In thirteen contributions, Byzantium in Dialogue with the Mediterranean. History and Heritage shows that throughout the centuries of its existence, Byzantium continuously communicated with other cultures and societies on the European continent, as well as North Africa and in the East. In this volume, 'History' represents not only the chronological, geographical and narrative background of the historical reality of Byzantium, but it also stands for an all-inclusive scholarly approach to the Byzantine world that transcends the boundaries of traditionally separate disciplines such as history, art history or archaeology. The second notion, 'Heritage', refers to both material remains and immaterial traditions, and traces that have survived or have been appropriated. Contributors are Hans Bloemsmas, Elena Boeck, Averil Cameron, Elsa Fernandes Cardoso, Cristian Caselli, Evangelos Chrysos,

Konstantinos Chryssogelos, Penelope Mougoyianni, Daphne Penna, Marko Petrak, Matthew Savage, Daniëlle Slootjes, Karen Stock, Alex Rodriguez Suarez and Mariëtte Verhoeven.

*Bibliographie de la France*  
John Benjamins Publishing Company

This book is an international collection of contributions from academia, industry and the armed forces. It addresses current and emerging Spatial Vision Models and their application to the understanding, prediction and evaluation of the tasks of target detection and recognition. The discussion in many of the chapters is framed in terms of military targets and military vision aids. However, the techniques analyses and problems are by no means limited to this area of application. The detection and recognition of an armored vehicle from a reconnaissance image are performed by the same

visual system used to detect and recognize a tumor in an X-ray. The analysis of the interaction of the human visual system with night vision devices is not different from the analysis needed in the case of an operator examining structures using a remote (endoscopic) camera, etc. The book is organized into three general sections. The first covers basic modeling of central (foveal) vision and its theoretical background. The second is centered on the evaluation of model performance in applications, while the third is dedicated to aspects of peripheral vision modeling and the expansion of peripheral modeling to include visual search.

*L'Ami de la religion et du roi*  
Longman Publishing Group

This ambitious study documents the underlying features which link the civilizations of the Mediterranean - Phoenician, Greek, Etruscan and Roman - and the Iron Age cultures of central Europe, traditionally associated with the Celts. It deals with the social, economic and cultural interaction in the first millennium BC which culminated in the

Roman Empire. The book has three principle themes: the spread of iron-working from its origins in Anatolia to its adoption over most of Europe; the development of a trading system throughout the Mediterranean world after the collapse of Mycenaean Greece and its spread into temperate Europe; and the rise of ever more complex societies, including states and cities, and eventually empires. Dr Collis takes a new look at such key concepts as population movement, diffusion, trade, social structure and spatial organization, with some challenging new views on the Celts in particular.

Fundamentals of Solar Radiation Conservation International Tropical Pocket Guide Series This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This

title was originally published in 1991. Climate Variability and Change Language Science Press Margaret of York, Simon Marmion, and The Visions of Tondal Getty Publications *Vision Models for Target Detection and Recognition* CRC Press 'Understanding valuation is relevant to everyone with an ambition in business. For us at Cevian Capital it is an absolutely critical skill. This book will take you there faster than any other in the field.' Christer Gardell Former Partner McKinsey, Managing Partner and co-founder of Cevian Capital 'A handy, accessible and well-written guide to valuation. The authors manage to capture the reader with high-level synthesis as well as more detailed insights in a great way.' Anna Storakers Head of Group Strategy & Corporate Development, Nordea Bank AB, formerly with Goldman Sachs & Co and McKinsey & Co "If you can envision the future value of a company you are a winner. Make this comprehensive and diligent book on corporate valuation your companion pursuing transactions and you will succeed." Hans

Otterling, Founding Partner, CEO Northzone Capital "Both in my previous position as an investment banker and today as an investor in high growth technology companies, corporate valuation has been a most critical subject. The Financial Times guide to Valuation serves as the perfect introduction to the subject and I recommend it to entrepreneurs as well as fellow private investors." Carl Palmstierna, former Partner Goldman Sachs, Business Angel 'Not only will Financial Times Guide to Corporate Valuation provide you with the basic understanding of corporate valuation, it also gives you an interesting insight into non-operational challenges that companies will face. And it does it all in an unexpectedly efficient and reader friendly manner. If you want to learn the basics and only have a few hours to spare, invest them into reading this book!' Daniel Hummel Head of Corporate Finance, Swedbank 'In this highly accessible and reliable introduction to valuation, Messieurs Frykman and Tolleryd have succeeded in selecting only the

essential building blocks in a topic that can otherwise be difficult to navigate. Indeed a guide, this book will prove handy to many of us and a breakthrough to some.' Per Hedberg, Academic Director Stockholm School of Economics Russia 'This book provides an accessible and informative entry point to the vast topic of valuation. The book covers mechanics as well as how value is linked to intangibles, growth opportunities and industry structure, all the way providing clear examples of every key idea. The authors understand value: they know what is useful, what is practical and what is critical, and give any reader great guidance to the challenge of getting values right.' Bo Becker Assistant Professor Harvard Business School "I read Frykman & Tolleryds book on Corporate Valuation the first time in the late 90's - the book has not only thought me how to value investments, but also how important it is to focus on long term cashflow when building and leading an organization" Mikael Schiller Owner, Chairman, Acne Studios 'The easy, no-nonsense approach to corporate valuation.'

