*Champion* Simon and Schuster  
#1 New York Times Bestseller Oprah's Book Club Selection The  
"extraordinary . . . monumental masterpiece" (Booklist) that  
changed the course of Ken Follett's already phenomenal  
career—and begins where its prequel, *The Evening and the  
Morning*, ended. "Follett risks all and comes out a clear winner,"  
extolled Publishers Weekly on the release of *The Pillars of the  
Earth*. A departure for the bestselling thriller writer, the historical  
epic stunned readers and critics alike with its ambitious scope  
and gripping humanity. Today, it stands as a testament to

Follett's unassailable command of the written word and to his  
universal appeal. *The Pillars of the Earth* tells the story of Philip,  
prior of Kingsbridge, a devout and resourceful monk driven to  
build the greatest Gothic cathedral the world has known . . . of  
Tom, the mason who becomes his architect—a man divided in his  
soul . . . of the beautiful, elusive Lady Aliena, haunted by a secret  
shame . . . and of a struggle between good and evil that will turn  
church against state and brother against brother. A spellbinding  
epic tale of ambition, anarchy, and absolute power set against  
the sprawling medieval canvas of twelfth-century England, this is  
Ken Follett's historical masterpiece.

Beauty can be a gift—or a wicked temptation. So it is for Filippo Lippi, growing up in Renaissance Florence. He has a talent—not only can he see the beauty in everything, he can capture it, paint it. But while beauty can seduce you and art can transport you—it cannot always feed you or protect you. To survive, Pippo Lippi, orphan, street urchin, budding rogue, must first become Fra Filippo Lippi: Carmelite friar, man of God. His life will take him down two paths at once. He will become a gambler, a forger, a seducer of nuns; and at the same time he will be the greatest painter of his time, the teacher of Botticelli and the confidante of the Medicis. So who is he really—lover, believer, father, teacher, artist? Is anything true except the paintings?

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Taking stock of political and economic development in the world today, this book re-examines development in an era of rapid social change, and reflects the work of an intellectual giant, Andre Gunder Frank. Gunder Frank deconstructed conventional development economics and modernization theory, creating dependency theory. Today dependency theory has been replaced by world systems analysis - the view that national and regional economic (and political) development cannot be seen in isolation; states are part of a global economy that, in a sense, dictates and limits action. This is an excellent synthesizing volume on the state of development studies. Although a great part of its

purpose is to pay tribute to its intellectual fat
