**Staying Put** Princeton Review

A Pulitzer Prize Finalist Rodriguez's acclaimed first book, *Hunger for Memory* raised a fierce controversy with its views on bilingualism and alternative action. Now, in a series of intelligent and candid essays, Rodriguez ranges over five centuries to consider the moral and spiritual landscapes of Mexico and the US and their impact on his soul.

The Crash Course is based on the latest changes to the AP English Language and Composition course and exam and focuses only on the topics tested, so you can make the most of your study time.

**Princeton Review AP English Language & Composition Prep, 18th**

**Edition** Princeton Review

Providing easy-to-use alternatives to the "stand and deliver" approach to teaching that causes so many students to tune out--or even drop out--Total Participation Techniques presents dozens of ways to engage K-12 students in active learning and allow them to demonstrate the depth of their knowledge and understanding. The authors, Pérsida Himmele and William Himmele, explain both the why and the how of Total Participation Techniques (TPTs) as they explore the high cost of student disengagement, place TPTs in the context of higher-order thinking and formative assessments, and demonstrate how to create a "TPT-conducive classroom." Readers will learn how to implement field-tested techniques they can use on the spot (e.g., Quick-Draws, Quick-Writes, Chalkboard Splash); with Hold-Up cards (e.g., True/Not True, Selected Response); with movement (e.g., Bounce Cards, Line-Ups, Simulations); and to guide note-taking and concept analysis (e.g., Picture Notes, 3-Sentence Wrap-Up, Debate Team Carousel). Each TPT is presented in four parts: \* A descriptive overview \* How It Works--step-by-step instructions for implementation \* How to Ensure Higher-Order Thinking--ideas for advancing students beyond surface-level thinking \* Pause to Apply--suggestions for how to adapt and personalize the technique for specific contexts and content areas Filled with examples from real classrooms, Total Participation Techniques is an essential toolkit for teachers at all levels and for administrators who want a model for analyzing lessons to ensure that they are relevant, engaging, and cognitively challenging.

Provides test-taking strategies, a subject review, coverage of the essays, vocabulary words, and two full-length practice tests with explanations.

*Princeton Review AP English Language & Composition Premium Prep, 2023*

Houghton Mifflin Harcourt

The Book That Launched an International Movement Fans of The Anxious

Generation will adore *Last Child in the Woods*, Richard Louv's groundbreaking New York Times bestseller. "An absolute must-read for parents." —The Boston

Globe "It rivals Rachel Carson's *Silent Spring*." —The Cincinnati Enquirer "I like to play indoors better 'cause that's

where all the electrical outlets are,"

reports a fourth grader. But it's not only computers, television, and video games

that are keeping kids inside. It's also their parents' fears of traffic, strangers,

Lyme disease, and West Nile virus; their schools' emphasis on more and more

homework; their structured schedules; and their lack of access to natural areas.

Local governments, neighborhood associations, and even organizations

devoted to the outdoors are placing legal and regulatory constraints on many wild

spaces, sometimes making natural play a crime. As children's connections to

nature diminish and the social,

psychological, and spiritual implications become apparent, new research shows

that nature can offer powerful therapy for such maladies as depression, obesity,

and attention deficit disorder.

Environment-based education

dramatically improves standardized test scores and grade-point averages and

develops skills in problem solving,

critical thinking, and decision making. Anecdotal evidence strongly suggests that childhood experiences in nature stimulate creativity. In *Last Child in the Woods*, Louv talks with parents, children, teachers, scientists, religious leaders, child-development researchers, and environmentalists who recognize the threat and offer solutions. Louv shows us an alternative future, one in which parents help their kids experience the natural world more deeply—and find the joy of family connectedness in the process. Included in this edition: A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad [Cracking the AP English Language & Composition Exam, 2017 Edition](#) Algonquin Books

Debra Marquart grew up on a farm in rural North Dakota—on land her family had worked for generations. From the earliest age she knew she wanted out; surely life had more to offer than this unyielding daily grind, she thought. But she was never able to abandon it completely. "[A] rich memoir, set in North Dakota, about growing up on and escaping from a family farm for a future that held once unheard-of opportunities as a rock musician, poet, and English teacher." —Chicago Sun-Times [Princeton Review AP English Language and Composition Prep 2021](#) Beacon Press (MA)

explanations and model essay responses

*Cracking the AP English Language & Composition Exam 2020, Premium Edition* University of Pittsburgh Pre #1 New York Times bestseller "Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history."—Bill Gates "Monumental... an authoritative and disturbing morality tale."—Chicago Tribune

The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, "The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.
