 The animals of the forest
 have assembled to

discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk or the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. The *Most Important Thing* received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable. *Biography Exemplary and Instructive* Capstone One motif, two photographers, two styles: Michael Pasdzior and Peter Haefcke traveled Europe's Atlantic coast in the past eight years. The result is a photographic art book that lives from its contrasts. While Haefcke takes his pictures in black and white, Pasdzior photographs in color. The

Atlantic coast presents itself just as contradictory: Sometimes original, wild and rough, sometimes altered by human hands and embossed. The moody photographs and the elaborate design as a turning book make Europe's Atlantic Coast equally attractive for photography fans and coast-lovers.

Heart disease poses the greatest health threat that women in the United States face: One in every three women will die from it each year. But that doesn't have to be the case. Heart disease is not an inevitable part of growing older. In fact, if you reach the age of 50 without developing the major risk factors for heart disease, you can live your entire life without it, and your chances of dying from it decrease from 50 percent to a strikingly low 8 percent. The key to preventing heart disease is embracing a heart-healthy lifestyle—and the sooner, the better. In this groundbreaking book, the American Heart Association shows you how even the smallest changes can make a big difference over time to protect the health of your heart. The Complete Guide to Women's Heart Health explains how

gradual and sustainable shifts in your routine, such as using just a little more than one percent of your time each week to exercise or losing just 10 percent of your body weight, can have a far-reaching impact on your health. With specific pointers on diet, exercise, and health care, this book shows you how to get past the common obstacles as well as how to make taking care of your heart easy and attainable for the busy life you lead, at every age. In chapters targeted for every decade of a woman's life from her 20s to her 70s and beyond, the American Heart Association gives women age-appropriate advice on healthy lifestyle choices and heart-health care. Additional information addressing issues of special interest to women and how those issues affect the heart include:

- Smoking
- Pregnancy
- Menopause and hormone therapy
- Aging
- Diabetes and other health conditions

With the latest guidelines on prevention, suggestions on how to work with your healthcare providers to maintain and improve your vitality, details on screening technologies, and facts about common diagnoses

and treatment options, this book is the ultimate resource to help you—and all the women in your life—fight heart disease. From the Hardcover edition.

David Baldacci delivers a moving, family drama about learning to love again after terrible heartbreak and loss in this classic New York Times bestseller—soon to be a Hallmark original movie. It's almost Christmas, but there is no joy in the house of terminally ill Jack and his family. With only a short time left to live, he spends his last days preparing to say goodbye to his devoted wife, Lizzie, and their three children. Then, unthinkably, tragedy strikes again: Lizzie is killed in a car accident. With no one able to care for them, the children are separated from each other and sent to live with family members around the country. Just when all seems lost, Jack begins to recover in a miraculous turn of events. He rises from what should have been his deathbed, determined to bring his fractured family back together. Struggling to rebuild their lives after Lizzie's death, he reunites everyone at Lizzie's childhood home on the oceanfront in South Carolina. And there, over one unforgettable summer, Jack will begin to learn to love again, and he and his children will learn how to become a

family once more. Europe's Atlantic Coast Grand Central Publishing This collection of short wordless picture books helps to support children with speech, language and communication needs as they develop their expressive sentence and narrative skills through storytelling. Each book is comprised of six colourful images that follow a simple everyday routine such as 'Brushing Teeth', 'Having a Haircut' and 'Walking the Dog'. Unlike traditional picture books, they follow a film scroll effect, showing the progression of time and allowing the child to follow the story to its resolution. Because of their simplicity, the books can support children as they move from simple to intermediate sentence levels, as well as encouraging them to consider additional elements of language such as cause and effect, sequencing and inference. This resource includes: Ten beautifully illustrated picture books, each following a simple pattern of routine, disruption and resolution An accompanying guidebook including story scripts, cue questions and prompts for using the resource to support

additional skills Although developed specifically to help children with speech, language and communication needs, this set is suitable for any child who requires support and practice in developing their speech. It is an invaluable resource for speech and language therapists, teaching staff and caregivers.

DOE Tank Waste: How clean is clean enough? The U.S. Congress asked the National Academies to evaluate the Department of Energy's (DOE's) plans for cleaning up defense-related radioactive wastes stored in underground tanks at three sites: the Hanford Site in Washington State, the Savannah River Site in South Carolina, and the Idaho National Laboratory. DOE plans to remove the waste from the tanks, separate out high-level radioactive waste to be shipped to an off-site geological repository, and dispose of the remaining

lower-activity waste onsite. The report concludes that DOE's overall plan is workable, but some important challenges must be overcome—including the removal of residual waste from some tanks, especially at Hanford and Savannah River. The report recommends that DOE pursue a more risk-informed, consistent, participatory, and transparent for making decisions about how much waste to retrieve from tanks and how much to dispose of onsite. The report offers several other detailed recommendations to improve the technical soundness of DOE's tank cleanup plans.
