painting, and a striking account of a ship funeral. Together, these anecdotes illuminate a vibrant world of diversity during the heyday of the Abbasid Empire, narrated with as much curiosity and zeal as they were perceived by its observant beholder. An English-only edition.

Originally published in 1915, this pioneer study has long occupied an important place in the literature of sociology. An exercise in the statistical correlation of the economic and social institutions of the working classes of the early twentieth century, the book is an important link between contemporary sociology, with a focus on the problems of social development, and the classical social liberalism on which L. T. Hobhouse left his mark. The reissue includes the introduction written by Morris Ginsberg in the 1965 reprint, where he explains what he and his colleagues set out to achieve and responds to the criticism faced by the study. This is a classic work which is still of great value to sociologists and anthropologists today.

The Italian Tradition of Equestrian Art

This lovely book follows the training of three young horses, from their first schooling experiences to the execution of classical airs at the age of nine. Each of the three horses in this book have different personalities and capabilities, which prompt the author to draw upon his vast equestrian experience and highlight particular aspects of communication and technique throughout.