Fiona McGuire, Corporate Finance Director FGS Understanding corporate valuation is crucial for all business people in today's corporate world. No other measure can indicate as completely the current status as well as the future prospects of a company. The Financial Times Guide to Corporate Valuation is a quick, no-nonsense guide to a complex subject. Whether you're a manager, executive, entrepreneur or student this comprehensive reading guide will help you tailor your learning according to your experience, existing knowledge and time constraints. Using the example of a fictional European telecommunications company, Mobitronics, as a model, it provides key insights into universal issues in corporate valuation and the most commonly used valuation methods. **THE ONLY STRAIGHTFORWARD GUIDE TO CORPORATE VALUATION** **Coping with Obscurity** Cambridge University Press Coping with Obscurity publishes the papers discussed at the Brown University Workshop on Earlier Egyptian grammar in March, 2013. The

workshop united ten scholars of differing viewpoints dealing with the central question of how to judge and interpret the grammatical value of the written evidence preserved in texts of the Old and Middle Kingdoms (ca. 2350-1650 BC). The nine papers in the volume present orthographic, lexical, morphological, and syntactic approaches to the data and represent a significant step toward a new, pluralistic understanding of Earlier Egyptian grammar. **Enciclopedia universal ilustrada europeo-americana** ReadHowYouWant.com Presented at a symposium held in 1990 to celebrate the Getty Museum's acquisition of the only known illuminated copy of The Visions of Tondal, twenty essays address the celebrated bibliophilic activity of Margaret of York; the career of Simon Marmion, a favorite artist of the Burgundian court; and The Visions of Tondal in relation to illustrated visions of the Middle Ages. Contributors include Maryan Ainsworth, Wim Blockmans, Walter Cahn, Albert Derolez, Peter Dinzelbacher, Rainald Grosshans, Sandra Hindman, Martin Lowry,

Nigel Morgan, and Nigel Palmer.

 BRILL  
 TEODOR GABRIEL  
 CRAINIC, DIRECTOR The Centre for Research on Transportation (C.R.T.) was founded in 1971 by the Universite de Montreal. From 1988 on, it is jointly managed by the Universite de Montreal and its affiliated schools, the Ecole des Hautes Etudes Commerciales and Ecole Poly technique. Professors, students and researchers from many institutions in the Montreal area join forces at the C.R.T. to analyze transportation, logistics and telecommunication systems from a multidisciplinary perspective. The C.R.T. pursues three major, complementary objectives: training of high-level specialists; the advancement of knowledge and technology; the transfer of technology towards industry and the public sector. Its main field of expertise is the development of quantitative and computer-based models and methods for the analysis of urban, regional and intercity transportation networks, as well as

telecommunication systems. This applies to the study of passenger and commodity flows, as well as to the socioeconomic aspects of transportation: policy, regulation, economics. The twenty-fifth anniversary of the C.R.T. offered the opportunity to evaluate past accomplishments and to identify future trends and challenges. Five colloquia were thus organized on major research and application themes that also reflected our main research areas. They gathered together internationally renowned researchers who linked recent scientific and technological advances to modeling and methodological challenges waiting to be tackled, particularly concerning new problems and applications, and the increasingly widespread use of new technologies. *Memory and Re-Creation in Troubadour Lyric* Routledge  
 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations.

Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

*Biographical Dictionary of Medallists: T-Z* Margaret of York, Simon Marmion, and The Visions of Tondal While translation history, literary translation, and periodical publications have been extensively analyzed within the fields of Translation Studies, Comparative Literature, and Communication Sciences, the relationship between these three topics remains underexplored. *Literary Translation in Periodicals* argues that there is a pressing need for an

analytical focus on translation in periodicals, a collaborative network of researchers, and a transnational and interdisciplinary approach. The book pursues two goals: (1) to highlight the innovative theoretical and methodological issues intrinsic to analyzing literary translation in periodical publications on a small and large scale, and (2) to contribute to a developing field by providing several case studies on translation in periodicals over a wide range of areas and periods (Europe, Latin America, and Asia in the 19th and 20th centuries) that go beyond the more traditional focus on national and European periodicals and translations. Combining qualitative and quantitative methods of analysis, as well as hermeneutical and sociological approaches, this book reviews conceptual and methodological tools and proposes innovative techniques, such as social network analysis, big data, and large-scale analysis, for tracing the history and evolution of literary translation in periodical publications. *Journal général de*

