Railways and the Western European Capitals Study of Journalism

A magisterial history of the artists and writers who left Weimar when the Nazis came to power. In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to remain citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. *Weimar in Exile* follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch, Bertolt Brecht, Alfred Döblin, Hanns Eisler, Heinrich Mann, Thomas Mann, Anna Seghers, Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis.

Human trafficking has become a global concern over the last 20 years, but its violence has terrorized and traumatized its victims and survivors for millennia. This study examines the deep history of human trafficking from Late Antiquity to the Early Modern Period. It traces the evolution of trafficking patterns: the growth and decline of trafficking routes, the ever-changing relationships between traffickers and authorities, and it examines the underlying causes that lead to vulnerability and thus to

exploitation. As the reader will discover, the conditions that lead to human trafficking in the modern world, such as poverty, attitudes of entitlement, corruption, and violence, have a long and storied past. When we understand that past, we can better anticipate human trafficking's future, and then we are better able to fight it.

Built around the concept of linguistic and cultural plurality, this book defines language as an instrument of action and symbolic power. Plurality is conceived here as : a complex array of voices, perspectives and approaches that seeks

to preserve the complexity of the multilingual and multicultural enterprise, including language learning and teaching ; a coherent system of relationships among various languages, research traditions and research sites that informs qualitative methods of inquiry into multilingualism and its uses in everyday life ; a view of language as structured sociohistorical object, observable from several simultaneous spatiotemporal standpoints, such as that of daily interactions or that which sustains the symbolic power of institutions. This book is addressed to teacher trainers, young researchers, decision makers, teachers concerned with the role of languages in the evolution of societies and educational systems. It aims to elicit discussion by articulating practices, field observations and analyses based on a multidisciplinary conceptual framework. Europe (in Theory) is an innovative analysis of eighteenth- and nineteenth-century ideas about Europe that continue to inform thinking about culture, politics, and identity today. Drawing on insights from subaltern and postcolonial studies, Roberto M. Dainotto deconstructs imperialism not from the so-called periphery but from within Europe itself. He proposes a genealogy of Eurocentrism that accounts for the way modern theories of Europe have marginalized the continent's own southern region, portraying countries including Greece, Italy, Spain, and Portugal as irrational, corrupt, and clan-based in comparison to the rational, civic-minded nations of northern Europe. Dainotto argues that beginning with Montesquieu's *The Spirit of Laws* (1748), Europe not only defined itself against an

"Oriental" other but also against elements within its own borders: its South. He locates the roots of Eurocentrism in this disavowal; internalizing the other made it possible to understand and explain Europe without reference to anything beyond its boundaries. Dainotto synthesizes a vast array of literary, philosophical, and historical works by authors from different parts of Europe. He scrutinizes theories that came to dominate thinking about the continent, including Montesquieu's invention of Europe's north-south divide, Hegel's "two Europes," and Madame de Staël's idea of opposing European literatures: a modern one from the North, and a pre-modern one from the South. At the same time, Dainotto brings to light counter-narratives written from Europe's margins, such as the Spanish Jesuit Juan Andrés's suggestion that the origins of modern European culture were eastern rather than northern and the Italian Orientalist Michele Amari's assertion that the South was the cradle of a social democracy brought to Europe via Islam.

Human Trafficking in Medieval Europe McGraw Hill Professional

Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of

genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.

The Changing Business of Journalism and Its Implications for Democracy Springer

This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the

commercial and creative industries. *A Century of Artists Books* Springer
The concept of a 'return to Europe' has been integral to the movement for Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine's European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors discuss many aspects of Ukraine's contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful point of reference, a measure against which the situation in post-independence Ukraine is gauged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk

Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

Principles of Penal Law - Jeremy

Bentham - Jeremy Bentham (15 February

1748 - 6 June 1832) was an English

philosopher, jurist, and social reformer.

He is regarded as the founder of modern

utilitarianism. Bentham defined as the

"fundamental axiom" of his philosophy

the principle that "it is the greatest

happiness of the greatest number that is

the measure of right and wrong." He

became a leading theorist in Anglo-

American philosophy of law, and a

political radical whose ideas influenced

the development of welfarism. He

advocated individual and economic

freedom, the separation of church and

state, freedom of expression, equal

rights for women, the right to divorce,

and the decriminalising of homosexual

acts. He called for the abolition of

slavery, the abolition of the death

penalty, and the abolition of physical punishment, including that of children. He has also become known in recent years as an early advocate of animal rights. Though strongly in favour of the extension of individual legal rights, he opposed the idea of natural law and natural rights, calling them "nonsense upon stilts." Bentham was an obsessive writer and reviser, but was constitutionally incapable, except on rare occasions, of bringing his work to completion and publication. Most of what appeared in print in his lifetime was prepared for publication by others. Several of his works first appeared in French translation, prepared for the press by Etienne Dumont, for example, *Theory of Legislation, Volume 2 (Principles of the Penal Code)* 1840, Weeks, Jordan, & Company. Boston. Some made their first appearance in English in the 1820s as a result of back-translation from Dumont's 1802

collection (and redaction) of Bentham's writing on civil and penal legislation."

The business of journalism is widely held to be in a terminal crisis today, in particular because the rise of the internet has drained audience attention and advertising revenue away from existing media platforms. This book, the first systematic international overview of how the news industry is dealing with current changes, counters such simplistic predictions of the supposedly technologically determined death of the news industry. It offers instead nuanced scrutiny of the threats and opportunities facing legacy news organisations across the world in countries as diverse as the United States, the United Kingdom, France, Germany, Finland, Brazil, and India as they transition to an increasingly convergent media landscape.
