Diary of a Pet Turkey LB Kids

What happens when Cooper, a newly adopted puppy, takes up residence in Henry's home? The little pooch sure is adorable, but who knew he had so much to learn! Love Me Gently is a kid's guide to man's best friend. It captures the everyday challenges of raising a pup through a child's eye. But who is teaching who? Henry may be coaching Cooper, but he is also discovering valuable lessons about responsibility, unconditional love, patience, and kindness along the way! *Research in Education* Corwin Press

This powerful activity book will engage hands, hearts, and minds as it introduces children to the guiding principles of the Black Lives Matter movement. When the Black Lives Matter movement began in 2013, the three founders--Alicia Garza, Patrisse Khan-Cullors, and Opal Tometi--anchored its work in a list of guiding principles, developed through conversation with other activists. These principles commit the movement to empathy, loving engagement, and just

action among its participants; affirm the importance of Black women, families, elders, and LGBTQ folk; and celebrate the strength and diversity of Black people in their communities and around the globe. Now young people can explore these powerful principles in *What We Believe: A Black Lives Matter Principles Activity Book*. Created by two teachers with more than thirty-five years of educational experience between them, the book presents the guiding principles in down-to-earth, child-friendly language, with each principle accompanied by writing prompts, space for children or adults to create their own reflections, and a coloring page. Supporting materials guide adults in sharing the principles with children and encourage kids to dream big and take action within their communities. An essential resource for anyone discussing racial equity with young people, *What We Believe* offers a beautiful and inspiring lens on the most important social justice movement of our time. Lee & Low Books will donate a portion of its proceeds from the book to the Black Lives Matter Global Network Foundation, Inc.

Perfectly on-brand for Todd Parr, this full-color activity book includes themes of family, inclusivity, and humor and encourages creativity while reinforcing early-learning skills. Includes a sheet of stickers. Most traditional activity books are organized by skill with an alphabet section followed by a number section, etc. To keep this in the spirit of Todd's brand, this book begins with "all about me" and family, and then moves outward to community, and then even further outward to the world. The skills will be scattered throughout and there will be plenty of room for kids to free draw and be creative. Features: Letters Handwriting Numbers Shapes Colors Emotions All About Me Community *What We Believe* National Geographic Books

"Family isn't always your relatives. It's the ones who accept you for who you are. The ones who would do anything to see you smile, and who love you no matter what." - Unknown Teachers do so much more than just teach academics. They build a sense of community within their classrooms, creating a home away from home where they make their students feel safe, included, and loved. With its heartfelt message and colorfully whimsical illustrations, "Our Class is a Family" is a book that will help build and strengthen that class community. Kids learn that their classroom is a place where it's safe to be themselves, it's okay to make mistakes, and it's important to be a friend to others. When hearing this story being read aloud by their teacher, students are sure to feel like they are part of a special family. And currently, during such an unprecedented time when many teachers and students are not physically IN the classroom due to

COVID-19 school closures, it's more important than it's ever been to give kids the message that their class is a family. Even at a distance, they still stick together.

The wonderful thing about mathematical art is that the most beautiful geometric patterns can be produced without needing to be able to draw, or be 'good at art'. Mathematical art is accessible to learners of all ages: its algorithmic nature means that it simply requires the ability to follow instructions carefully and to use a pencil and ruler accurately. It is engaging, enriching, thoroughly enjoyable and is a great leveller in the classroom. Learners who may not normally shine in mathematics lessons will take your breath away with their creativity. Those who struggle with their mathematics will experience the joy of success through their mathematical art-making. The six Artful Maths activities in this book are hands-on tasks that will develop important skills such as hand-eye co-ordination, manual dexterity and design thinking, which is a valuable form of problem-solving. Decisions need to be made about placement, size and colour, all of which entail thinking about measurements, proportions and symmetry. They can be undertaken alone or with a teacher to draw out the mathematics underlying the patterns and to practice key content in the school curriculum. For ages 9 to 16+. Contents: Curves of Pursuit, Mazes and Labyrinths, Impossible Objects, Epicycloids, Perfect Proportions, Parabolic Curves.

A no-holds-barred assault on outdated teaching methods—with dramatic and practical proposals on how education can be made relevant to today's world. Praise for *Teaching As a Subversive Activity* "A healthy dose of Postman and Weingartner is a good thing: if they make even a dent in the pious . . . American classroom, the book will be worthwhile."—New York Times Book Review "Teaching and knowledge are subversive in that they necessarily substitute awareness for guesswork, and knowledge for experience. Experience is no use in the world of Apollo 8. It is simply necessary to know. However, it is also necessary to know the effect of Apollo 8 in creating a new Global Theatre in which student and teacher alike are looking for roles. Postman and Weingartner make excellent theatrical producers in the new Global Theatre."—Marshall McLuhan "It will take courage to read this book . . . but those who are asking honest questions—what's wrong with the worlds

in which we live, how do we build communication bridges cross the Generation Gap, what do they want from us?—these people will squirm in the discovery that the answers are really within themselves.”—Saturday Review “Neil Postman and Charles Weingartner go beyond the now-familiar indictments of American education to propose basic ways of liberating both teachers and students from becoming personnel rather than people . . . the authors have created what may become a primer of ‘the new education’ Their book is intended for anyone, teacher or not, who is concerned with sanity and survival in a world of precipitously rapid change, and it’s worth your reading.”—Playboy “This challenging, liberating book can unlock not only teachers but anyone for whom language and learning are not dead.”—Nat Hentoff

2021 Schneider Family Book Award Young Children's Honor Book (American Library Association) Experience the true story of lifelong activist Jennifer Keelan-Chaffins and her participation in the Capitol Crawl in this inspiring autobiographical picture book. This beautifully illustrated story includes a foreword from Jennifer and backmatter detailing her life and the history of the disability rights movement. This is the story of a little girl who just wanted to go, even when others tried to stop her. Jennifer Keelan was determined to make a change—even if she was just a kid. She never thought her wheelchair could slow her down, but the way the world around her was built made it hard to do even simple things. Like going to school, or eating lunch in the cafeteria. Jennifer knew that everyone deserves a voice! Then the Americans with Disabilities Act, a law that would make public spaces much more accessible to people with disabilities, was proposed to Congress. And to make sure it passed, Jennifer went to the steps of the Capitol building in Washington DC to convince them. And, without her wheelchair, she climbed. ALL THE WAY TO THE TOP!