FeniXX  
The collection of Barbara and Lawrence Fleischman of New York is one of the most important private collections of ancient Greek and Roman art in the United States and among the most important in the world. Composed of approximately three hundred objects from the Bronze Age to the Late Antique, it includes bronze statuettes, marble sculpture, vases, jewelry, lamps and candelabra, keys, weights, and silver bowls and utensils. The Fleischmans have a particular fascination with pieces associated with everyday life in antiquity, since these objects evoke a human connection to the past. They are also drawn to pieces that exemplify the human propensity to transform a functional object into a thing of beauty. Not only

has their emotional response to an object's aesthetic appeal or its historical significance guided them in their forty years of collecting, personal interests have been at work as well. The large number of pieces related to the theater or representing theatrical subjects reflects Barbara Fleischman's lifelong love of that art. *A Passion for Antiquities* contains photographs and extensive catalogue entries on the objects included in the exhibition at the J. Paul Getty Museum and the Cleveland Museum of Art. Eighteen contributors provide art historical and descriptive information about each piece. The objects not selected for the exhibition are detailed in a checklist that specifies their origins, dates, media, and sizes. This book is the first major reference on the entire collection, since most of the objects have never before been publicly shown. To facilitate finding specific objects or groups of objects, the book is organized first chronologically and then by medium. Bibliographic sources for each entry cite both publications where the specific work is discussed as well as

references to related scholarship. Karol Wight provides a chronological overview of the collection, and Oliver Taplin relates selected pieces to the development of Greek theater. The exhibition of Barbara and Lawrence Fleischman's collection and this catalogue allow us to enter into their minds and emotions so that, for a time, we can share their passion for antiquities.

Getty Publications Stephen Pitel and Nicholas Rafferty have written a highly readable, thoughtful treatise that explains and analyzes the rules of the conflict of laws in force in Canada in a clear and concise manner. Understanding the conflict of laws allows lawyers, judges, scholars, and students to better address any legal situation that crosses borders.

*Margaret of York, Simon Marmion, and The Visions of Tondal* World Scientific  
A COMPANION TO THE ARCHAEOLOGY OF THE ANCIENT NEAR EAST A Companion to the Archaeology of the Ancient Near East is a comprehensive and authoritative overview of ancient material culture from the late Pleistocene to Late Antiquity. This

expansive two-volume work includes 58 new essays from an international community of ancient Near East scholars. With coverage extending from Asia Minor, the eastern Mediterranean, and Egypt to the Caucasus, Central Asia, and the Indo-Iranian borderlands, the book highlights the enormous variation in cultural developments across roughly 11,000 years of human endeavor. In addition to chapters devoted to specific regions and particular periods, many contributors concentrate on individual industries and major themes in ancient Near Eastern archaeology, ranging from metallurgy and agriculture to irrigation and fishing. Controversial issues, including the nature and significance of the antiquities market, ethical considerations in archaeological praxis, the history of the foundation of departments of antiquities, and ancient attitudes towards the past, make this a unique collection of studies that will be of interest to scholars, students, and interested readers alike.

**Pangolins** Getty Publications

This book features 27

integrated essays that offer access to the art, life, and legacy of one of the world's most influential artists.

#### The Jewish Encyclopedia

Irwin Law

The sun radiates a tremendous amount of energy, called solar energy or solar radiation, which is the main natural source of energy on the Earth, by far. Because solar radiation is the almost unique supplier of energy to the Earth, it has a primary influence on life and activities on the Earth. The climate is a first example, but there are many others, such as plant growth or human health, or even the design of buildings, the production of energy, notably electrical and thermal, or even aging materials. This book aims to provide simple answers to anyone who has questions about solar radiation. Its ambition is to help by presenting the fundamental elements of the solar radiation received on the ground. The book includes many examples and numerous illustrations, as well as

some simple but fairly precise equations to calculate the various elements covered and to reproduce the figures and graphs. The first of the three parts of this book is devoted to the relative geometry between the direction of the sun and an observer on the ground as well as to the solar radiation emitted by the sun and received at the top of the atmosphere. The orbit of the Earth around the sun and the solar declination are described. The concept of time is introduced which is closely linked to the solar cycle and the rotation of the Earth on itself. Equations are given to calculate the solar radiation received on a horizontal or inclined surface located at the top of the atmosphere. The spectral distribution of the extraterrestrial solar radiation is described. The second part of this book addresses how the solar radiation incident at the top of the atmosphere is attenuated and modified in its downward path to

the ground. The reflection of the radiation by the ground is presented. The solar radiation received on the ground by a horizontal or inclined collector plane, such as a natural slope or a rooftop, is discussed, as well as its spectral distribution. The variability of the radiation is addressed in relation to the properties of solar radiation estimated from the measurements. The third part deals with direct or indirect measurements of the solar radiation received on the ground over a given integration time (minute, hour, day, or month), whether for total radiation or radiation in a spectral range such as ultraviolet (UV), or daylight, or photosynthetically active radiation (PAR). It also explains how to check the plausibility of the measurements. Fundamentals of Solar Radiation will be a valuable resource to all professionals, engineers, researchers, students, and other practitioners that seek an understanding of solar radiation.
