Islamic Philosophy and Occidental Phenomenology on the Perennial Issue of Microcosm and Macrocosm [New Brunswick, N.J.] : Rutgers University ; [Santa Barbara, Calif.] : P. Smith

The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries.

Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

Old Days in Diplomacy Springer

Beyond What is Written examines Erasmus' and Beza's multiple

editions of the New Testament and the vast body of annotations which accompany these editions. This study provides a new understanding of the many conjectures on the New Testament text proposed by these two renowned scholars as part of their New Testament projects. As a consequence, it not only elucidates their different approaches to New Testament textual criticism, but also clarifies the nature and role of conjectural emendation in sixteenth-century scholarship. As a piece of historical research, this investigation into conjectures in the work of Erasmus and Beza also contributes to the ongoing debate on the nature and task of textual criticism today. The study is an important publication for textual critics and exegetes of the New Testament, as well as for historians of the Renaissance and the Reformation.

Canadiana BRILL

This book is about how people behaved during the German occupation of France during World War Two, and more specifically about how individuals from different social and political backgrounds recorded and reflected on their experiences during and after these tragic events. The book focuses on the concepts of treason and sacrifice, and takes the form of an introductory overview, followed by contextualised case studies in the areas of politics, daily life, civil administration, paramilitary action, literature and film.

Thinking of the text from the Dies frae (S. Matthew, XXV, 40). It is also probable that this other Saint Francis, partly out of admiration for his illustrious compatriot of Assisi and partly from a compelling urge to be superlative in all things, chose the title in opposition to the Franciscans, the Fratres Minori, I who had

previously adopted this style taken from Saint Matthew, XXIII, 8. The title "Minim" was confirmed in these words" ... eosque Eremitos Ordinis Minimorum Fratrum Eremitarum F. Francesci de Paula in posterum nuncupari," taken from the Papal Bull, Meritis religiosae vitae, of 26 February, 1493. The earliest reference to the Order in France is in a fragment preserved in the Bibliotheque de l'Arsenal called, La regle et vie de Frere Franfois, pauvre et humble hermite de Paule, laquelle donne a tous ses 2 freres voulant entrer et vivre en son ordre. The dating of this manuscript should be accepted with considerable reserve; it bears a clearly legible "1474," although it seems most unlikely that any reference to an Order occurred before the Bull of 1493 or that any Rule appeared in French before the Founder's visit to Louis XI in 1483. 3 The fame of Francis and his reputation as a "guerisseur" had reached the French court where Louis XI was sick and dying; the King summoned him to the chateau of Le Plessis-les-Tours, but it required the intervention of the Pope to make the hermit undertake the journey

Authored by cataloging librarians, educators, and information system experts, this book of essays addresses ideas and methods for tackling the modern challenges of cataloging and metadata practices. Library specialists in the cataloging and metadata professions have a greater purpose than simply managing

information and connecting users to resources. There is a deeper and more profound impact that comes of their work: preservation of the human record. Conversations with Catalogers in the 21st Century contains four chapters addressing broad categories of issues that catalogers and metadata librarians are currently facing. Every important topic is covered, such as changing metadata practices, standards, data record structures, data platforms, and user expectations, providing both theoretical and practical information. Guidelines for dealing with present challenges are based on fundamentals from the past.

Recommendations on training staff, building new information platforms of digital library resources, documenting new cataloging and metadata competencies, and establishing new workflows enable a real-world game plan for improvement.

Gilles Mouëllic examines improvisational practices that can be specifically attributed to the cinema and argues in favor of their powers as instigators of unprecedented forms of expression. Improvising Cinema reflects both on the permanence of attempting improvisation and the relationship between technology and aesthetics. Mouëllic concludes preservation becomes even more invaluable in the case of improvisation, as the creative act exists only within the brief time span of the performance.

In this important book, Thomas R. Flynn reinterprets and evaluates Sartre's social and political philosophy, arguing that the existential ethics of Sartre's early phase is consistent with the

Marxist-inspired views of his later writings. Displaying his mastery of Sartre's entire corpus, Flynn reconstructs Sartre's social ontology with its sensitive balance of the existentialist's respect for moral responsibility and the Marxist's sense of social causation. Flynn focuses on the issue of collective responsibility as a particularly apt test-case for assessing any proposed union of existentialist and Marxist perspectives. The study begins with an examination of the uses of "responsibility" in *Being and Nothingness* and in several postwar essays. Flynn then concentrates on the *Critique of Dialectical Reason*, offering a thorough analysis of the remarkable social theory Sartre constructs there. A masterful contribution to Sartre scholarship, *Sartre and Marxist Existentialism* will be of great interest to social and political philosophers involved in the debate over collective responsibility.

Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English*

Word Roots, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, *dysacusia*, *hyperacusia*. These root-starting terms then are followed by terms where the root falls behind the word, e.g., *acouesthesia* and *acoumeter*. These words are followed by words where the root falls in the middle or the end, as in such terms as *bradyacusia* and *odynacusis*. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Beyond What Is Written Springer Science & Business Media

By proposing the Microcosm and Macrocosm analogy for dialogue between Islamic Philosophy and Occidental Phenomenology, the authors of this volume are reviving the perennial positioning of the human condition in the play of forces within and without the human being. This theme has run from Plato through the Middle Ages, Renaissance and Modernity, and has been ignored by contemporaries. It now acquires a new pertinence and striking significance due to the scientific discoveries into the "infinitely small" in life, on the one hand, and the prodigious technological discoveries of the "infinitely great" on the other. Both open up undreamt-of prospects for the continuing conquest of cosmic forces. The human person – thrown into turmoil by the new approaches to life and needing to acquire new habits of mind, having lost security of all beliefs – desperately seeks a new clarification of the Human Condition within the unity of everything-there-is, of cosmic forces, and of his destiny. The dialogue between Islamic Philosophy and phenomenology of life can show the way. Pedigrees of the County Families of Yorkshire DigiCat

This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography, Martin Waldseemüller's Carta marina of 1516. By transcribing, translating into English, and detailing the sources of all of the descriptive texts on the map, as well as the sources of many of the images, the book makes the map available to scholars in a wholly unprecedented way. In addition, the book provides revealing insights into how Waldseemüller went about making the map -- information that can't be found in any other source. The Carta marina is the result of Waldseemüller's radical re-evaluation of what a world map should be; he essentially started from scratch when he created it, rejecting the Ptolemaic model and other sources he had used in creating his 1507 map, and added more descriptive texts and a wealth of illustrations. Given its content, the book offers an essential reference work not only on this map, but also for anyone working in sixteenth-century European cartography.

In this book, experts discuss whether volatility, uncertainty, complexity and ambiguity (VUCA) represent a challenge or a business opportunity. More intense debates on global climate change, increased turbulence in financial quarters, increased job insecurity and high levels of stress at the workplace are

attracting attention in the context of organization behavior and entrepreneurship. Fear and confusion have become part and parcel of business, often undermining trust, cooperation and inspiration. As a response, a new way of organizing self-management has emerged. The book combines practical wisdom from East and West, to develop integrative self-management theory and practice; provides direction to support an integrative mind-set, integrative organization and integrative leadership; and presents VUCA as an opportunity and necessity for development and growth, rather than a threat.
